EU votes to be blocked, Page 8

The chairman of South Korea's Securities Supervisory Board (SSB) was arrested yesterday on corruption charges, and prosecu-tors said they would investigate other government officials overseeing the stock market.

Mr Paik Won-ku was accused of accepting Won10m (\$12.800) for granting Yukyong Information Telecom a listing on the Seoul atock market and receiving Won110m in 10 other unspecified

The aupervisory board is the government agency that regulates the stock market, including approving share listings, investigating insider trading and supervising mergers and acquisitions. Prosecutors said they would expand their probe to include other officials at the board and the finance ministry who deal with securities regulation,

There are concerns among investors that the corruption scandal, the latest in a series that has sbaken Korea since last autumn, could affect share prices in an already fragile market,

The involvement of Mr Paik shocked the financial industry as he was regarded as a high-flyer. A former customs administrator and vice-finance minister, Mr Paik was assumed by many to be in line for an economic portfolio in the cabinet.

The scandal is likely to renew allegations about widespread price manipulation in the Korean stock market. It also raises questions about the government's securities policy.

Analysis suggest the state's tight supervision of the stock market has created fertile ground for official corruption. This is particularly true for the listing of shares, with more than 200 companies waiting to issue initial oubbc offerings The SSB is the second government economic supervisory agency to be involved in a corruption scandal recently. Several officials from the Fair Trade Commission, which oversees activities of big industrial groups, were arrested for allegedly accepting bribes in return for approving expansion plans by businesses.

help Britain".

Tractebel, the multinational Belgian utility, has given np hopes of investing in the UK elec-tricity industry, claiming that the political and regulatory risks are too high,

The Belgian company was seen as a potential bidder for Midlands Electricity, the regional electric-ity company which has accepted a £1.7bn (\$2.5bn) offer from two US utilities.

But Mr Philippe Bodson, chief. executive, told the Financial Times the UK had become too "unpredictabla" for his company

NEWS: EUROPE

Russia takes step to ease rouble curbs

By Graham Bowley in London and Chrystia Freeland in Moscow

2

Russia, which has historically barred its citizens from taking the national currency out of the country, has taken a big step towards world markets by making the rouble fully convertible for foreign trade transactions.

The move, which could make Russia more attractive for outside investors, is part of President Boris Yeltsin's vigorous effort to persuade voters to support him, and the bold market reforms he has set into motion, in the June 16 presidential elections. In a liberal economic pro-

gramme unveiled on the campaign trail last week, Mr Yeltsin promised he would make the rouble "a real, hard currencv

The government moved in that direction on Saturday. when Moscow signed the International Monetary Fund's "Article eight" on currency convertibility, which will take effect immediately, the central bank said.

Mr Alexander Potemkin, central bank deputy chairman. said the decision would enable Russia to attract cheaper foreign loans and more investment.

Under Article eight, IMF members agree not to impose restrictions on payments and transfers for current account traded currency.

Geneva talks: Serbia's President Milosevic (left), Nato chief, General George Joulwan, and US secretary of state Warren Christopher Bosnian poll to go ahead despite war crimes row

Federation. Under the agreement, indicted

By Laura Silber in Geneva

Mr Warren Christopher, US secretary of state, yesterday said elections in Bosnia would be beld as planned, despite the failure of international efforts to oust Mr Radovan Karadzic, the Bosnian Serb leader who is wanted on war crimes charges.

"After meeting all the parties here, elections could, and should, go on as scheduled," Mr Christopher told reporters in Geneva following a summit with the presidents of Serbia, Bosnia-Hercegovina and Croatia.

The holding of elections throughout Bosnia by September is seen as crucial for the full implementation of the Dayton peace agreement, which divided the war-toru coontry roughly in half between the Bosnian Serbs and the Moslem-Croat

war criminals are banned from holding public office or standing in elections. However, Washington is anxious for ections to be held on schedule becaus President Bill Clinton has pledged to pull ont the 16,000 American soldiers who are part of the 60,000-strong Implementation Force in Bosnia by the end of the year. At the start of the Geneva meeting however, Mr Allja Izethegovic, president of Bosnia, reiterated his demand thet elections should not be held unless Mr Karadzic and his military commander. General Ratko Mladic, were extradited to the IIN war crimes tribunal in The Hagne. During the all-party summit, Mr Christopher and European mediators exerted pressure on President Slobodan Milosevic of Serbla to provide "concrete proof" that Mr Karadzic was no longer in

power. The Bosnian government and international mediators fear Mr Karadzic will continue to wield power behind the scenes - undermining elections and the peace accords - in spite of his earlier pledges to delegate soma of his powers to his hardline deputy, Mrs Biljana Plavsic.

Mr Nicholas Burns, the State Department spokesman, said the date for Bosnia's elections would be announced on Jone 14 in Florence at the mid-term review conference of the year-long Dayton plan. He said it was likely to be in

Mr Flavio Cottl. the Swiss foreign minister and chairman of the Organisation for Security and Co-operation in Burope, which is organising the poll, said more progress needed to be made on free movement of peoples and freedom of the press. .

EUROPEAN NEWS DIGEST Albania boycott mars runoff poll

Albania's second round of voting went ahead yesterday in spite of a boycott of the election by most opposition parties and calls from the west for the election to be re-run.

Opposition parties, including the Socialist party, continued their hunger strike in protest at what they claimed were serious manipulations and violations accompanying the first round of voting on May 26.

The ruling Democratic party claims to have won a sweeping

67.8 per cent of the vote in the first round, but the Organisation of Security and Co-operation in Europe, which was monitoring the election, the European Union and the US have all criticised the fairness of the process and called for partial re-runs.

Yesterday's run-offs were held in constituencies where no

candidate won a majority last week. Albanian President Sali Berisha has insisted the elections were fair, with only slight irregularities, and alleged that the Socialists and other opposition parties withdrew because they were losing. The Socialists said they would not take up the five seats they won or enter the future parliament and would press on with their hunger strike until new elections were called. Marianne Sullivan, Tirana

Bankers warn Russia on policy

Russia can expect continued international support for the restructuring of its external debt only if it pursues "appropriate policies", western central bankers warned vesterday.

The warning came just weeks after Russia reached agree-ment with the Paris Club of creditor governments and the London Club of commercial bank lenders on restructuring of most of its external debt. But with the Russian presidential election looming, European bankers, especially in Germany. remain anxious about the fate of their loans to Russia.

The issue was raised yesterday with a panel of central bank governors by bankers attending the International Monetary Conference in Sydney. The annual conference brings together chairmen and chief executives from 102 of the world's leading international banks to discuss banking and economic issues in private meetings.

Mr Eddie George, governor of the Bank of England, said in a briefing after the closed door conference session that the central bankers believed that in principle no country, even

one so important as Russia, was "too big to fail". Mr George said that prevention was clearly better than the resolution of a crisis, and welcomed efforts by the International Monetary Fund to improve its surveillance of member countries' economies and to enhance the availability

to the Fund and to the financial markets of timely economic statistics. George Graham, Sydne

New chief for French television

Mr Xavier Gouyou-Beauchamps, a television executive with extensive experience in government and public broadcasting, was yesterday appointed head of French public television.

Mr Gouyou-Beauchamps, the general manager of public channel France 3 since 1994, takes over from Mr Jean-Pierre Elkabbach, who resigned on Friday after a furore over multi-million-dollar fees paid to star entertainers. Disclosures that France Television was spending FFr640m (\$125m) this year on the stars caused an outcry in parliament and the

"T am convinced that public television plays a crucial role in our cultural identity and social cohesion," Mr Gouyou-Beauchamps, told reporters after his appointment by the broadcasting regulatory agency, France Television is financed almost equally by advertising and a share of the annual FFr700 licence fee that viewers pay. Romanians vote in council polls

Former tennis star Ilie Nastase, a Bucharest mayoral candidate, leaving the polling booth yesterday

Romanians went to the polls yesterday in the first round of voting for mayors and local councils. The elections are the first nationwide poll for nearly four years and are an important test for the main political groups - several of whom have split or formed new alliances since 1992 - ahead of parliamentary and presidential elections due in the autumn. Most attention has focused on Bucharest where Mr Ilie

Nastase, the former tennis star, is running for the ruling leftwing Party of Social Democracy in a field of 47. Mr Nastase is expected to go through to a two-way run-off on June 16, against Mr Victor Ciorbea, the candidate of the centre-right Democratic Convention, Romania's main opposition group and the winner of the country's first post-communist local elections in early 1992. Candidates must receive an absolute majority with turnout of at least 50 per cent to win in the first round. Officials said that more than 40 per cent of eligible voters had cast their ballots three hours before polling ended. Full results are due on Thursday. Virginia Marsh, Budapest

Bucharest in Eurocopter deal

The Romanian state-owned aviation group, IAR, has signed an agreement with Eurocopter for co-production of 80 of the Franco-German venture's Ecureuil helicopters at a plant in Brasov, central Romania.

In the first phase of co-operation up to 2001, IAR intreprinderea Aeronantica Romana - will assemble 40 twin-engine helicopters from kits provided by Eurocopter, a joint venture between Aérospatiale and Daimler Benz Aerospace.

The helicopters, which are used by hospitals and police and for other non-defence activities, are due to be sold on the domestic market. But the two aviation groups have also agreed to explore export opportunities. Virginia Marsh

tion, or G-6. Following the second round of voting in the general election, winners were confirmed

in only 257 out of the 270 constitueocies, after the clergy-dominated Council of Guardians, which vets all parliamentary candidotes, had annulled the results, without explanation, of 13 constituencies io six cities, iocinding isfaliao. Iran's second most important city.

The annuiments were all the more controversial because women candidates on the reformist ticket - which was led hy President Rafsanjani's daughter, Faczch Hashcml, who was elected in Tehran io the first round - were reckoned to have won the most votes in up to 10 of the constituencies with anoulled results."

Women make up half of Iran's electorate. According to analysts, the comparative success of female candidates makes them a oew force for gradual political liberalisation, away from the rigid rule of the more obscurantist clergy.

By-elections are to be heid, during the next few months in all of the 13 constituencies. erates' candidate, Mr Abdullah

In the geoeral election, the' JRM retained its position as, the largest single group with 96 seats, down from its 150-160 in the previous parliament,

The G-6, which won 70 seats, and can count on op to 25 lcftist independents for support on some issues, was widely seen as the main winner. However, there remain 51 independent deputies whose sympathies remain to be assessed.

The G-6 and their sympathisers are urging economic and political liberalisation after 17 years of what is seen as iden logically rigid, and economically inefficient, clerical rule, They point to the continuing debasement of the Iranian cur rency, the riyal, which in the last two months alone has fallen oo the real "hlack" market by more than 5 per ceot, to IR4,400 to the US dollar, and point to annual inflatioo running at 65-100 per ceot.

Israel as divided in the aftermath as in its vote

ISRAEL By Jufan Ozanne

Nothing worries Israelis more than the idea that their country is being split. It is a fear which speaks directly to a subconscious created by turbulent, ancient history.

The wafer-thin electoral victory by the rightwing leader Mr Benjamin, Netanyahu over the prime minister Mr Shimon Peres last week resurrected this fear, almost as much as did the assassination of prime minister Yitzhak Rabin by a right-wing Jewish extremist last, November.

"Half the public in Israel is now going around with a feeling that redemption is at band; the other half helieves it is

right) spelling out the danger, Mr Yoel Marcus, senior comtrapped in a hell un earth," said Mr Hemi Shalev, a political commentator in Friday'a mentator for the liberal Ha'ar-Mn'ariv daily tahloid. "One etz daily, said the worst possipart praises its daliverance hle scenario was coming true from a great nightmare, and a merger of the religious hloc tha other is apprehensive of parties and the rightwing extremists in Mr Netanyahn's ahout terrors lurking just ahead. Some rejoice, others weep. The Israeli public has Likud party. Others called on the prime never before been so divided."

FT writers on issues facing the UN Habitat conference on urban development starting today in Istanbul

Private sector key to tackling urbanisation problems

ities make countries rich; none of the world's high-income economy got that way by keeping the majority of people working on the land. In that sense, the fact that more than half of the global population will soon live in towns or cities is cause for celebration. Whether those cities will be worth living in, however, will depend on how they are built.

As the organisers of the United Nations Habitat conference, opening in Istanbul today, point out, developing countries are not urbanising faster than they have done in the past. Urban populations in the south grew rapidly in the 1990s, but they grew faster still during the 1950s. And few countries have matched the record set hy the UK in the latter part of the 19th century, when the urban share of the population rose from 37 per cent to 60 per cent in just 30 years.

What is unique about the urbanisation

of the 1980s and 1990s is the number of countries iovolved. It is the scale of chance, rather than the pace, that leaves the UN predicting such a sharp rise in the share of world population living in urban settlemeots over the next few decades from 25 per cent in 1975 to nearly 54 per cent in 2025.

Urbanisation triggers a huge need for new infrastructure and services: for housing, safe water and sewerage systems, good transport networks and, not least, effective control of pollution. More than a third of the urban population lives in substandard housing, and 40 per ceot do not have access to basic water and sanifation. According to the World Bank, the east Asian countries alooe will oeed to invest

\$500hn over the next 10 years, solely in public infrastructure. Given the constraints on public budgets,

a large chunk of the funds for such pro-

the most urgent need for private funds and ingenuity are often trickiest for governments to give up.

Many east Asian governments have promised to step up the pace of privatesector participation in urban infrastructure projects. But critics say that progress on the ground remains slow, partly because of fear of the popular reaction to private companies making money out of the demand for basic services.

Latin Americans tend to be no less concerned about putting core services such as water supply and sewerage into the hands of private profiteers. Yet the sheer weight demand for core urban infrastructure, and shortage of public funds, mean that many governments have found themselves taking the lead in opening these sectors to private companies.

jects - worldwide - will have to come Argentina, Chile and Brazil are all now from the private sector. Yet the areas with granting private concessions in areas such as water supply and road-building, with impressive results. In a matter of months the near-bankrupt city of Rio de Janeiro has put a good share of its roads and bridges into private sector hands. Its zeal to privatise many of Rio's best known landmarks has even extended to the Maracana football stadium, which it plans to put up for private concession some time

next year. n all of these areas companies, like cities themselves, can be part of the solution, or part of the problem, depending on how governments are able to manage the urban development process overall. Several of the fastest expanding cities in east Asia have shown how striving to meet growing urhan needs can deliver a virtuous circle.

Building housing, for example, means expanding business opportunities and raptd growth in local employment and average incomes, as well as an improve-ment in many inhabitants' quality of life. But that, in turn, attracts yet more migrants from the countryside - raising a whole new set of challenges for governments and business alike.

a construction of the second second second

Some of the new public - and private investments will be difficult to miss. If all goes according to plan, by 1998 Malaysia will have a new international airport et Sepang, south of Kuala Lumpur, equipped to serve up to 25m passengers a year and complete with "south-east Asia's largest covered car park .

In the meantime Shanghai will supposedly have acquired the world's tallest building, in the form of the \$1hn, 95-storey Mori tower on tha east bank of the Huangpu river.

Yet none of these headline grabbing pro jects will make Asia's richest cities easier places to live and work in if governments do not get to grips with some of the more mundane side effects of urbanisation, such as traffic congestion, pollotion, and deal-ing with an ever higher volume of solid waste.

Optimists hope that cities such as Kuala Lumpur and Hong Kong will be able to use their new financial strength - and comparatively good record of managing urban change - to develop imaginative solutions to such worldwida problems which others may follow.

Others are less sanguine. But those two advantages alone leave both cities far bet-ter placed to deal with the challenge of urbanisation than most cities in Africa and Latin America.

Making a golf course from a trash mountain

WASTE

Garbage mountains in Cairo. golf courses at Chicago landfill sites, or western packaging refuse on the streets of Moscow underscore the varied challenge posed to the world's cities by rubbish

While poorer countries are failing to collect up to as ourch as half, sometimes more, of the waste generated by urban ducilers, rich cities are struggling to deal with ever increas-ing amounts of rubbish.

Potentially, this presents opportunities worldwide for western waste companies, hut in the short term, they are looking for a firmer stance on regulation from governments. This is required both to stabllise markets for recyclable commoditles and help them decide whether It is worth investing in costly new waste disposal facilities.

In developing countries, for instance, a basic condition for western private investment has to be the ability of local communities to pay for services. Uuless they can. Mr Alain Lambert, director general of Sita, the waste disposal arm of French water and waste conglomerate Lyonnalse des Eaux, sees little scope for western companies to do business in many developing countries.

There is no market for me in Cairo," he explains. "Garhage disposal is free there." be adds, referring to the fact that much of it is simply dumped into garbage mountains.

Moscow stands in a symbolic half-way house between the industrialised and developing

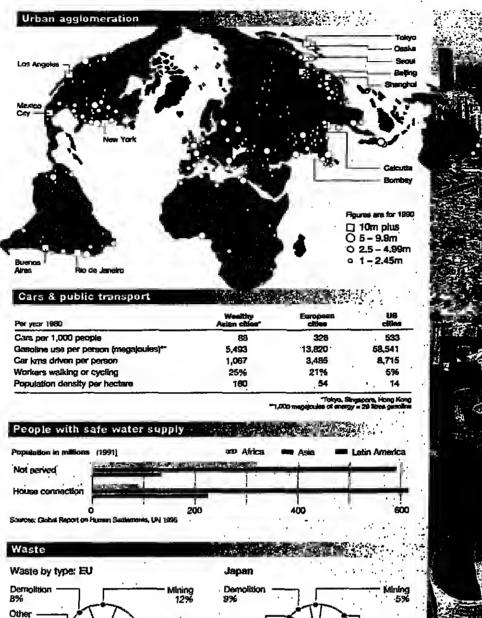

successfully combined some form of public solid waste collection service while privatis-

ing some parts of the city. However, a challenge for both developed and developing countries is providing the right economic incentives for housebolds and husinesses to reduce, recycle, or otherwise recover the rubhish generated, An important part of that process is taxing pollution and pricing natural resources to discourage waste and reflect the cost of damage to the eovironment from rubhish,

Poverty Is a powerful incentive for informal waste pickers in developing couotries to scavenge around for rubbish. Meanwhile, at a landfill site just outside Chicago, WMX Technologies, the hig US waste management group, is keen to show off not only a golf course but also an electricity plant run on methane gas generated hy the site. It admits, however, that it huilt the plant only because of the incentive of government subsidies

Since 1990, the generation of municipal waste per capita has increased in all the countries of the Organisation for Economic Co-operation and Development except Germany.

The Japanese are huilding islands of waste in Tokyo Bay to cope with more than 22,000 tonoes of garbage generated by the capital each day. These in turn are threatening both ship-ping and the fishing industry. Since the European Union followed Germany's lead and introduced rules requiring all 9% Municipal member states to recover up to 6% 65 per cent of their packaging waste by 2000, Britain has led Industrial

HOLE STREET

Mr Xie admitted as much recently at a symposium of husiness leaders in Beijing. The fast economic growth, accelerated urhanisation and population increase meant that China's "environment situa-tion" was "still very serious", Mr Xie said.

"Environment pollution, with cities at the centre, is still developing and gradnally extending to the countryside; the scope of ecological destruction is expanding and intensifying; and eco-environmental sector of the economy ~ as a problems have become major problems affecting overall social and economic develop-

ment in some regions." At least Mr Xie could not be accused of understating tha prohlem - although mere words can hardly describe strains on China's environment hrought about by Its extraordinary economic transformation in the 18 years since it began opening to the outside world. That transformation has eccelerated in the past fiva years, bringing with It additional burdens to an already overstretched environment. China has made much of

The bank, in its plea for stiffer penalties to deter widespread flouting of environmen-tal standards, said Chinese es would have "no eco

sophistlcated environmental controls. This excess coal produces 1.4m tonnes of sulphur dioxide and 15m tonnes of smoke and dust, adding significantly to atmospheric pollution in the region, The World Bank, in a landmark report, Urban Environ-mental Pollution, published in 1994, warned that China needed to take drastic ateps both to encourage conservation of scarce resources such as water and to hit industrial polluters with tougher penalties. The bank identified emerging rural manufacturers, "township and village enterprisas", the fastest growing

> threat to China's already over hurdened environment. It noted that in 1980, when the new environment regulatory system hegan to he imposed, these rural enterprises accounted for less than 10 per cent of industrial output but as much as 36.8 per cent in 1992. The study said it was especially worrying that smaller enterprises had avoided many of the restraints that applied to state-owned enterprises and the regulation problem could no longer be ignored

world. Having saved all available bottles, tins and plastic containers available under communism. Muscovites have been overwhelmed, since their dash to western-style capitalison by disposable packaging from western food imports.

But the problems are at their most pressing in developing couotries, where mounds of uncollected household rubhish expose people to disease and contamination of water aod food supplies.

In Jakarta, for Instance, 40 per cent of solid household waste is not collected: much of it ends up in consis, rivers, and dong roads, clogging drainage channels and causing extensive flooding during the rainy season. A 1991 study related respiratory diseases among children to the burning of uncollected carbage.

The World Resources 1996-97 report prepared for this week's Istanbul conference admitted that western style privatisation of waste services could uot he seen as a "panacea" for the problems of many countries. instead it called for a "mix of public and private services" in dealing with waste problems. It cited Scoul, Knala Lumpur and Bangkok as cities which had

the way in trying to achiev Bouros, UNEP Enstroamontal data report, Moteng Cilles Work (1996) the targets at the lowest possible cost

Mr John Gummer, UK envi ronment secretary, claimed recently that a new industryrun scheme to collect a levy from companies which either use or manufacture packaging would cost industry just £50m (\$76.7m) to £150m a year. This compared with the DM4hn (\$2.6hn) price tag of the Ger-

Bangkok traffic victim. A young mother, she leaves her house in Thailand's capital man system to achieve the same sort of packaging targets. Britain has also become the every morning at around 5am, latest EU country with a landputs her still sleeping son into the back seat of her silver fill tax to divert waste away from laudfill sites and towards Honda Civic and sets out into the hazy dawn. more environmentally friendly forms of waste disposal.

and water treatment as a huge hurden on the state, resulting in contaminated groundwater and polluted urban snrface water acrosa the country. "Nearly 40 per cent of urban China is unserved by sewers, with waste water going directly into lakes and rivers...only 4.5 per cent of municipal waste water flows receive treatment of any kind." The study, in its conclusion, argued strongly that increasingly affluent urban consumers were "well positioned to absorb both the indirect and direct costs of an improved environment".

It went on: "While the imposition of user fees may be politically difficult, city leaders must recognise that the ... current chnice to rely on indirect payments leads to excess demand, on the one hand, and an inability to meet needs on the other."

Tony Walker

WATER

For every citizen of Manila some 62 litres of water go missing every day, lost through theft or leakage from the city's dilanidated mains system.

The total wastage, equivalent to the entire consumption of 2m Britoos, is not extraordinary by the standards of cities in developing country. But it is a stark reminder of how illequipped Manila - and the developing world in general remains to supply its inhabitar 's vith such a basic need. A ter is not an obvious problem, especially in tropical regions where it seems to rain

evner's b-lieve ad trate sup-

ply is one of the biggest challenges facing governments as they grapple with the consequences of rapid urbanisation and industrialisation. The Aslan Development Bank (ADB) has estimated that demand for water in Asia alone

will double by the year 2005. In which governments will be north China there is already unable to afford to rehabilitate acute depletion of aquifers at a and expand supply systems. time of surging demand. Mr Michael Cohen, a senior "It is more a management problem than a crisis." says Mr adviser at the World Bank. Jeremy Berkoff, an ADB consays about \$100bn was spent sultant. Water shortages need in all developing countries durnot inhibit economic growth, ing the 1980s to improve water though in such cities as supply. Yet some 220m city Madras, where poor manage-

dwellers - or one in eight of ment and planning have led to the urban population - still chronic shortages, he admits have oo access to a safe and there is some evidence of this all the time. I'lt development reliable water source. Only 2 starting to happen. The first task is to plan alloper cent of waste is treated in

cation and supply of what bas Experts say a full-scale crisis can be averted, but only if govbecome a scarce resource, says Mr Cohen. Governments must eruments take a careful take decisions about how much approach to planning, allocawater to make available for tion and regulation. Also irrigation, and how much required is e partnership with the private sector, without should be made over to urban residential and industrial users. Then, appropriate pricing policies are needed to reinforce these allocation decisions

Getting the right halance requires some awkward decisions. In restricting the use of water for irrigation, countries may have to balance the need to supply cities with their desire to promote farming for reasons of food security. Or they may aggravate the trend towards migration to the cities, as has bappened in Malaysia.

To encourage efficient use of water, countries have to impose pricing policies which may meet resistance from poor consumers. In Manila, consumers prefer to dig wells, which undermines the water table, or steal from the official system, rather than pay. The most successful coun-

tries are those which have got the basic planning right. South Korea has an independent body responsible for long-term planning. As a result the country has built up a supply network with a capacity 7 per cent in excess of needs, although there are still localised shortages.

Oil refinery and gold mine feature in purchases West benefits from Kazakhstan sell-off

By Sander Thoenes in Almaty, Kazakhstan

Western companies have won control of some of Kazakbstan's biggest industrial companies, collectively valued at more than \$1bn, after weekend sales designed to show government commitment to "open and transparent public tenders"

The purcbases include the country's main oil refinery, a sizeable oll enterprise and the fourth largest undeveloped gold mine in the world.

The government of Kazakhstan decided to seil the businesses by public tender in order to restore confidence among investors, who have been shaken by a series of scandal-ridden contracts which were awarded without tender at undisclosed sums.

"It's a key event. The government is striving for open tenders to attract a wider range of foreign investors." said Mr Nurzban Subkbauberdln, chairman of KazKommerts-Bank, one of a group of consultants to the oil tenders.

"In this country, there are opponents and supporters of privatisation. A successful deal will pave the way for more tenders.

A consortium of three western gold companies - Teck, First Dynasty and Bakyrchik Gold - won exclusive rights to negotiate a contract for a majority stake in the Vasilkovskoye gold ore deposit, which proven extractable bas reserves of 6.5m troy ounces.

KAZAKHSTAN

0 Km 400

The group will pay \$85m for the purchase, and has pledged \$360m in investments, and

undisclosed royalties, in return for an 80 per cent stake in the But Mr Curtis Coward, adviser to the government from the US law firm McGuire.

Woods, Battle & Boothe, said the government would try to negotiate a better offer for a smaller share and reserved the right to approach the other bidders if no deal bad been reached by July 1.

Vitol, the Dutch oil trader, won an open tender for purchase of the Shimkent oil refinery, Kazakbstan's largest with a cash bid of \$230m and pledges of investment. Samson, the US oil company

and Hurricane Hydrocarbons of Canada were the only hidders for Yuzhneftegaz, a Kazakh oil enterprise with proven bydrocarbon reserves of 650m barrels, but the organisers of the tender would not comment on the outcome.

In addition, Exxon and Texaco of the US are considering a bid for Aktyubinskneft, an oil production association with reserves of 1.4bn barrels. The bid deadline has been extended to August 1 to allow for "due diligence" investigations.

The Vasilkovskoye mine is the world's fourth largest undeveloped mine but many big foreign gold companies lost faith in Kazakhstan wben the government cancelled an ders said. auction for the mine last year and handed it directly ing Canadian Occidental and to Placer Dome of Canada.

At the same time, he had continued to give his blessing to the secretive negotiations of TV and broadcasting rights by keting rights were being negotiated by "too few people behind closed doors." Mr Joseph Blatter, his general secretary, on the assumption

turned by opponents of Mr Havelange within his executive week with his position as presi-dent of Fifa, world football's governing body, unchallenged committee into key tests of the president's style and conduct. Since elected in 1974 on a promise to expand football to after 22 years at the helm. Instead, two decisions taken African and Asian countries, Mr Havelange has transformed Fifa into a global enterprise worth millions of dollars.

But his autocratic style and habit of manipulating Fifa'e pyramid structure of internal committees - hand-picking members to increase his power base - have been increasingly criticised by members of the executive committee who feel they have powerful organisa-tions behind them.

be staged in one country.

The president of the European football organising authority Uefa, Mr Lennart Johansson, who is also a vice-president of Fifa, brought the rumblings to the surface last year hy calling for much greater democracy within Fifa. Mr Johansson forged a behind the scenes alliance with Mr Chung Mong Joon, the South Korean who represents Asia on the executive committee and who, in a confrontation with Mr Havelange last December, claimed that TV and mar-

Mr Chung has been a leading that the 2002 World Cup would figure behind his country's bid for the World Cup, skilfully Both issues have bean falling behind the -co-hosting option first pushed by the Europeans last month on the official grounds that the World Cup issue was threatening to refuel old antagonisms in the Asian region and whan it looked as if Japan might win the venue.

Matra

Following Friday's decision, Mr Johansson is locking for-ward to realising his ambition of succeeding Havelange as president when the next election is due in 1998.

As for Mr Chung, he feels that his involvement in Fifa's controversial debate has enhanced his political ambitions. Already a member of parliament and the son of the founder and owner of the powerful Hyundai group, Mr Chung wants to be a future president of his country. The question mark remains

over Mr Havelange himself who, for the moment, is refusing to declare his hand. His opponents say they will not move to dethrone him prema-turely as long as he embraces the new spirit of democracy. He may be biding his time until Fifa's congress in July with the attendance of many still-loyal delegates - to decide whether his regime is irrevocably over.

Inkatha and ANC raise hopes for election

By Mark Ashurst in Johannesburg

Hopes of a peaceful provincial election in South Africa's volatile KwaZuln Natal have been revived hy local politicians after tha failure of national ders to agree on measures to reduce violence.

Provincial MPe from tha African National Congress and the rival Inkatha Freedom party have for the first time publicly acknowledged their role as "warlords" in regions where violence has been most intractable. They hava also pledged to support electioneering by opponents in their own strongholds.

Mr Sifiso Nkahinde, an ANC MP in the provincial parliament, announced he would escort his Inkatha rival. Mr David Ntombela, also a provincial MP, to campaign in settle-ments supporting the ANC in the Midlands region.

Mr Ntombela will reciprocate in areas traditionally loyal to Inkatha, as part of a joint campaign to promote political tolerance. "If anyone shoots at me than Nkabinde and I will fight back together," be told a ibcal newspaper.

Local elections in the province have twice been postponed due to administrative lifficulties and the high level of violence, but are likely to go ahead on Jone 26. During talks last week, at least six provincial MPs were identified as warlords.

The provincial government is controlled by Inkatha. which won 51 per cent of the vote in the April 1994 election although both parties believe the result was distorted b widespread fraud and infunidation. The ANC, whose organisational structures in the province have weakened since 1994, and Inkatha have both launched vigorous campaigns. But hopes of a peaceful elec-tion have hitherto been stalled by the breakdown of taks between national leaders on a strategy to combat violence In April, President Nelson Mandela announced be would address a traditional gathering of Zuln leaders to be called by the Zuln King Goodwill Public disclosure is crux of a new system of supervision, writes Nikki Tait Zwelithini. But a subsequent attack on the king's palace in personal liability if creditors situation. Great dishes of the world

(As served 24 hours a day by Cable & Wireless)

If telecommunications are vital to today's world, one name is vital to telecommunications.

Cable & Wireless.

TOBAGO

With businesses in over 50 countries, and our own network of high-quality cable and radio links, we're the third-largest carrier of international traffic in the world.

We're involved in mobile businesses in 30 countries; from the UK, France and Germany through to Singapore, Hong Kong and the Caribbean.

We helped launch Asia's first privatelyfinanced communications satellite, which has a "footprint" covering almost half the world's

the cannot be relied upon as a guide to future perform

population; we're laying fibre-optic cables linking the UK with Japan; and we're partnering VEBA of Germany to build new businesses in the EU.

If that sounds like a technical success story, it's no less a financial one.

Since Cable & Wireless was launched on the stock market in 1981, our growth in earnings per share and dividends has outstripped the UK average by over 200%*.

Above all, it's a success based on the unique Cable & Wireless mix of advanced technology and unparalleled experience of building trust, effective partnerships and long-term relationships with governments, businesses and customers alike.

And with telecommunications set to be one of the world's fastest-growing industries over the next decade, we face the future with some very appetising prospects indeed.

embargo against British heef could be lifted. This will be the focus of discussions hetween The committee dismisses evidence from Mr Gerald James, the former chairman of Mr Malcolm Rifkind, the Brit-Bmarc, that Mr Aitken was ish foreign secretary, and senior EU politicians, includpresent at a meeting in November 1988 at which plans ing Mr Jacques Santer, presiwere discussed to supply guns dent of the EU Commission, in to Iran through Singapore. Mr Aitken insisted that Iran was not mentioned at the

meeting, a claim backed up by Mr William McNaught, the company's former managing director. Mr Aitken alleged that Mr James and sections of the modia had fabricated a "phoney scandal" which had damaged him politically. Mr Aitken resigned as chief secretary to the Treasury last year saying he could not carry out his responsibilities at the same time as preparing for legal actions against "adversaries in the media".

The committee's report criticises the trade department for issning licences for the guns and recommends that responsibility for issuing licences move to the Foreign Office and defence ministry.

Mail workers vote for strike

UK NEWS DIGEST

. . .

Royal Mail is preparing an improved offer to try to preveut a national postal dispute this summer after yesterday's vote by Britain's postal workers to back industrial action against management's plans to modernise the postal services through changes in working practices. Senior management and offi-cials from the Communication Workers Union are expected to start intensive negotiations next Monday in London with both sides hopeful that a deal can be reached that will satisfy postal workers and improve business efficiency.

In the postal ballot announced yesterday 67,311 voted in favour of their union's call for industrial action (68 per cent) and 31,528 against (32 per cent). There was a 74 per cent turnout. "This result shows our members are at the end of their tether," said Mr Alan Johnson, the union's general secretary. "They do not seek confrontation or the disruption to service it would entail." Mr Richard Dykes, Royal Mail's man aging director, said last night he did not believe a strike was inevitable. "A strike would not solve anything." he said. A Royal Mail official said there had to be an end to "1970s-style demarcation lines and old-fashioned working practices". Robert Taylor, Employment Editor

Anniversary at Heathrow

London Heathrow airport yesterday celebrated 50 years as a passenger airport with a flypast hy several military and civil-ian aircraft including a supersonic Concorde airliner. Virtually nothing remains of the village of Heathrow on the site 30km west of London where one of the world's busiest airports is sited. Passenger services began on May 28 1946, when a British Operation Conception (now British Airways) con-Overseas Airways Corporation (now British Airways) con-verted Lancaster bomber left for Sydney, Australia. There were no terminals until 1955: before then passenger

facilities were kept in tents. The world's first passenger flight by a jet aircraft was made from Heathrow in 1953, when a De Havilland Comet left for Johanneshurg. The airport now han dles 54m passengers a year and deals with more international passengers than any other airport. PA News

Interest rate warning

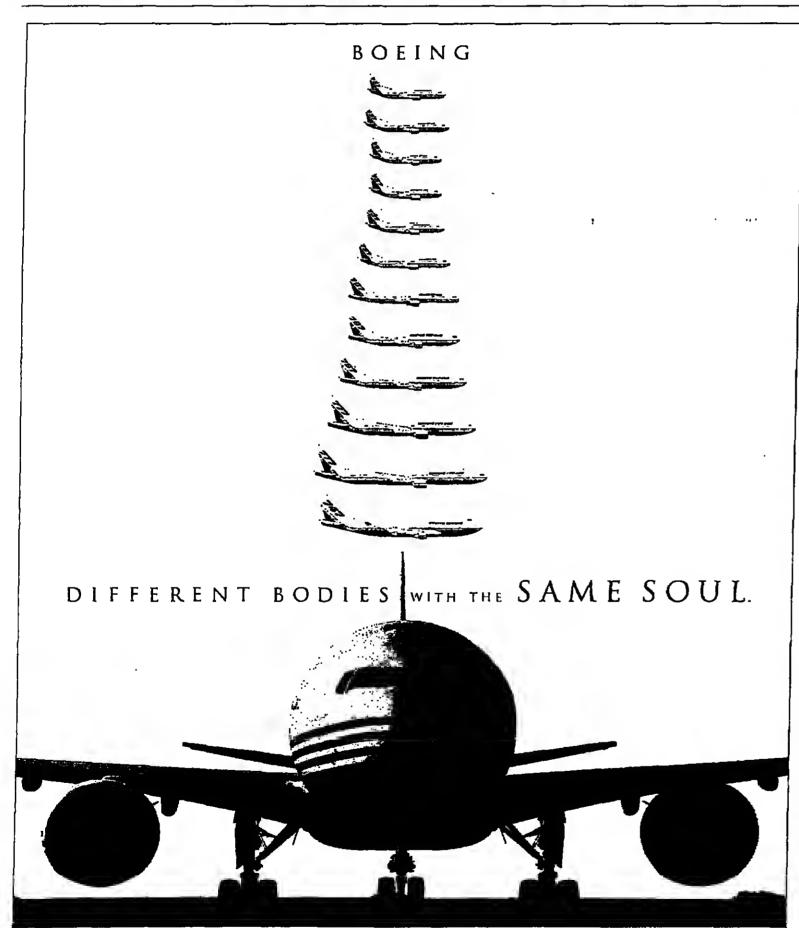

Power struggles hetween the Treasury and the Bank of England are undermining interest rate policy and the Bank should be made more independent, a leading policy think-tank says today. An article published for the Institute For Public Policy Research, an influential contributor to Labour party thinking, says the monthly monetary meetings between the chancellor of the exchequer and the governor of the Bank of England are excessively confrontational.

It says this will eventually lead to erratic and unstable swings in interest rates as the two men try to score points of one another rather than setting policy according to economi conditions. Mr Eddie George, the governor, yesterday added to the interest rate debate when he said monetary policy was to be left on hold for the time being - but that he could not rule out a further cut in interest rates.

Mr George said after a conference on international monetary policy in Sydney that the increasingly positive economic ou-look for the UK held some risks for inflation in the next coupe of years and that the inflation objective of 2.5 per cent or less "might begin to be put at risk" in 1998. Graham Bowley. Economics Staff

Murdoch paper cuts price

The national newspaper price war takes a new twist today with the decision by Mr Rupert Murdoch to cnt the price of The Times from 30p to 50,10 (15c) in Britain on Mondays (g the rest of the summer. The move has been triggered in pa by static sales of about 650,000 at News International's flagsho daily but may have been influenced by an aggressive subscrip tion initiative by rival Daily Telegraph. For years the Tel-graph group has been building up databases on its readers at those of other papers. Raymond Snoddy, London

You don't have to travel that far, or often, to meet every airplane in the Boeing family. They take off or touch down every two seconds at airports around the world. Their differences are easy to see. They vary by shape, size and number of engines to reach destinations both near and far. What makes them similar is a

۰,

dedication to value. All are designed for quiet, efficient operation; configured so airlines can deliver the highest levels of comfort and convenience; and huilt to be dependable over time. Above all, they share a common heritage-a deep, enduring commitment to quality made by generations of Boeing people to generations of travellers.

BOEING

ł

By Patrick Harverson In London

The opening game of Euro 96 may be only a week away, but there is littla evidence that London is playing host to the largest sporting event to be held in the capital since the 1966 World Cup. Wembley stadium - where all six of the London games will be played has been spruced up and Euro 96 banners hang proudly from lampposts in the local borough of Brent.

Yet central London, where many of the fans are likely to be staying and socialising, is a mostly Euro 96-free zone. Westminster council refused to allow banners to be hung from its lampposts because they carried sponsors' names. Now only the City, the financial district which is empty at nights and weekends, will sport the hanners during the tournament

The low profile London is keeping during the tournament ia remarkable givan the momantous nature of lt. In terms of the talevision audience it will attract, the final tages of the European football champlonship ranks third behind the World Cup and the Olympics in global popularity. But baneath the calm, there is much preparation, not least by tha Metropolitan Police, for whom Euro 96 represents an unprecedented test of its ability to handle large crowds. Mr Mike Cobh, press officer at Scotland Yard, says the force has been planning for two years. With an estimated 250,000 non-British fans expected to come through London on their way to games at Wem-bley and elsewhere, the Met plans to use more than 1,000 officers to keep the peace dur ing the three-week event. The operation will cost the force about £5m (\$7.6m).

Everything from helicopters, borses and police dogs to undercover detectives and "spotters" – groups of uniformed officers who follow troublemakers on match days - will be deployed to maintain order. Brent has just installed a closed circuit television sys-

Leeds United soccer club is on the verge of being sold to the publicly quoted Caspian Group in a £20m (\$30.4m) deal that will represent the most direct investment yet in football by City of London institutions. Caspian, a media gronp owned by aeveral large blue-chip investors - among them Schrodera, Mercury Asset Managemant, London and Manchester, and Guardian Royal Exchange – is expected to announce this week that it is in negotiations to acquire the club as part of a strategy to build a portfolio of interests

Biggest soccer event for 30

years fails to excite London

in sport. Mr Chris Akers, the former Swiss Bank corporate financier who is chairman of Caspian, will go to Leeds today to complete the terms of a deal that will see the group pay Elum for the 65 per cent of the club owned by Mr Bill Foth-erby, Leeds chairman, and Mr Leslia Silver, his predecessor.

It will also take on the FA Premiership cinh's £10m of debts. Caspian will finance the purchase through a placing of shares with institutions.

tem for Wembley High Road to track crowds walking to the stadium Of London's 33 councils,

Brent is most closely involved. It is spending about £176,000 of which all but £16,000 has been raised from sponsors - on looking after visitors. But the council has not spent

any money improving the grim surroundings that scar the stadium's hinterland, Government funds for an urban regeneration project have been secured but work on improving the area will not start in time for Euro 96.

cost £100.000, paid for with public and private funds. On-tributions include £12.500 from the Department of National Heritage. As in other Europ6 cities, organisers have con-plained privately about the government's refusal to po vide more money.

Cultural and arts events till

The fact that virtually all if London's boroughs are igne ing Euro 96 highlights t prohlem the city has in lacking a central political authorit Mr David White, co-ordinate for the Euro 96 arts and cu ture programme, says: "It s the only city that has not got central body and in hringin things together for Euro that has been a downside." Mr Tony Banks, Labour M for an east Loudon distric says the absence of a singl authority is an "insuperabl problem" and hodes ill for Log

don's chances of ever hostin an Olympic games again. "It a complete impediment to u getting these hig sporting events," he says. But Euro 96 is still expected

to have a positive impact or the capital's economy.

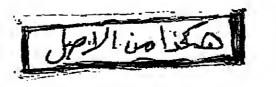

The London Tourist Board expects many of the visitors coming to the UK for Euro 96 to be in London at some point. With the fans expected to spend an average of £500 each London hopes a large portion of the estimated £125m gener ated by Euro 96 will he spent i n

capital.

Yet experience of similar international sporting events suggests that some of London's gains will be offset hy losses due to tourists deciding not to visit the city hecause of fears of overcrowding, overpriced hotels and, possibly, violeuce,

THIS WEEK

rgentines like to think of themselves as a cut above A themselves as a cut above other Latin Americans. indeed, many are a cut, a nip and a tuck different. Plastic aurgery is endemic in Argentina, a alice of everyday life. An estimated 1m people, one in 30, have put their faith in the arts of the scalpel and the suction tube.

The list of surgery junkies is vir-tually a national Who's Who. They include past, present and possible future presidents, congressmen, actors, models, chat-show hosts, footbail stars and even Catholic clergymen, presumably disgruntled with the handiwork of the Master Surgeon Himself.

Argentina is a country where looks matter. The blend of mainly Italian and Spanish immigrants has created a people of striking beauty. Those whn want to really dazzle, or to preserve the crispness of their salad days, nften feel nbliged to give nature a helpful nudge.

The best-known surgeons - who

Lough room

 $(M_{1}) = 0$

We they

Rich Argentines live on a knife edge have enlarged the breasts, firmed the buttocks and removed the sag-ging flesh of the nation's most famous personalities - are housebold names. Their patients, though occasionally discreet, more often flaunt their aesthetic alterations, displaying their surgeons' achievements in the pages of glossy magazines, or on the glitzy sets of chat

shows. Humourist Sylvina Walgar, in her book Pizza and Champagne, a debciously cruel account of Carlos Menem's razzamatazz presidency, writes of Argentina's obsession with surgery: "I have been operated on, therefore I am." For many, a visit to a surgeon is a status symbol, a route to fame and power and an elixir of youth rolled into one as irresistible as cream buns.

Carlos Menem's transformation

DATELINE **Buenos Aires:** celebrities in

Argentina are not always all they appear to be, thanks largely to the cosmetic

surgeon's scalpel, writes **David Pilling**

from mutton-chopped nationalist as governor of La Rioja province to suave, Italian-suited neo-liberal as Argentina's president has been more dramatic than any silicone-

geon's knife, provides one of the most celebrated stories in the annals of Argentine plastic surgery. When the president appeared one day with his face puffed up like a souffle, his aides burriedly invented the story that he had been bitten by a wasp. In his recent book The Masks of Argentino, Luis Majul dis-putes the accepted version that the swelling was actually caused by a collagen injection in the presidential cheeks. Majul says the "waspsting" was not the result of wrinkleremoving cnllagen, hut rather a nasty reaction in a hair transplant. Whatever the real cause, the inci-

dent has spawned a series of jokes and provided the title for a satirical magazine, called simply The Wasp. It even led to the advertising slogan

PEOPLE

based mutation. Nevertheless, of a hotel in the exclusive Urn-Menem, no stranger to the sur-guayan resort of Punta del Este, guayan resort of Punta del Este, which publicised its refurbishment by saying: "We too have been bitten by a wasp.

The mirth provided by the president's swollen cheeks was nothing compared in that derived from tales of José Luis Manzano's swollen buttocks. Manzano, former minister of the interior, was bounded in 1992 by press reports saying his derriere had been resbaped with silicone implants. That was a common treatment in Argentina until the recent case of a transvestite, injected with industrial silicnne, whose bottom literally exploded.

Manzano, whose political and ethical conduct was being scrutinised by the press, reacted wildly to the buttock-padding allegations. One day, reporters swear, he thundered

ont of his office in the presidential palace, and lowered his trousers to disprove journalistic claims. He was sacked within a month.

For most, surgery is no cause of shame. Argentina's best-loved personality, sex symbol and chat-sbow bostess Susana Giménez, is stiletto-clomping proof nf surgical wizardry. Bottle blonde, brash and 50, Susana gets progressively younger with each new season of ber show, Hola Susana.

In the right light and from a distance (quite a long distance) Susana looks more like someone's daughter than their mother, hut the Argentine diva is now a granny. Confrouting this ghastly fact in an interview with Gente (People) magazine, Susana put a brave face on events, describing berself as a "pioneer grandmother - with plastic boobs

and jeans". Nnt everynne wants a more glam-orous look. Julieta Ortega, the daughter of a famous politician, actually reduced the size of her breasts. Being a busty sex symbol. she said, was getting in the way of her acting career. But 90 per cent of breasts go in the other direction. with teenage girls sometimes receiving a new pair for Christmas from loving parents.

Another famed devotee of plastic possibilities is Maria Julia Alsogaray, the once-staid environment secretary. Now the proud owner of a remoulded face, she is already said to be planning her next opera-tion, though on what sbe has not yet decided. Maria Julia, who was last year accused of twiddling her thumbs as fires devastated swathes of ancient Patagonian forests, won her 5 minutes of fame when she appeared, practically naked, on the cover of Naticias magazine. The 50year-old environment secretary was wearing nothing but a fur coat.

Ellis and Prescott to untie the giant

Unwinding complexity is the guiding strategy for Australia's multinational, writes Nikki Tait

f you atand back from it all." says John Prescott, chief execu-tive of BHP, Australia's biggest company and its one undisputed multinational, "what's modern management all about?" He barely

management an about? He barely pauses before answering. "It's about unwinding complexity." BHP'a shareholders might be sur-prised to hear that, for all appear-ances suggest that the "Big Austra-need to be an unit of the about the surlian" has multiplied in complexity during the past decade. Ten years ago, it had three main areas of operation - oil, steel and a narrowly focused minerals division - mainly based in Australia.

Today It is one of the world's most diverse natural resources companies, with projects ranging from Canadian diamond mining to the Liverpool Bay oil and gas operation in the Irish Sea. By mid-1995, more than one-third of its A\$30bn (£15.8bn) assets lay outside Australia. Since then, for US\$2,4bn, it has added on the Magma Copper business in the US. Diversification on this scale has

not always meant a smooth ride. BHP's environmental record has been under international attack, notably from Ralph Nader, the US consumer activist. And in Austra-lia, safety standards have been in the spotlight, partly as a result of the underground explosion at the Moura coal mine in 1994, when 11 miners died, and then following sev-

eral incidents at its Newcastle steel-Works during the past year. Even on the financial front, there bave been bumps. Shareholders could hardly complain about long-term share price performance.

ing the past decade BHP has

It is not surprising, then, that Prescott, partly explains the thirdmanagement matters should rest so beavily on Prescott's mind, although when asked whether recent difficulties were indicative of growth pains, be parried the ques-

trying to ensure that it could effecsion . . . a whole raft of new projects that are gradually coming on stream". If all goes in plan, those projects big, diverse and running through to 2000 and beyond - could form the basis of the largest expansion phase in BHP's history. To a considerable extent, they represent new capacity, although there is also an element of production replacement. But gearing up for the commissioning stage has meant that costs have been lumped unevenly and this, claims

the Magma acquisition. The merger has made BHP the world's second largest copper producer after Chi-le's Codelco. Is Magma living up to expectations? Prescott says things have gone well, though "in terms of commercial results it's going to take a while".

He points out that some fairly comprehensive internal changes, announced late last year, went virtually unnoticed. In some areas, BHP actually went against modern

announced that it was appointing Jerry Ellis, the 57-year-old executive in charge of its minerals division, to replace Brian Loton, its non-execu-tive chairman. Prescott, with warm board endorsement, would remain in his current position.

This appeared an unusual move, effectively propelling a more juninr man into the chairman's seat. It also contrasted with events in 1991, when, rather more neatly, Prescott was appointed chief executive after working his way up through the steel and transport operations when Loton, the previous chief executive, moved up to head the board.

Analysts attribute Ellis's promotion partly to the company's age limits on senior positions - Loton is obliged to retire by May next year and to the fact that Prescott is a bit younger than Ellis. Most observers see pluses and minuses. BHP's new chairman will bave had extensive in-house experience, notably of the minerala division, which has become BHP's biggest earner. Also, Ellis's more polished style may be well suited to the chairman's role. The minus is that the board's

internal choices seem to have been rather limited: "You always want two candidates for each job," says one pundit. Still, while BHP grapples with its own management challenges. Prescott is willing to spare a thought for others similarly engaged, including Australia's new conservative federal government. He is convinced Australia's economy could grow faster. He would even aim higher than the 4 per cent growth rate suggested as an upper limit by the Reserve Bank governor.

Bronfman asks shareholders for a

little more time

Edgar Bronfman Jr has asked for a little more time to prove be is tak-ing the family business in the right direction, writes Bernard Simon in Toronin,

The 40-year-old heir to the Seagram drinks fortune has spent the past year putting his stamp on MCA, the Los Angeles-based film, music and theme-park conglomerate in which Seagram bought an 80 per cent stake last spring for US\$5.7bn.

But Bronfman had a sober message for shareholders at last week's annual meeting. "MCA, in terms of pace of growth, will probably take another two or three years before it accelerates as much as we would like it to," be said. In turn, Seagram's beverage business has yet to feel the full benefits of a re-engineering project that has spanned everything from financial management in the optimal number of orange-juice warebouses. Seagram reported a 61 per cent drop in firstquarter income from continuing operations.

However, Bronfman Is determined to confound sceptics who have questioned his ability to stay

its gangsta-rappers. Bronfman has also given the go-ahead for expan-sion of MCA's lucrative theme-park business, including ambitious joint ventures in Florida and Osaka, Japan.

He told Seagram's annual meeting that the best opportunities in the film business these days were nutside the US - in Europe, Asia and Latin America. Critics remain concerned, however, that some nf the MCA newcomers' inexperience in media and entertainment could prove costly, especially on the film and TV side.

Chrysalis chief mixes business and passion

One night last year Chris Wright, chairman of Britain'a Chrysalis media group, was watching his bas-ketball team, the Sheffield Sharks, play the London Towers at Wemhley, writes Patrick Harverson in London.

He was standing at the back of the court chatting with a hystander, but it was the game which kept him nervously transfixed.

For the 51-year-old millionaire. owning a sports team is not an idle hobby hut a passion. He wants to expand bis empire by acquiring Queens Park Rangers, a London professional soccer club, and Wasps rugby union club. Although Wright's £11m plan unveiled last week to merge the two clubs and create a single publicly quoted sports company was well received at Wasps and QPR, there are obstacles. In particular, his plan for Wasps to share QPR's Loftus Road stadium – a key element in his inte-grated sports club strategy – may fail to win the approval of the sports authorities.

However, as founder of Chrysalis Records, one of the most famons music labels in rock, and responsible for building a multimedia empire encompassing television, radlo, films and rock music, Wright's acumen should be an asset The jury is still out on MCA, but to the sporting world. Certainly he has enough money to make his plan work: his stake in Chrysalis is worth about £64m. But while Wright is a genuine sports fan, he will not let sentimentality get in the way of making money. He said of the heretical idea that a rughy team should play at a football stadium: "It's all about hums on seats."

Jerry Ellis, left, and John Prescott: observers see pluses and minuses

quarter downturn. On top of which, be says, the Australian economy slowed, creating cost problems for the steel division. Dressed on other management

tion carefully. From an operational standpoint, Pissues, such as safety stan-Prescott acknowledges, BHP has dards, Prescott, 55, who been in consolidation, moda, joined BHP as an industrial relarecently: "What BHP was doing "tions trainee 37 years ago, admits before the third-quarter result was there are no easy answers. But he refutes the suggestion that there is tively bed down and commis- a link between the pace at which

outperformed Australia's all-share index by 60 per cent, and its all-mining index by slightly more.

But BHP startled analysts recently when it reported a 30 per cent drop in third-quarter profits to A\$223m, compared with market expectations of about A\$300m. BHPwatchers have now abandoned hopes that the resources group will better last time's A\$1.6bn profit (before abnormals) in the year to end-May 1996. Most estimates settle on A\$1.4bn to A\$1.5hn.

maintain momentum, and events like Moura. "If you analyse those incidents,

they baven't occurred in new operations. They haven't occurred in those areas where you'd think we might be stretched. They've occurred in our more established operations," be says.

Still, BHP's venture into uncharted areas in terms of project development is made no easier by the fact that it is also bedding down

Europe's many budgetary hurdles Investors are brave indeed to take France and Germany at their word on Emu

European financial markets have heen quiet over the past few months - too quiet, one is tempted tn say. With every passing week, bond investors have become more and more willing to take the German and French governments at their word regarding qualification for European monetary union. That the markets should be so happy to suspend their usual disbelief is nnteworthy in itself. Whether it is warranted is another

There has certainly been no gen-eral upsurge in the markets' faith in official promises. In the US, bond yields have lurched up with every hint of faster growth, despite the Federal Reserve's repeated promise that this will not be allowed to feed through to higher prices. Investors seem, rather, to be making an exception in the case of the French and the Germans because they judge both to have invested too much political capital in Emu to let it fail at the last hurdles, however daunting these may appear.

The same could not be said a year ago, when French long-term bonds stood roughly one-third of a percentage point above German ones. Prime Minister Alain Jnppe's travails with public sector workers last autumn saw the gap widen to more than one percentage point at the end of October last year. Back then, it was difficult to believe that he would be able to deliver fast enough economic growth - nnd large enough cuts in public spendng - to come close to meeting the Maastricht convergence criteria on budget deficits in 1997.

These days, hnwever, investors seem to be finding It hard to believe anything else. The differen-

tial between German and French bond yields has ahrunk to nought, with French long-term interest ratee even occasinnally dipping below their German equivalents. This kind of market confidence usually proves to be short-lived. Take the early summer of 1993, when some evan talked of the Franc replacing the D-mark as the "anchor" currency of Europe. By August, the constraints of the European exchange rate mecha-nism had to be drastically loosened to contain the plummeting franc,

and the premium on French bonds was back with a vengeance. By any reckoning, the risk that the French and the Germans will not be able to stick tn their exchange rate promises is smaller today than it was three years ago. One wonders, however, whether it is zero.

Recent columns in this space by Peter Norman have outlined the challenges the German government faces in seeking to qualify for Emu. These could yet prove a larger stumbling block to Emu than reducing the size of the French budget deficit. But the obstacles in the way of the latter are sizeable all the same.

Last month France's prime minister announced that the govern-ment was on course to achieve its 1996 budget deficit target of 4 per cent of GDP, down from roughly 5 per cent in 1995. He claimed that a freeze nn nominal central government spending at this year's level of FFr1,552bn (£199.22bn) - which would imply deep cuts in some areas, given antomatic rises in debt service and other costs - would be enough to reduce borrowing by a further 1 per cent of GDP next year, in time to qualify for Emu.

their stride, nther observers may bave been less impressed - not least, the officials at the OECD who e few weeks earlier had been in deep negotiations with the French nver the organisation's revised medium-term economic forecasts, due to be released later this month.

istry memo - obtained by Richard Medley, a prominent US bedge fund adviser, and independently anthenticated by the Financial Times - shows that the OECD initially planned in revise upwards its deficit forecasts for France, to 4.7 per cent of GDP in 1996 and 4.2 per cent in 1997. These compare with its December forecast of a deficit of 3.9 per cent of GDP this year, fall-

The memn details French finance ministry officials' attempts to persuade the OECD to be more optimistic, a common enough event in the history of OECD forecasts. But While the markets took this in the judgments involved were

scarcely routine, for the implica-tion of the initial forecast was that, even if Juppé succeeded in holding central government apending unchanged - a big if, given the likely political opposition to the implied cuts - the deficit next year would still come in a good half-tothree-quarters of a percentage point over target. By all accounts the French man-

aged to persuade the OECD to tone down its "baseline" deficit forecast for 1997 somewhat. But it is worth analysing the reasons for the OECD'e scepticism. The first relates to the govern-

ment's underlying revenue forecasts. As a result of last aummer's tax increases, the voted budget for 1996 sees net tax revenues rising by 7.6 per cent this year. Yet slow growth has already put this estimate in donbt. Revenues during the first three months of 1996 were only 5.6 per cent higher than at the

same time last year. The government only expects revenues in grow by around 3.2 per cent next year, but meeting even this target will depend heavily on economic growth. In recent years tax revenues have persistently risen only about two-thirds as fast as nominal GDP. This means that the latter would have in grow by 4.8 per cent next year to keep revenue growth on target.

Assuming roughly 2 per cent inflation, this conforms with the government's forecast for 2.8 per cent real GDP growth in 1997, following growth of 1.3 per cent in 1996. Yet, to judge by the memo, the OECD economists did not share this optimism, forecasting only 1 per cent growth this year, followed

for growth in the first quarter might mean that the OECD's earlier forecasts are too dnwnbeat. Quarterly GDP grew by 1.4 per cent in the first three months of the year, compared to a 0.4 per cent decline in the final quarter of 1995. Though much of the rise can be attributed to the one-off effects of the December strikes and the cold weather, the government's forecast is beginning to look more plausible. However, the same cannot he said of its promise to eliminate last year's FFr60bn deficit on the state's social security funds during 1996 and 1997. Most private economists are predicting a deficit of at least FFr35bn-FFr40bn this year, or nearly balf of a per cent of GDP. Given his other predictions, Juppé's forecast of a general budget deficit of 4 per cent of GDP in 1996 implies that the government is not expecting the social deficit to be much below FFr30bn-FFr35bn. By contrast, the 1997 forecast

implies that this shortfall will magically evaporate. But Juppé has yet to explain exactly how this will occur. Without further action on this front, the overall deficit will still be at least 3.5 per cent of GDP next year even if all the prime minister's other wishes come true. Investors may well believe that half a percentage point of GDP is

small enough to be fudged, and finance ministry officials in both Germany and France are clearly wracking their brains for ways to do precisely that. Maastricht criteria or no Maastricht criteria, the odds are still that the two governments will find a way to make Emu happen. Yet, with so many hurdles still to overcome, investors are brave indeed to consider it a sure

MANAGEMENT

Wise tending in the jobs garden

The issue of unemployment lies firmly at the top of Europe's political agenda. Thirty million people are jobless. Unemployment remains stubbornly high in France (12 per cent). Germany (10.3 per centi Spain (15 per cent) and Italy (12 per centl: indeed, one in 10 Europeans is actively job-hunting.

10

Most disturbingly, "base" unemployment - that part of unemployment which fails to disappear with economic recovery - has quadrupled from am to 20m during the past two decades. Even though Britain's unemployment rate, at 7.8 per cent, is below the European average, nearly half have been out of work for more than a year. In Germany, Britain, France and across the Continent, unemployment is cited in opinion polls as voters' highest concero - with up to 55 per cent calling it the "most important issue facing them personally". Even in the US where unemployment is

below 6 per cent, voter anxiety is at its highest level since the Great Depression. Thirty per cent of Americans say they worry "a great deal" about losing their jobs - a prospect made doubly frightening in the absence of Europe's extensive social safety net. US companies have shed millions of jobs in the past decade in an effort to boost productivity and profits. While America is better than Europe at creating new jobs, only one-third of those made redundant find a new position with equal or higher pay.

National governments can no longer rec-reate the secure, traditional nine-to-five jobs which predominated in the post-war era. Many of the standard economic remedies -monetary and fiscal policies. trade agreements. job-creation schemes - are less effective in an era of intense global competition. The combination of information technology, deregulation, capital mobility and the growing participation of the emerging econom in world trade is producing change on the scale of the industrial revolution.

One of the most visible results is rising unemployment in the industrial countries. with an inexorable shift towards part-time and lower-paid jobs among those who lack the new skills.

"Corporate downsizing" is often blamed as one of the villains of the plece. Companies such as AT&T attract a storm of publicity when they lay off thousands of employees - almost regardless of the circumstances which led management to take those decisions. Paradoxically, It is also the private sector which creates nearly all jobs. But little attention is paid to those companies which are deliberately saving jobs or pro-actively fostering employment.

Over the past three years, the Boston Consulting Group has been studying unem-ployment from the perspective of business, as well as government. BCG has identified a group of successful international companies which have consciously pursued pro-em-ployment policies, while continuing to increase shareholder value.

Two examples of companies adopting measures to boost jobs in the short term are car companies - Volkswagen and BMW. One of the biggest employers worldwide, the car industry has made vast job cuts in the face of new technology and global com-petition. VW, bowever, has been able to improve performance while saving 30,000 iche And BMW chees to him save 2000 jobs. And BMW chose to hire some 3,000 new employees as part of its productivity drive - rather than investing in new equipLinda Bilmes and Konrad Wetzker look at ways that companies have tried to prevent redundancies

> flexible working models for its 58,000 employees. "We use over 200 different work-ing models for flexible working time." says Bernd Pischetsrieder, chief executive. This philosophy was put to the test in 1990 when BMW decided to seek a dramatic one-third boost in productivity at its new plant in Regensburg. Bavaria. The company faced a choice. It could introduce a second shift, which would mean increasing the work-force from 7,200 to almost 10,000 but requiring most of them to work unpopular hours. Alternatively, the company could invest in additional equipment and hire only 1,000 extra workers working a single shift. Assuming depreciation over the standard six years, the annual cost of the two options was comparable.

BMW opted for a second shift in order to improve its production flexibility. It sugarcoated the pill by reducing individual working hours even though factory hours more than doubled, from 40 to 99 per week. Productivity jumped by almost 30 per cent. BMW subsequently introduced a similar two-shift model for its 7,000 workers in Munich, adding bundreds of new jobs.

BMW has been a pioneer in Germany, implementing a degree of labour flexibility that most companies have thus far resisted. The country has 1.2m workers who could be placed on a Regensburg-type shift system. creating more than 500,000 new jobs.

In America, this kind of solution might seem far-fetched. Nonetheless, Hewseem rar-reference. Nonetheless, Hew-lett-Packard, America's third biggest com-puter company, has deliberately adopted flexible wage and working patterns over four decades in order to avoid layoffs among its 99,000 employees. HP has a strict "no redundancies" policy.

To deliver on this pledge, through the ups and downs in profitability, the firm has used all the traditional solutions, such as redeployment of personnel within the firm, hiring from within, voluntary severance, and retraining programmes.

and retraining programmes. But when necessary, HP adopts "flexible measures". In 1970, the company's US employees had every other Friday off with-out pay. In 1985, for three months, HP closed most US manufacturing and administrative facilities for one to two days per month, requiring 60,000 workers to take unpaid leave, and a forced pay cut of 9 per cent. Individual facilities often close for holiday periods to reduce overtime and running costs. During a recent downturn, the company encouraged employees in the US to take up to six months unpaid leave whilst retaining their benefits and job guarantee. And at its plant in Grenoble, France, HP used a similar approach to VW, asking workers to reduce hours and wages in order to save jobs.

HP believes that its pro-employee philoso-pby builds loyalty to the company, and makes employees willing to work harder during product launch periods.

Rank Xerox has used flexible working arrangements as a way to minimise job cuts. Since 1989 Rank Xerox has permitted flexible days and hours, a "career break" policy, extended unpaid leave for maternity, paternity and adoption, part or full-time leave for education and training and job sbares, Although the company has made

np in office space and equipment. Sales-people will have access to an Oracle data-base using their laptops, but they can work from home, their cars, or customer sites. The main short term purpose of this move, according to Rank Xerox, is to save more than 600 jobs. Over the long-term, the company expects the investment to boost productivity substantially.

Of course, there are situations in which jobs simply cannot and should not be saved. But even here, companies can do a great deal to ease the transition of former employees into new jobs. One of the best known examples is Pilkington Glass. Competition, technology and productivity improvements led to massive restructurings; employment fell from 18,000 in 1970 to just 4,000 by last year. On its own initiative, Pilkington set up a trust which sponsored job creation schemes offering financing. advice and office space. It assisted in nearly 1,900 start-ups, which between them created 15,800 jobs. In Germany, such initiative is rare - but

it does exist. In 1992, when AEG-Olympia ceased production at its 2,000-person typewriter plant in Wilhelmshaven, the company paid to convert the former site into a technology park. Technology Centrum Nordwest (TCN) opened in January 1993. initially providing office space for 14 start-up companies which employed 900 for-mer AEG workers. Those who joined the new ventures received two-thirds of their severance pay, with the remainder being invested in their business.

The TCN is now home to 31 companies which employ more than 1,500 workers in light industry and services. Holger Ansman, general manager, attributes its success to the speed and flexibility with which it can renovate office space and he expects to generate more jobs this year. "When there are 2,000 workers here then I will feel that f have done my job," he says.

Apple Computer Europe also tried to pro-mote new jobs when it was forced to lay off staff. In 1991, Apple decided to integrate marketing and management of its European operations into its US divisions. This led Apple to halve its headcount in Europe both at its headquarters in France and within each country organisation. Apple provided its former employees with far more options than were legally required. In France, for example, the 300 ex-Apple workers were each offered a FFr50,000 (£6,400) tax-free grant to set up their own companies - donbled to FFr100,000 if the new company helped sell or support Apple machines. Employees could alternatively choose to receive FFr40,000 in training or outplacement services. These options were in addition to generous severance pay, About 15 per cent of former Apple France

nployees chose to set up their own companies, most of which are thriving. It is esti-mated that the new companies now employ close to 300 people. "Apple did a good job. It was a generous plan, and it was innova-tive," says Zepur Blot, treasurer of the Apple Employees Council, who beloed negotiate the package for the workers.

Many other companies have quietly made a substantial contribution to easing the unemployment problem. The measures described here cannot solve the structural problems which underlie Europe's job crisis. But they keep hundreds of thousands of workers off the unemployment register and belp many make the transition to new jobs.

Dyslexia

Ann Rich, who had spent several years working in the lending department of a small branch of Midland Bank, found that her difficulties with spelling were highlighted when she moved to a new position. The job involved responding to customers' letters - a task in which she struggled. "I had bad an excellent secretary in my former job, who corrected my spelling mistakes, but in my new post I was in the front line and I was making errors," says Rich

.The bank's equal opportunities department suggested she undergo an assessment. It was found that she suffered from dyslexia - a disability which affects the way in which the brain processes information. As a result individuals can experience a range of difficulties, for example in reading, writing, sequencing ability and organisational skills. Between 4 and 10 per cent of the UK population have some degree of dyslexia and around 40 per cent of these to the extent that they would benefit from some kind of assistance. Many people with dyslexia fear discrimination should they reveal their disability to an employer - although those substantially affected by dysieria will be now be covered by the Disability Discrimination Act which makes it unlawful for an employer to treat a person less favourably because of their

disability. Liz Brooks, director of the Dyslexia Institute, which assesses and teaches dyslexics, says many employers do not understand dyslexia and may be unsympathetic. A recent survey by the institute showed that only 20 per cent of ber students had their fees paid by their employers, "Unfortunately, it's an additional cost nn a business," she says. Rich was fortunate in thet ber

"Dyslexia is very much a hidden

disability. But if employers take a positive attitude to disability

generally this should encourage people to seek help and ultimately improve their work performance, which benefits the employer as well as the

individual."

opportunities director and vice-president of the British

bolder, the regional government of Lower Saxony, pressured VW's management to find an alternative solution,

The company's problem was how to get over the slump in demand for cars which it expected to last for two more years. It came up with a plan to pay less and employ workers for fewer, but more variable, hours saving 30,000 of the 38,000 jobs and Increasing VW's flexibility. The other 8,000 were lost gradually through attrition.

The company introduced a four-day, 28.8hour week as its basic "working model" for the majority of employees, with overtime (if worked) paid at one-and a half times the base rate. This cut the average worker's pay per ceat gradnally ramped up their bours and wages, while those close to retirement gradually decreased their bours. The cost of keeping the workers for two more years proposed to cut its 108.000 workforce by 38.000. But the company's leading sharewas cut to a level comparable with firing

By 1995 the market picked up, but VW's overtime bill soared. Management responded by raising the number of "standard" (non-overtime) bours per week to 38.8, including 12 Saturdays per year. This cut the cost of overtime substantially. Firstquarter 1996 was the best first quarter in

them. It also gave VW more flexibility.

the company's history - and VW began hiring 1,000 new workers. VW is a special case. As its main shareholder, Lower Saxony would have incurred more than DM450m (£196m) in unemployment costs as a result of the proposed layoffs and would have lost a further DM1bn in tax revenues. Few shareholders have such a stake

The VW story is a tale of Germany as well as cars. In 1993, after four years of declining sales and mounting losses, VW

less, because it had such a strong incentive to do so, VW lound a better plan - which redundancies, Rank Xerox is currently also left the company well-positioned to spending £6.4m to equip its salesforce with cope with the current upturn in demand. BMW has built its success in part on

To save costs and thereby avoid further

An article on companies that have created new jobs will appear next week.

Dyslexia Association, says: The authors are managers at the Boston portable workstations. This will save on the Consulting Group. one-third of personnel costs which are tied

Prime minister to do job share?

ow many jobs can you think of that do not lend themselves to job sharing part-time or flexible working? Every company in Britain should be anxiously asking itself this question following last week's news that publishers IPC paid £35.000 in compensation to a female employee who was refused a job share after her second baby was born. The onus will now be on the company to come up with a good reason for refusing to let any woman (unfairly, this does not seem to apply to men) work anything other than full time.

But when I asked the question to a (male) colleague be insisted that nearly all senior managerial jobs could only be performed by dedicated full-time employees. Any job that involved planning and meetings, he said, needed the continuity of a single person. In bis view, part-time and flexible working was for wimps and juniors.

I told him that be was living in the dark ages, and that there was tive, and so should be able to sobdi-

۰.

not a single job which could not be redesigned to accommodate flexible working. There was no reason why the chief executive's job at ICI should not be split in two, so long as the two incumbents got on together. Neither. I argued, was there any reason wby the prime minister himself should not do a sbare. The only position that did not lend itself to flexible working was that of a dictator. You can't see Saddam Hussein taking kindly to that sort of thing.

Possibly 1 was overstating my case. However, the main point stands that most senior management jobs could be performed by two people. Now that companies are meant to be run as teams with shared decision making, it must be possible to enlarge those teams to contain part-time workers. It may be claimed that you can-

not split a dynamic leader in two, but most companies have already been successful in spliting up the roles of chairman and chief execuA ST Lucy Kellaway

vide the jobs further still.

That at least is the theory. Yet every time 1 get a glimpse of real corporate life, I am reminded that the popular vision of empowerment and teams is a fiction. Like it or not, power still sits firmly at the top. The latest evidence that the autocrat is alive and well came in last week's Mori survey commis-sioned by the Financial Times and the Economist This showed that instead of

spending their energies coaching and mentoring their teams, the

CEOs of Europe's biggest companics spend their time fusing over the company's business travel bill, and worrying about which new tele-phones to buy.

If Mori had asked the same people whether their company operated as a series of empowered teams, I bet every single one of them would have said "Yes, absolutely". But wby is it that teams somehow seem to peter out at the top of companies? Could it be anything to do with the fact that everyone else in the supposed team has their eyes on the top job, and is busily pursuing their own agendas? Empowering the workers is one thing; but persuading the chief executive to part with power is more difficult.

Communism is dead; everyone is a capitalist now. We all believe in the market and we all know that competition is the engine that keeps the market running.

So I'm not sure what to make of a bittle card sent out by CoCensys, a Californian biotechnology company, to update its mailing list. It asks you to put yourself into one of vari-ous categories which include "competitor/comrade". Comrade? Are we to assume that in California competition is becoming a dirty word; that soon businesses will start claiming sincere fellow feeling for their competitors?

I would dismiss the matter were it not for the latest management book being hyped in the US. Called Co-opetition, and written by a pair of business school professors from Harvard and Yale, the book claims to be "a revolutionary mindset that

combines competition and co-operation". And what does that involve precisely, you may ask? In the yards of testimonial sent out by the publishers (Tom Peters among others praising the volume to the skies) the book is described as "holistic, relational, contextual, and nourishing with a winning outcome for those involved". I'm looking forward to reading it.

A word of advice to David Quarmby, the new head of the British Tourist Authority: please don't refer to Britain as a "product". I know it is your unhappy job to try to sell our land to coachloads of foreigners, but this ugly jargon is not going to help the cause. You are not at J. Sainsbury any more, and Britain is not a can of baked beans. Products are manufactured; moreover, they are something that we in Britain are no longer very good at making. So let's not confuse the

issue: Britain is a country.

Dyslexia is still not widely recognized. Diane Bartlett, who coached Rich, tells of nne of ber clients who was written off as lazy and disorganised. He was sent for an assessment by his employer and his disability was identified. "His work situation then began to change as his problems began to be anderstood," says Bartlett. She admits that a few of ber clients have suffered after

> admitting their dyslexia to their empinyers. She knows nne man who was demoted after the disability was diagnosed. She advises clients to think carefully about how their employers might react to being told their employee has dysiexia. "It is important that the employer is made to understand what dyslexia is. It has nothing to do with intelligence and it can be helped."

11- 3. A

apore's minister for home affairs. Wong was one of 69 students on the LBS MSc degree, which was soon to be renamed the MBA. Only 16 were from outside the UK and only six were women.

The class which graduated in 1979, the year Margaret Thatcher was elected prime minister, were probably the last of an era, according to Janette Rutterford, now professor of financial management at tha Open University Business School. A student herself on the course, she recalls her peers as an eclectic hunch, very different from the image of the MBA students of the 1980s - mooetarist followers of the Thatcher creed.

David Norburn, course director at the time (oow director of the management school at Imperial College London), concurs. "You didn't go to LBS at that time unless you were slightly odd - in the nicest possible way."

As the students graduated in the summer of 1979 Margaret Thatcher had already moved into Downing Street, heralding a sea-change in British political life. 1979 was also the year of the Islamic revolution in Iran and the declaration of independence by Zimbahwe. Ridley Scott's film Alien was pulling the crowds at the box office, punk rocker Sid Vicious died of a

don was a mechanical engineer hefore joining LES. Like many MBA students he developed an interest in consultancy during the course and today he is vice-presi-

dent of Gemini Consulting. For Gordon, money was the deciding factor. As he came to the end of his course he was offered a job in manufacturing in the UK which paid £8,000 a year or a joh in consulting in the US which paid \$30,000 (£20,000).

Consultancy and hanking were the routes taken by Julian Day when he grad-

uated. A former management trainee in Smiths Industries with an Oxford degree in classical Japanese literature, Day worked for McKinsey and Chase Manhat-tan Bank, as well as for his own consultancy, before landing his present job as chief financial officer at Safeway in San Francisco.

والمتعادين والمتحادين والمتعاصين والمتعادين والمتعادين والمتعادين والمتعادين والمتعاد

And Timothy How, who was involved in making fire-fighting equipment for Dunlop before he travelled south for the LBS course, also fled from manufacturing on graduation. He opted for marketing, with Polaroid and frozeo food specialist Bejam. and today is managing director of Majestic Wine Warehouses, which has 58 retail warehouses in the UK

For others it was the UK recession of the

1990s, not the boom years of the 1980s, which have left their mark. At St lves, in Cambridgeshire, John Lambden runs his own business. Sporting Antiques. He recalls the bad times of three years ago with real horror. In the event, his experience at LBS, he says, "was the difference between survival and noo-survival. I wouldn't have stood a prayer without it." The things he learnt on the LBS course have proven as relevant in government as in commerce, Wong believes. "The course taught us to look at the total business environment of a company. That is not

unlike what we do in government - we have to look at the total environment." For Ramesh Vangal, who went to LBS as an engineering graduate from India with

no work experience, the incisive lessoo he took away from the course was that husioess is about simplicity. "It's all about making money.

Vangal has been president of PepsiCo Foods Interoational in Singapore since 1994, with geographical responsibility for the company's husiness from Auckland to Cairo. The appointment follows a series of high-ranking jobs with the food company and previously with Procter & Gamble, the company with which he got his first job on leaving LBS.

Vangal decided to go to LBS rather than one of the American schools because, at that time, it was a much smaller. "And it was a terrific deal. The tuinoo fees were just £900," he recalls. For many of the

British students, on government research council grants, times were rarely financially hard on the two-year course. "I really doo't remember any great bardships," says How,

11

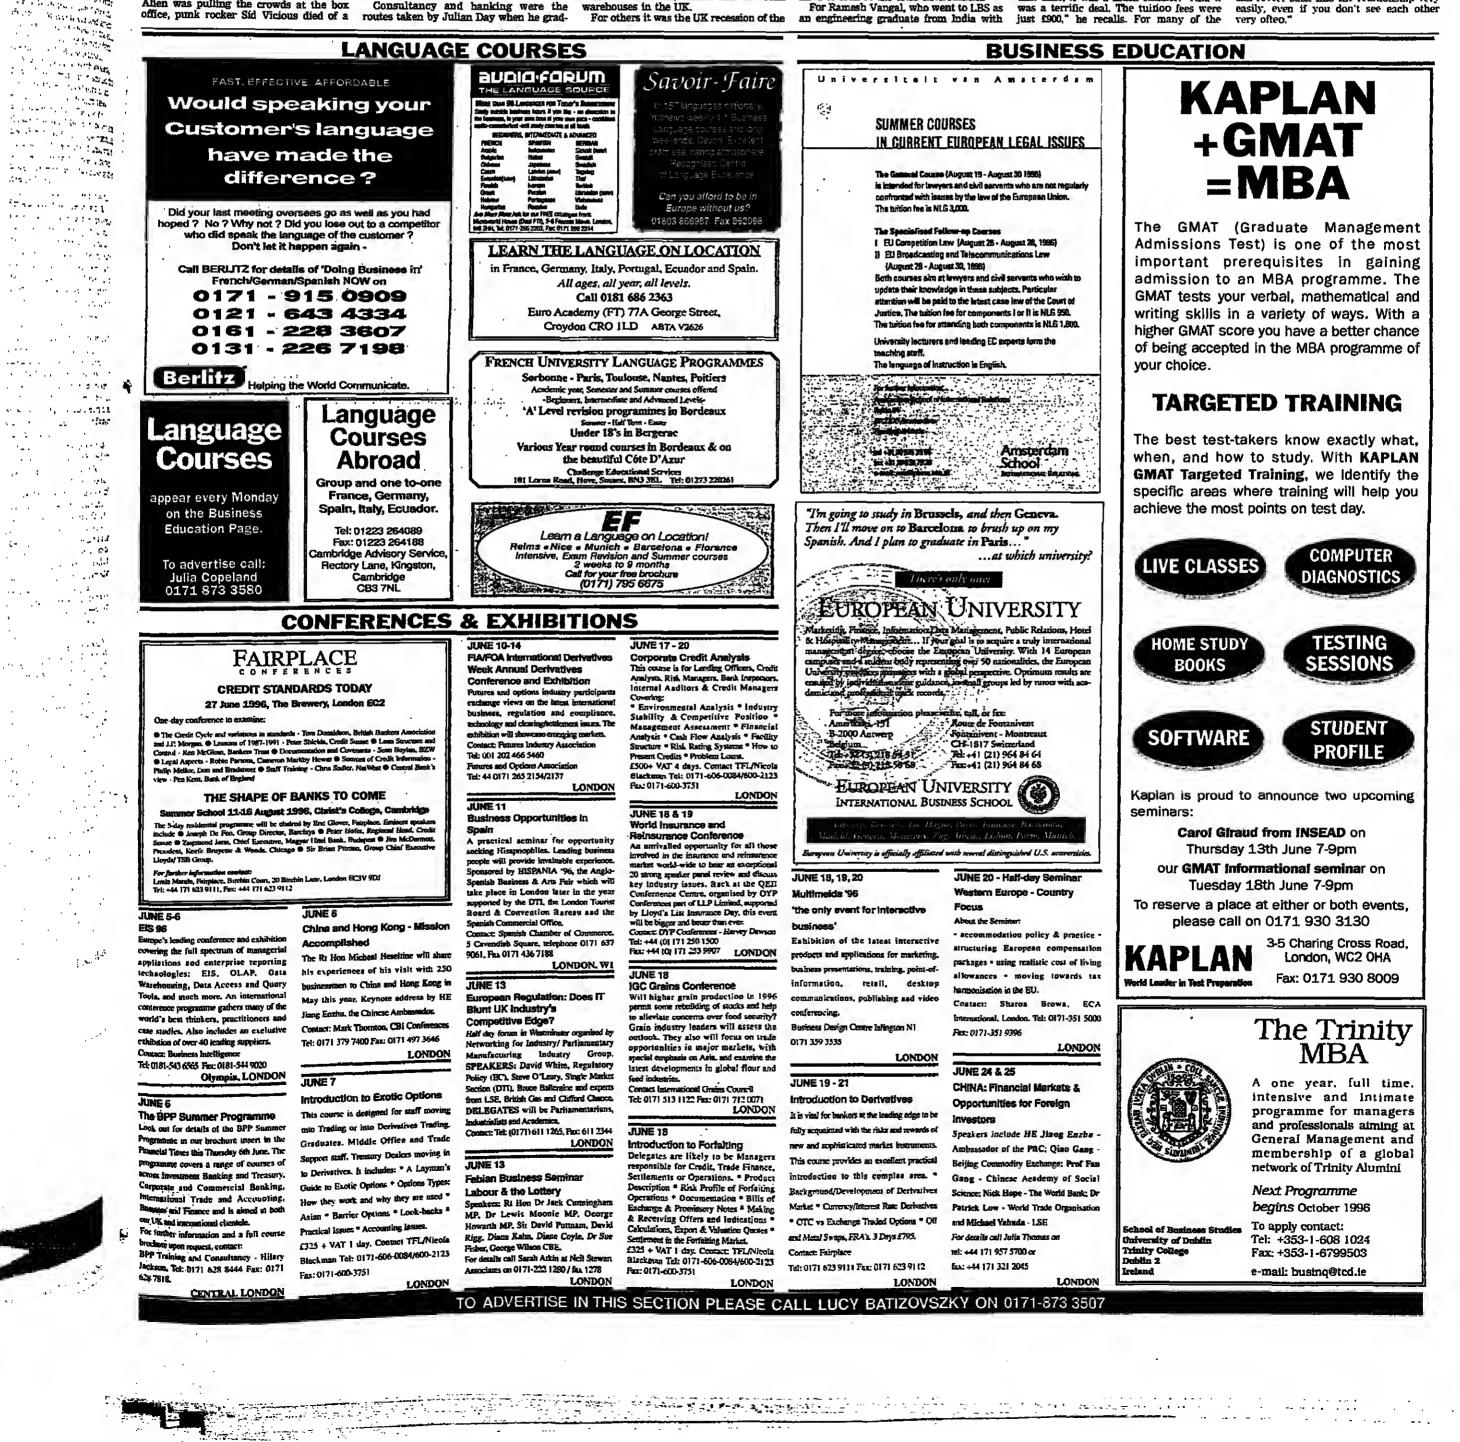

While many of the students look back at the course with affection - "It was the best thing I ever did", enthuses Gordoo some found the first few months particularly bard. Wong, for example, had to leave his wife and small children in Singapore for the first term and was particularly miserable. Lambden says he hated the first two terms. "I occurly died. The statistics were nightmarish. There were other people around who were prohably struggling just as much as me, though."

David Heslop, now managing director of Mazda cars in the UK, weot straight io LBS with a degree in biochemistry at the age of 22 - one of the youngest students ever to do the course. The downside for him was that be was unable to to bring any work experience to the course. As a result, when he later worked for LBS interviewing students who waoted to study for the MBA he says be was particularly tough on those who applied with no work experience.

Studeots recall a high level of class participation and discussions as intense. "I can remember we chewed up two lectursays Lambden. For most graduates the real beoefits came from the interaction between students. "It was the project work we did with colleagues where I learnt the most," says How.

The social perspective of the course was very strong, says Lambden. "About half the year were regular social animals. They were not there purely to work," he recalls. "There are still 20 or 30 people i'm still delighted to meet and have a drink with." Heslop agrees. "It's a bit like trench war-fare," he says. "If you've been working

logether so intensely for two years you can revert back into the relationship very easily, even if you don't see each other very ofteo."

SPORT

Punters queue for Magic Stretcher

Keith Wheatley on the boost that Euro 96 promises for the UK's betting industry

Steve Lawrence's study is filled with football magazines and files full of clippings on soccer teams from Turkey to Romania. When England kick off against Switzerland in ondon on Saturday at the European football finals - it will be the start of the most intense period of Law-

rence's working life. Steve (not his real name) is a professional punter. After a lengthy conversation I still wasn't sure whether he liked football, but he certainly knows a lot about it. "It's like anything in the finan-cial world. You have to read up an awful lot before taking a position," he said, in a cultured Scots accent to match any Edinburgh banker.

How many goals do you think will be scored during the whole of Euro 96, which runs from June 8 to 30? Sporting Index, the specialist in sports spread betting, says 72-74. Steve thinks that is way too conservative, and has "bought" goals at £2,000 apiece. He hopes to win £2,000 per goal for every goal above 74. The worst result has to be a total of only 60 goals. That's going to cost me about 25 grand if it happens". (He says he could live with such a loss).

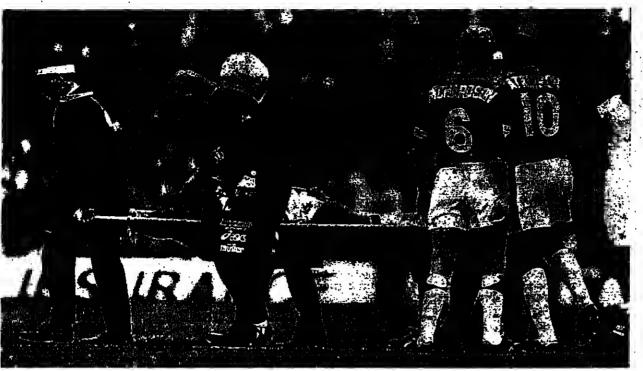

Across Europe, in betting's trenches, rival armies of punters and bookmakers are limbering up for the big one. To most are impering up for the big one. To most sports fans, Euro 96 will be about "the beautiful game" - or "spot the yob", depending on how they regard soccer. For the UK gambling industry, it looks like three weeks of bot money.

'It will be the first time that any British sporting event has attracted a bigger turn-over than the Grand National [steeplechase]," says Graham Sharpe of bookmakers William Hill. His firm is predicting that UK punters will bet an overall total of between £75m and £100m. Sharpe believes that betting has become

a much stronger part of British culture in recent times. (I agree, though despite the role of the UK national lottery in promoting overall gambling turnover I refrained from using the dreaded L-word in front of a bookie).

The current passion - or fashion - for soccer will no doubt fuel the punting fervour. "If you're going to sit and watch Bulgaria play Denmark, the only real reason to get involved in the game is if you've got a fiver on the match and become an honorary Bulgarian for the day," says Sharpe,

Most bets will be of the pin-money variety, light years from Steve Lawrence and his war-chest. "The biggest part of it will be fivers and tenners punted on impulse," says Ladbroke's spokesman, Paul Austin. "Football betting has grown enormously in the last four or five years." Ladbroke bas paid the English Football Association

Rough business: punters are invited to predict how many times a stretcher will be sent on to the witch

"modest" fee to become official bookmaker to Euro 96, which, in Austin's view, "will generate more money than any other event in British betting history." His confidence is based partly on experi-

ence of the 1994 soccer World Cup in the US. The UK public staked about £60m, despite there being no domestic UK involvement in the finals of the competition. Austin says that betting on football has grown at least 10 per cent a year since the World Cup finals in Italy in 1990. With the recently finished English Pre-

miership race going to the wire (Manchester United pipping Newcastle United for the title), 1995-96 was a particularly good season for the bookies, who maintain they have become part of the pyschology of the game. "Our switch from rating Newcastle as favourites to win the Premiership to Manchester United was a crucial moment

in the final days," says Austin. So far, £5,000 on Germany to win is the biggest single bet Ladbroke has taken, but on past form plunges of £10,000 and even £20,000 will be seen as the tournament progresses. A few happy punters with great foresight and imagination are already sitting on significant ante-post (pre-tournament) positions. In fact, William Hill says it is facing a

coup even before Saturday's kick-off A single bettor will win at least £200,932,60 if Holland, Germany, Italy or Spain win the

championship. A mystery investor - well, nobody knows his name - walked into a William Hill betting shop in Folkestone on April 2 and made four separate nine-event accumulator bets for a total outlay, including betting tax, of £511.21. Each bet contained eight identical selec-

tions - all of which have proved success-ful. They were (with odds in brackets): St Helens to win the rugby league Challenge Cop (1-4), Glasgow Rangers to win Scotlish soccer's Premiership (1-7), Dunfermline in Scotland's Division 1 (11-8), Sunderland to win English soccer's Division 1 (1-5), Preston to win Division 3 (8-15), Mark of Esteem to win the English 2,000 Guineas horse race at Newmarket (7-1), Bosra Sham to win the 1,000 Guineas (5-2) and Manchester United to win the English Premiership (4-7).

Each of the four bets ends with a different Euro 96 selection: Holland at 9-2, Germany and Italy at 5-1, and Spain at 7-1. "We don't know much about this punter other than that he knows his sport, stands to win the biggest pay-out of the year so far and that he doesn't rate England and Terry Venables' chance of winning Euro 96," says Graham Sharpe. Neither do many other fans, perhaps reluctant to put their money where their hearts are. "We haven't taken a bet on England to win since their performance [in a friendly] in Hong Kong," says Ladbroke.

For those who find the worries of form or patriotism too burdensome, there are plenty of bets that involve far less cerebral or emotional complexity. Sporting Index is finding; huge interest in its Magic Stretcher special. Punters with a taste for the macabre are invited to predict the total number of times a stretcher will be seen on a pitch during Euro 96 (this may not necessarily represent a serious injury, since under tournament rules a competitor must either rise to his feet and play on within 30 seconds of being knocked down, or be stretchered off). Sporting Index offers a spread of 60-64

stretcher interventions. "We're taking a lot of bets on this one." says Wally Pyrah of Sporting Index. "We've got one guy who's 'bought' the stretcher for £2,000 a time, so he's predicting it's going to be a reasonably dirty championship.

I couldn't quite get my mind around the idea of hookies watching a football match and knowing that their profit or loss depended on a few more knee-crunching tackles. But moral hazard comes with the turf. Asking a few bookles how they'd like to see Euro 96 pan out produced this response from Paul Austin of Ladbroke. 'Our best scenario would be England and Scotland in the semi-finals - and both losing - followed by a final we could enjoy without worrying about our liabilities, say Turkey vs Czechoslovakia (sic)."

Local firm excels with scheme for new **Glasgow gallery** Colin Amery on the Scottish city's eminence as a centre for the visual arts

FINANCIAL TIMES MONDAY JUNE 3 1996

t is miles better in Glasgow. The city is streets ahead of many British cities when it comes to planning for the visual arts and architecture.

In 1999 it will be the City of Architec-In 1999 It will be the City of Architec-ture, and preparations are advanced to ensure an increasing public awareness of the importance of the built environ-ment. Until October, Glasgow is running a festival of the visual arts, and is doing so in magnificent fashion.

Earlier this year it opened a new gallery of modern art in the splendid premises of the former Royal Exchange building, at the very heart of Glasgow, while late last month the city's McLellan Gal-leries opened the biggest and finest exhi-bition of the work of local hero Charles Rennie Mackintosh. That important show will travel to New York, Chicago and Los Angeles - it will not be seen in London - and is itself well worth jour-

Last Friday the crowning touch was put on the city's development as a leading European centre of the visual arts by the announcement of the winners of an international competition to appoint architects for the new National Gallery of Scottish Art and Design.

This will occupy the former head post office in George Square. (I have an inter-est: I was a member of the nine-man

The competition was different from many recent ones in that it was, at the final judging stage, entirely anonymous. This meant that the jury was simply presented with fully worked-up drawings identified only by a number.

By a process of careful elimination, No 405 was selected by a majority of the jury. No 405 - an excellent design turned out to be by the local Glasgow firm of Page and Park.

This is a relatively small firm which had been competing against significant international architects, including Mario Botta and Rafael Moneo. The winners' designs for the adaptation of Glasgow's huge 19th century post office are both practical and splendid. The new National Gallery of Scottish Art and Design will bring together the art, architecture and design of the 19th and 20th centuries.

Providing its bid for national lottery cash succeeds, it should play a key role in the intellectual and cultural renaissance of Scotland. Glasgow is so clearly the right place for this venture because

the city itself is not only the largest centre of population in Scotland but the place where the visual arts have flour-ished since the 19th century. Anima in tu natur

Of all the architects in the competition, Page and Park alone understood clearly how the conversion of a great 19th century public building can bring about that fusion of monumentality and modernity that has long been at the heart of Scottish architecture.

Glasgow is the only British city fully developed at its centre on a grid plan. Edinburgh may have more sublime drama in its response to its rugged set-ting, but Glasgow is more like an American city in its dependence on its build-ings for its character.

It is important that their proposals for the civic improvements to George Square are also carried out (especially the reordering of the splendid public sculpture) as part of the national gallery scheme, for the square is the ante-room to the great new interior space proposed by the architects as the heart of the new gallery. The intensely powerful hall of sculpture will provide visitors with a place of classical repose and calm.

I was afraid that the recent over expo-sure of the designs of Charles Rennie Mackintosh would trivialise the huge exhibition in Glasgow, but the show carefully selected and the 300 works do not overwhelm. What shines forth is Mackintosh's genius, and the decorative skills of his wife.

Indeed, to see the reconstruction of the black and yellow hall for the Basset Lowke house in Northampton is some thing of a visual shock, for it is the intensity of Mackintosh's belief in art as the flower of life that is brilliantly captured in this exhibition.

His beliefs and feelings transcend his artistic sources. Look at his furniture which is totally original - there is, a chance in this show to compare it with the work of his European contemporaries, Olbrich and Hoffmann in Vienna. The white and silver wardrobe stays in the memory as one of the outstanding objects of its time.

The exhibition encompasses Mackintosh's later years when he had no design work and he became a brilliant water colourist.

Whatever he touched, he transformed. It is rare for an exhibition to capture the sion of the artist it is showing but passion of the artist it this one does, superbly.

Animal Planet in tune with nature lovers

Raymond Snoddy reports on the launch of Discovery Communications' latest documentary channel

ohn Hendricks loves watching tele-vision nature programmes, and now be will be able to indulge his inter-est 24 bours a day. At the weekend, Hendricks' Discovery Communications launched Animal Planet, which prom-ises to screen "all the animals all the time", on American cable and satellite

excels for new fallery

The channel will draw on the animal programmes of broadcasters such as the BBC, Anglia Television and TV New Zealand. There is also the possibil-ity of launching channel internationally ater this year.

Animal Planet is the latest creation of 44-year old Hendricks, a former university administrator who was besotted by television and who has become a multimillionaire hy broadcasting into wholly commercial markets largely dominated by the sort of programmes be likes watching himself: serious documenta-

"When you walk into a bookstore, half the books are fiction and the other half non-fiction, and fact can still be stranger than fiction," says Hendricks. He first became aware of bow many quality documentaries there were years ago when, as a history major, be used to order BBC programmes from cata-logues for his professor, who liked to use documentaries in the classroom. Hendricks, who has created a business that had revenues of \$452m and profits before tax and interest of \$49m last year, uses all the latest technology to deliver his facts to the world. The company's World Wide Weh site is one of the Top 10 in terms of visits, and provides more than 1,000 pages of edncational material each month as well as an online service which includes digital photographs and downloaded videos, plus personal letters from the field. Discovery is also taking advantage of the launch of digital cable television in

the US in October to unveil four new channels: Discovery Science, Discovery History, Discovery Kids and Discovery Living. They, in turn, could all be turned into international channels over the next two years as digital television and its capacity for hundreds of channels of television spreads globAlready, Discovery Communications claims to be the largest originator of documentary programmes in the world. This year it will broadcast 1,800 bours of original production - about 100 of them at tha high end of the range: programmes costing \$400,000 an hour. Hendricks bas enjoyed becoming a

multi-millionaire by broadcasting programmes that everyone approves of. He says: "We operate in an area that's prosocial. Yet we are a for-profits business and we have been successful, and we have proven that you can make a busi-

ness in this area." In independent research on the per-ceived overall quality of 500 brands, the Discovery Channel came in at No 4 ahead of Mercedes-Benz, while its sister channel, the Learning Channel, was 21st. They were the only broadcasters in the top 25.

Hendricks admits that some people might say thay watch Discovery because they want to be thought intelligent, whereas they are really watching professional wrestling. However, the Discovery Communications chairman and chief executive says that viewing figures are higher than those of Ted Turner's Cable News Network.

"We think we have succeeded when someone watches an hour of Discovery and says 'Gee, I didn't know that'. It just so happens that the people attracted to Discovery are the people that advertisers relish. light broad cast-TV viewers who tend to read a lot," says Hendricks.

At the moment, Discovery is in 67m US homes and in 35m homes in 144 other countries.

Raising the money for Discovery was not easy: Hendricks had three tortuous years in which 211 venture capitalists turned him down and be "borrowed more money than I could ever repay". Then he met Herbert Allen of Allen & Co. the New York investment bank that specialises in the media and is involved in some of the world's biggest media deals.

"Herbert himself wrote the first cheque," says Hendricks, who was then able to persuade New York Life Assur-ance and the Westinghouse Corporation to support him. He had \$3m, and 70

small investors put up a further \$2m. By the time the money ran out and a further \$20m was needed, the cable companies had noticed that Discovery was bringing in the cable subscribers they couldn't normally get to, and invested in the business.

TCI, the largest US cable company, holds 48 per cent through its Liberty Media programming arm. The other main shareholders are Cox Communications of Atlanta and Newhouse, the US media group that owns both cable net-works and Conde Naste, the magazine publisher. John Hendricks owns 3 per cent of the company, including options. In the latest commercial development,

Discovery paid around \$40m for the Nature Company, which has 133 shops devoted to products extolling the virtues of nature. The Nature stores will be used to promote Animal Planet by offering customers \$5 discount chers.

In the autumn, Discovery will launch Its first feature film, Leopord Son, about the life of a leopard cub, and a near-video-on-demand service, Your Choice, offering \$1-a-time programmes. But Hendricks' favourite series at the moment is on the Learning Channel: a 22-part series called Understanding, which briefs viewers on different topics, often science-related.

This message arrived by There was only one prob-lem. We didn't want to live in e-mail last autumn, when I

was trying to find a place to live in California for the win Mani. Oakland, Paris or ter while researching a book. I Toronto; what we needed was had turned to the Internet for a nice house in Palo Alto. help after trying unsuccessclose to bookshops, playfully to arrange a bouse-swap grounds and cafes and a convenient base from which to research the book. There were using a traditional exchange agency. The traditional agencies'

oot many houses like that business methods seemed rudimentary: you had to pay a signing on fee of £50 (\$761 and available for a sbort let, and not many of the owners of those that were appeared to then send details of your want to spend three months bouse to the agency by post. Montbs later, you would receive a shoddily printed in Loodon in the greyest, rainiest months of the year. In the end, money proved the booklet containing brief hest means of exchange. descriptions and addresses for bouses across the world. Instead of trying to find one person or family with whom Sadly, few of the houses to swap, we rented out the looked much fun. Worse. the bouse in London and put that details were too short to be income towards the rental of the bouse in California. But Net-based bouse truly informative, and properties were sorted only by coun-try, not by size or by whether exchange seems to be a busithey were in the city or not. ness with great potential. At Here, it seemed, was a marpresent. it is only a tiny vellous opportunity to use the Net to revolutionise a busiminority of people who take-bolldays by exchanging ness, Essentially, the job of arranging home exchanges is bouses with others: part of the reason for this is the simabout connecting people from ple difficulty of making condifferent parts of the world, tact with them. Why, then, and allowing them to exchange information quickly, cheaply and convehas it not taken off? One reason is the old prob-lem of chicken and egg. Most of the Net-based agencles niently. A Net service, npdated electronically, make a high charge for regis-

seemed destined to put the old tering a bouse, which acts as ageucies out of business a severe discouragement to potential clients who are Hence our decision to sign uncertain about the new ser-

13

up with one or two bouse vice. At present, therefore, exchange agencies.1 cannot aspiring house-swappers wbo even remember which the serare not willing to pay for a vices were: all I know is that they were found by typing high-priced service are reduced instead to the bome exchange or some time-consuming business of such phrase into a Web looking among the unsorted search engine. But during house-exchange messages succeeding months, tantalisposted to news groups. In my ing details would appear in my incoming mailbox. First view the winner in this business will be the company that the ski chalet and the Hong uses the Netscape formula: it Kong house, then a condo in will give away its service for a good long time, in order to increase the size of its net-Maui; then five bedrooms in the Oakland Hills; then a pied à terre in Paris (closest Metro; work and hence the value of Republiquet, then a place 5 hours north of Toronto, with eight telephones, two pianos its service. But there is another obsta-

cle that must be overcome before Net-based house-swap ping becomes a reality, lack of trust. In an old-fashioned house exchange system, the sanction that makes sure people act as civilised guests is the fear that they will be struck off the list in future. At present. this element seems absent from the Net.

But it could easily be intro-duced, the broker could invite its clients to record their impressions, both of other people's houses and of the behaviour of others in their own, for storage on the data base. An aspiring client would then be able to read the "guest book" of a house offered for exchange before deciding to spend a fortnight there. Anxious homeowners would also be able to check on whether someone had a history of leaving lovingly compiled record collections in chaos, or turning down the corners of book pages in people's libraries.

Clearly, there is much work still to do. Yet my feeling is that there are the bones of a great company bere - and one that could soon become as indispensable to the middleclass professional as a Marks & Spencer chill-cooked dinner. How long will it be hefore an entreprenenr tests this bypothesis?

FINANCIAL TIMES MONDAY JUNE 3 1996

Michael Skapinker on the airport business lounge

o my first few seconds on the ski slopes, 1 smashed into a woodeo barrier and tumbled head over heels into the snow. But Tracey Meaker, corporate com munications manager at Virgin

Atlantic, remained encouraging. Tracey bad choseo the easiest option for me oo the ski simulator in the Virgin lounge at Heathrow airport and was kindly oblivious to my inability to manage even this. "Well dooe!" sbe shouted as I successfully manoeuvred my way between two poles about 100 metres apart. Matters became more serious as a narrow bridge loomed. "Just go straight." Tracey said tightly, wor-ried, no doubt, by the thought of hours by my bedside in some simulated traction unit.

I zoomed under the bridge, and a message oo the screen recorded my place in the race against my virtual reality competitors: fifth out of five. in my experience of airport es, I would put Virgin first out of about 55. Its lounge at Heathrow, recently refurbished, has an airy rooftop conservatory and a library.

It is not just the gimmicks which set the Virgin lounge apart: the ski simulator, the putting green, the sound-proofed music room, the hydrotherapy bath or the free massage service. It is the space and the sense of being somewhere other than in a sweaty airport terminal. In this it differs from many husi-

ness lounges whose purpose is hard to fathom. All lounges give the impression that people are fighting to get Into them. Receptionists guard the doors zealously, granting entry only to those with business or first-class boarding passes.

Why should you want to get in? Because in the departure halls out-

side, you are packed cext to people you do oot know, who tread on your toes, wave newspapers in your face and force you to listeo to trivial conversations on their mobile tele-

phones And what is life like inside the lounges? Usually, you are packed next to people you do not know. who tread on your toes, wave news-papers in your face and force you to listen to trivial cooversations oo their mobile telephones. In the lounges, there is also a television blaring in the background.

It is true that in the business lounges, the chairs are padded. There are also free drinks, peanuts and newspapers. But the problem with many lounges is that they are too small for comfort. The chairs are too close together. They are also arranged in squares, forcing you to sit face-to-face with strangers. At least in the departure halls the chairs all face in the same direction.

Ask people wby they want to get into the business lounges and they will say they can do their work there. They can telephone their offices and send faxes. But few people seed faxes from airports and you can make a call just as easily from the telephones in the departure halls - or on a mobile from a corner of the terminal far quieter than the business lounges.

There are sirports so dirty, disor-ganised and lacking in facilities that any business lounge, no matter bow crowded, is a welcome escape. But there are many others in which the departure halls are more pleas-

100 ~7 要 **Ļ** I'M SORRY MR. SANDERS BUT YOUR KIDNEY DONOR CARD WILL NOT GET YOU IN ..

son south a

ant than the business lounges. Schipbol in Amsterdam offers diversions like virtual reality golf to everyone, not just those in business class. Changi in Singapore has acres of brightly-lit space; the Sing-apore Airlines business lounge is also large, but crowded and gloomy. The real reason people want to get into the business lounges is because so many others are kept out. It must be a privilege worth having, otherwise why are most travellers denied it?

So eager are travellers to escape the hordes outside that they will pay a fee to get into a business

Priority Pass says it can get you past the receptionists in 140 lounges. All you have to do is pay \$99 a year and \$21 every time you use a lounge. The company says it has over 100,000 members. You can find them in the business lounges in Barbados, Bologns, Boston and Brussels. There they sit knee to knee with all the other business lounge residents: all pampered, all privileged and all wondering why they are not happier.

A man can be able to specified by and

Pleasant moments on A dubious privilege the softer side of Sofia

The exchange rate display in the lobby of the Inter-Continental hotel in Sofia spoke volumes. The Bulgarian lev had plunged by 25 per cent in two days. In Sofia, it pays to

hang on to your hard currency. But hang on to it tightly. Bulgarian thieves are no respecters of place or status. In the crypt of Alexander Nevsky cathedral, a colleague turned to find a woman rummaging in her handbag. And it was reported that an IMF negotiator, in town to help the government out of its eco-numic crisis, had her bag snatched in a restaurant.

Dinner-table chatter still centred on an extraordinary second half in the Bulgarian cup final, a few days earlier, when the Levsky team, losing 1-0 to Slavia, walked off the pitch 15 minutes from time in pro-test at an alleged fix, leaving the crowd to chant "mafia, mafia". A new interior minister had just

been appointed to replace Lynbomir Nachev, who resigned after being filmed talking to contestants in a beauty contest when many felt he should have been investigating tha shooting of three policemen by extertion suspects.

Such dark happenings, officials insist, rarely affect visiting business people. But petty crime clearly can. The pace of reform has faltered since the heady days of the demo-

cratic restoration, but things are not all bad. Sofia's energetic mayor, Stefan Sofiansky, promised to do something about the dire, potholed state of its roads when spring came - and kept his word. But the city still wears a neglected look and, as summer arrives, again faces a water shortage. Last summer, supplies were often cut off for all but two

hours a day. The airport badly needs replacing or refurbishing, but according to Assen Dyulgeron, financial adviser to Sofia's municipal authority, land acquisition has been frustrated by arguments over restitution rights. Buying a gift to take home can be tricky. The weekend I was there, an increase in interest rates to 108 per cent steadied the lev but sent the price for an amber necklace at the

open-air Russian market from \$40 on Saturday to \$70 on Monday. Buy a business contact a shot of Johnny Walker Black Label, say, and you cannot be sure of getting the real thing. One hotel manager told me: "Fortunately, they're such good copycats that only a true con-noisseur can tell."

The flip side of all this is that hotel rooms are usually not difficult to find. The 450-room inter-Continental (ask taxi drivers for the Vitosha, or they won't know what you mean), operates at about 40 per cent occupancy. It has a splendid sports centre, with a large swimming pool and exercise machines, and has five restaurants, including the only Japanese eaterle in the Balkans, and Window on Sofia, where diners are antertained by a young jazz trio that deserves a wider audienca.

The 155-room Sheraton, in the town centre by the 4th century Byzantine church of St George, is 50 per

the second research second

cent full on average. On fine days its Wiener Café terrace is an excellent place for a light lunch.

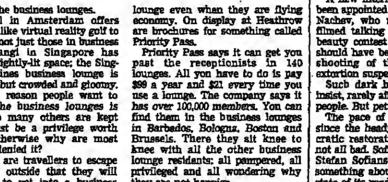

In the five-star category, competi-tion from Hilton has been delayed, Ground was broken for a new botel but the project has gone no further. The four-star market remains largely untapped though two new hotels on the fringes of town, the **Krankov** and the Ambassador, have

started to fill the gap. The slow build-up of husiness activity in Sofia has limited the spread of up-market restaurants, apart from those in five-star botels. One notable newcomer is 33 Chairs, named because that is the number of people it can handle. Popular with the diplomatic community, it has tables inside or in a lovely courtyard, but the cooking and ser-vice exemplify the uncertainties of an emerging free economy. Against that you would be hard pressed to spend more than £15 a head.

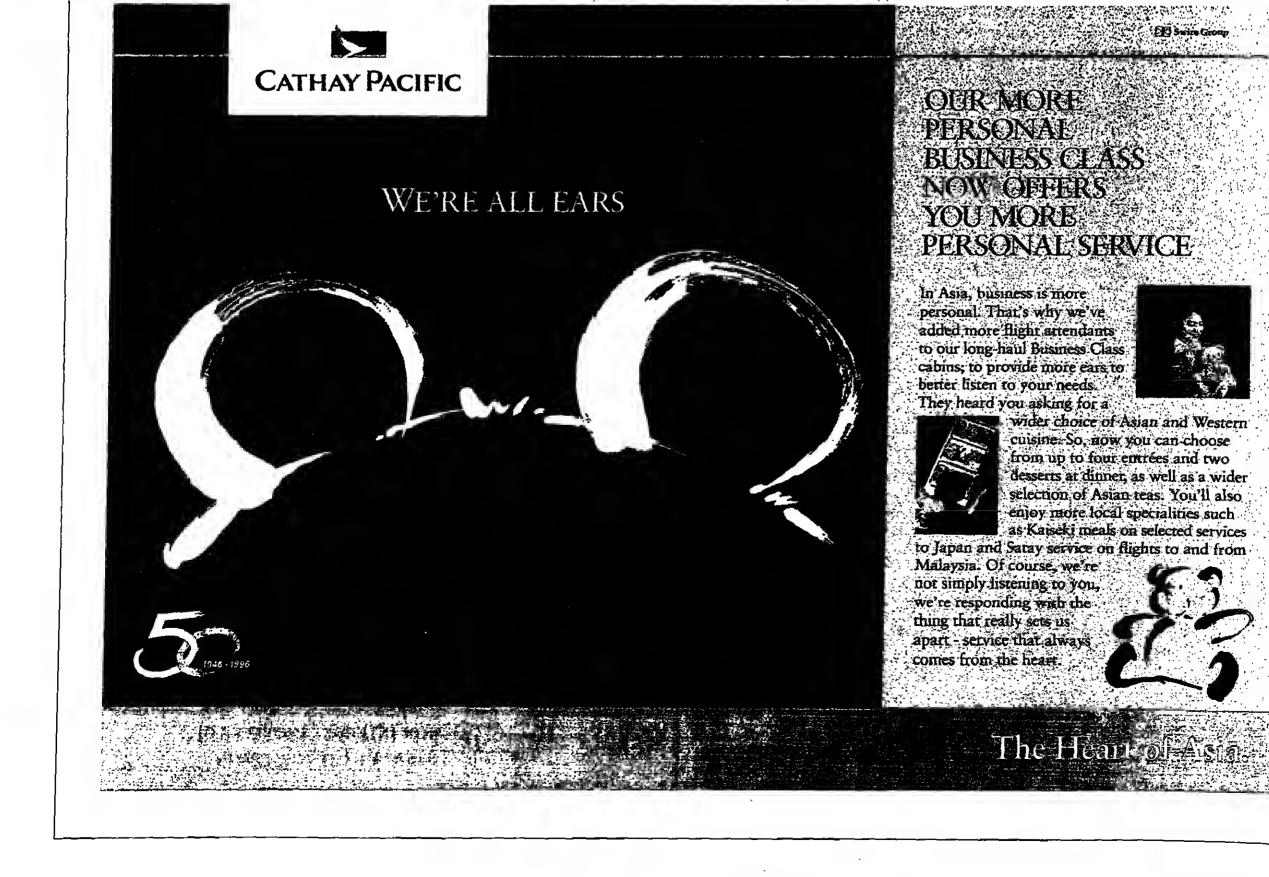

For all the country's prohlems, doing business in Sofia offers pleas-ant moments. When the sun shines, café society blossoms. An al fresco espresso can cost a mere 10p. Bulgarian wine has improved greatly, (in one shop I found Cabernet Sauvignon "bottled for Sainsbury's").

And if you are stuck there over a weekend in winter, the Inter-Continental can organise a day's skiing at nearby Vitosha, or more distant Borovets, with equipment and ski suit hire, lift pass and transport all included for \$100 or less.

> Obituary Tamara Toumanova

amara Toymanova has dieil at the age of 77. Known as the "Black Pearl" of the ballet, Toumanova was one of the "bahy balle rmas" who created a sensation in the revived Ballets Russes companles of the 1930s. She was born in a railway train near Shanghai in 1919 when her parents were fleeing Russia.

Her great gift for dancing was revealed early on. At eight years old she made her debut at the Paris Opera in the children's ballet L'éventail de Jeanne, after studies with Olga Preobrazhenskaya,

She continued with this illustra ous teacher until she was engaged by George Balanchine as one of the three child dancers who were the stars of the revived Ballet Russe de Monte Carlo which came into being in 19:2

Unforgettable in the roles Balanchine made for ber there - potably in Cotillon - Toumanova followed Balanchine when be left the Ballet Russe to form Les Ballets 1933, for which company she danced further leading roles.

With the failure of this troupe after seven montbs, Toumanova rejoined the Ballet Russe and became one of its most celebrated artists during the 1930s.

She also danced in musical comedy, appeared with a rival Ballet Russe company and made her first film - Days of Glory - in Hollywood in 1943. In the following year she married its producer, Casey Robin-

Thereafter Toumanova was to become a guest with several major ensemble

Notable among these were Ballet Theater and the Paris Opéra where she created roles for Balanchine and for Lifar (his Phedre) the Ballet of La Scala, Milan, and the Grand Ballet du Marquis Cuevas. With the Festival Ballet she made an unforgettable impression by her dramatic and technical bravura in an otherwise unremarkable staging of La Esmeralda. Toumanova continued to make films - Tonight We Sing and Invitation to the Dance; Hitcbcock's The Torn Curtain and Billy Wilder's Private Life of Sherlock Holmes - and also to tour with a concert programme in which she was partnered by Vladimir Oukhtomsky. Toumanova brought to ber every interpretation a magnificently assured technique, and a physical glamour typified by Arnold Haskell's description of her as the "Black Pearl". After retiring from dancing, sbe continued to live in Hollywood with ber devoted mother. Her latter years had been much shadowed by renal disease.

Novel approach to classics

Jackie Wullschlager discusses what are proving to be successful transfers from page to stage

new play leaves an auditorium empty these days, while a new adaptation of a novel, from Alan Bennett's The Wind in the Willows at the Olivier to Wuthering Heights in Eastbourpe, packs a 700-seater every night.

13

15 C H

1 7

This week, the novel-as-play stakes are raised. The most imposs ble book to dramatise must be War and Peace, which is previewing at the Cottesloe, and was sold out even before telephone bookings began. Another heavyweight, Thomas Hardy's Jude the Obscure, opens on June 10 at the Lyric, Hammersmith. Jane Austen's Mansfield Park is at the Chichester Festival, Northanger Abbey comes to Greenwich, Lady Chatterley, with nude simulated sex, has just ended at the Cockpit Theatre, and Cliff Richard is to star in Heathcliff, the musical, next year. Can such ambitious adaptations work, and why do we love them so? Blockbuster adaptations, like the RSC's Les Misérables, are traditionally hits, but novels-as-plays have recently become a staple form of popular theatre. They have made the names of two of our most daring companies, Shared Experience (Mill on the Floss, Anna Karenina) and Method & Madness (Emma, A Handful of Dust).

Adaptations work on hig stages or small, with large casts or tiny, with infinite doubling and tripling of roles, and so they have kept box offices happy across the country. They also celebrate our culture's new romance with the classics. "People like to be told stories, and there is something solacing about the 19th century - its novels have such wonderful, juicy stories," says Mike Alfreds, founder of Method &

Madness and director of Jude. Until Oscar Wilde in the 1890s there were no important Victorian dramatists, and Alfreds' theory is

Cinderella: a choreography by

"I tried to place the emphasis on

that "a lot of novelists were p pnt on stage.

"They wrote drama that's read rather than drama that's seen - it'a very visual, they describe the lighting, paint pictures of people, Dick-ens says things like 'Mr Guppy enters left'."

Alfreds is drawn to the richness and complexity of novels - "plays aren't like that" - and the opportunities they give for innovation. His Jude has a cast of four, and through close-ups of Hardy's sexual pairs distils the themes - "relationships: what is the best way of living together, should yon get married or not, single parenthood" - which Alfreds feels give the novel resonance.

The key is to reinvent a book theatrically, rather than worry about the integrity of page-to-stage conversion. Novels-as-plays are an exciting instance of cross-fertilisation in the arts because theatre builds on the new sexiness of clas-

sics created by screen adaptations such as Pride and Prejudice, but stakes out its own territory.

Television thrives on nostaleia costumes, spinning plots over many episodes. What makes theatre adaptations powerful are compression and emotional intensity. On television, says Helen Edmundson, who adapted War and Peace for Shared Experience, "you can just tell the story, but a play has to open the subject up, ask questions".

Sets are minimal. "No coaches or cannons 'nowhere to hide " save Richard Hope, who stars as Pierre, "we ask the audience to bring their imaginations with them." Hope's challenge as the introspective, doubting hero is "to bring in someone's conscience in a theatrical way

My only criterion of whether a play works is if I feel emotionally engaged," says Edmundson. She

The debt timebomb

The US is better placed than its competitors, but still needs to ease the budgetary strains caused by an ageing population

The US is facing the worst debt crisis in its 20-year his-tory. If nothing is done, the ratio of debt to gross domestic product will rise to 300 per cent or more, making the debt spike of world war two look insignificant. As the debt spirals upwards, foreign investors will dump US assets. Share and bond markets will crasb, sending the dollar into a tailspin. And the real economy will enter a contraction of a duration and severity never previously experienced by Americans. I found this chilling progno-

sis not in a racy Wall Streef circular but in the latest economic report of the noupartisan Cougressiooal Budget Office, an organisation not given to overslatement. The CBO does not expect such a catastrophe to occur, but it is evidently concerned that Washingtou policymakers are not yet focusing on the fiscal consequences of an ageing

population. The failure of Bill Clinton and the Republicans to reach agreement on balanciog the budget by 2002 has prompted vawns rather than alarm because the debi threat seems to be easing of its own accord. The deficit is expected to drop to ooly \$144bu this year - or 1.9 per cent of GDP, the lowest percentage of national income since 1979. If no further action is taken, it will drift higher in the next five years, but most economists expect it to remain at or below 3 per cent of GDP - a respectable performance by European standards.

The CBO, however, is worrving about what will happen after 2008, when baby-boomers start retiring. The drop in the birthrate and the increase in life expectancy will cause the ratio of workers to retirees to fall sharply - from about 4.8 in 1990 to 2.8 by 2030, This may not sound a lot, but it is enough to wreak havoc with the government's finances. The labour force will barely grow after 2010, reducing payroll tax receipts slightly as a sbare of national incoma. Meanwhile, outlays oo pen-

mushroom, reflecting both a larger recipient population and the rising reat cost of these services. The likely burden on the economy is impossible to

back effects.

gauge precisely because estimates of economic growth tory, as the chart shows. over long periods are highly uncertain. The CBO thus presents various "scenarios" which make different assump-

tions about the labour supply. place most other large counthe nation's capital stock and tries are facing even more "total factor productivity" output growth not attributdaunting fiscal challenges. sion and medical benefits will by 2030, depending on the the CBO projections because of the effect of compound interest over long periods. The growth of spending on other items, such as national defence. The federal debt US could, if it chose, cope with the fiscal threat simply would soar to betweeo 300 and by raising federal taxes gradu-400 per cent of GDP - a level of indebtedness far exceeding

anything in previous US his-An increase in the tax burden from 20 per cent of GDP today to 28 per cent of GDP in These are sobering projec 2050 would be sufficient to tions, but they are not grounds for a loss of faith in keep the budget permanently balanced. Yet even after a tax the US economy. In the first increase that most Americans would rightly regard as monstrous, the overall tax to GDF ratio would still be lower than it is today in France or Gerpercentage of those aged 30-64) is expected to rise to 36 per many. The US, because of its past virtue, can thus absorb fiscal strains that would

destroy other nations. But its greatest advantage is that radical reforms, such as the partial or full privatisation of public pensions, will be easier to achieve than in Europe or Japan, American are instinctively more willing to consider free market alter natives to public programmes than their counterparts abroad

The idea of letting young people manage their own private pensions is already winning support among both **Republicans and Democrats** There is also agreement in principle that public health-care schemes should adopt the managed care" techniques that have greatly reduced the growth of medical costs in the private sector. The US is thus ikely to find ways to curb growth of spending on the elderly - and thus avoid the need for swingeing increa in taxation - regardless of which party controls tha White House over the next 50 years.

What is less clear is how quickly the US will move to avert this long-term threat. Acute fiscal strains will not become evident for more than a decada - a lifetima for many politicians. The point that watchdogs such as the CBO need to hammer home is that the longer action is delayed, the greater will be the ulti mate cost of defusing the debt timebomb.

From Mr Erik R. Olbeter. Sir, In your May 7 and May 28 editorials, "World trade at risk" and "WTO at sea", you question the US commitment to free trade and cite the recent US balking at the telecom negotiations as proof. While the US did refuse to sign

the proposed World Trade Organisation accord, I disagree with your assertion that this action represents a "fundamental weakening of US commitment to the multilateral trade system". On the contrary, the US

remains the champion of free trade, as demonstrated by the US position in the WTO's negotiating group on basic telecom (NGBT).

From Mr Walter Grey. Sir, Samuel Brittan's assertion (Economic Viewpoint, May 23) that "if the Maastricht criteria for monetary union and the proposed European stability ct did not exist, they would have to be invented" may enrage some but should encourage others - like the International Monetary Fund. If, as he pointed out, the IMF is concerned about bulging budget deficits and mounting debt burdens, it could take a leaf out of the Maastricht book and draw up a general code of economic practice for the guidance of all member states. In the light of agreed criteria, each country's performance could then be monitored and

critically assessed. Besides helping to avert Mexico-type financial crises, this could lead to a gradual improvement in economic management standards, to the benefit of domestic and international stability. It is a cause in which the UK, an IMP founding father and ostensibly a reformed character, should play a leading role.

Walter Grey. 12 Arden Boad, Finchley, London, UK

US not weakening its commitment on trade

At the onset of the negotiations, the US led the charge for open competition by offering to liberalise completely its market. However, more than two-thirds of the offers made overily restricted foreign participation in domestic markets. While some proposals were "better than expected , the majority were clearly protectionist. The reasons the US rejected a deal that promised minimal liberalisation are twofold. Withoot reciprocity, closed markets mean a continuation of the sofrailing US trade deficit in telecom services (currently \$4bn), while placing US companies at a disadvantage in international

markets. Furthermore, signing an accord at the WTO would prohibit the US from leveraging its market to encourage further liberalisation. On a more principled level, why should any country sign a

liberalised-minded such as the

suspended in order to mobilise black labour to meet wartime

demand. The urbanisation that

faster than it could be created: during the Verwoerd years the

followed destroyed apartheid

number of blacks living in

"white" areas grew year by year. At Verwoerd's

assassination in 1966, "white'

South Africa enjoyed a black

majority, and the need for a skilled labour economy would

soon force open the higher education system to blacks. Tha repression of the Vorster

years, which fuelled the

protest movement, was a

global accord when more than two-thirds of the negotiating parties have not committed to true bberalisation? Critics of the US action at the NGBT are better served focusing on the free rider" problem in the WTO than attacking a member eager for real competition. If market opening offers do not improve significantly in the next ten months of NGBT negotiations, countries that are

US should again reject them, and this time opt for bilateral agreements. Undoubtedly WTO advocates

will push for an agreement no matter what the impact on competition.

. .

Î,

Although bilateral deals are not the "best" solution, they do promote competition and protect consumers from price gouging at the bands of foreign monopolies.

triumph.

Reward for the fight against apartheid Create code

From Mr Chris Jones Sir, If President Mandela truly wishes to be "doggedly loyal to those who contributed to the fight against apartheid" ("Another burden to carry", May 21), the South African iness community should be bu the first to be rewarded. It was economic growth, not protest politics, that played tha vital role in destroying the National party's feudal fantasies and creating post-apartheid South Africa. As far back as the second world war, this path was clear:

the pass laws had to be

Folly if barriers are created in UK rugby

From Mr Tony Kennett. Sir, Keith Wheatley raises important issues in "Rugby's small fry may rebel" (May 28). Obviously I cannot comment on behalf of the other 19 senior English clubs but I am sure they will to a large degree share our views at Blackheath. It is generally acknowledged that Blackheath is the oldest open rugby club in the world. Since our foundation in 1858, we have prospered and our success today is due in no small measure to one key fact.

We have always recognised and valued the important role which local clubs in the south-east corner of England have played in our success. The fact that Blackheath has supplied more internationals than any other club is a tribute to this close relationship, alarm in the new world of

What does provide cause for professional rugby union is the avowed intention of some of our fellow top 20 clubs to abandon their junior teams. It

will be folly beyond belief if

the top clubs seek to establish barriers between club players and professional players. Rugby union bas thrived and prospered because of the informal structure which links local chubs to national clubs. Long may this continue.

Tony Kennett, chairman, development and funding committee, Blackheath Football Club, The Rectory Field, Charlton Rd. Blackheath, SE3 8SR, UK,

When there's international business at stake, we put our best people on the case.

FT Interview · Donald Johnston **Global free-trade mission**

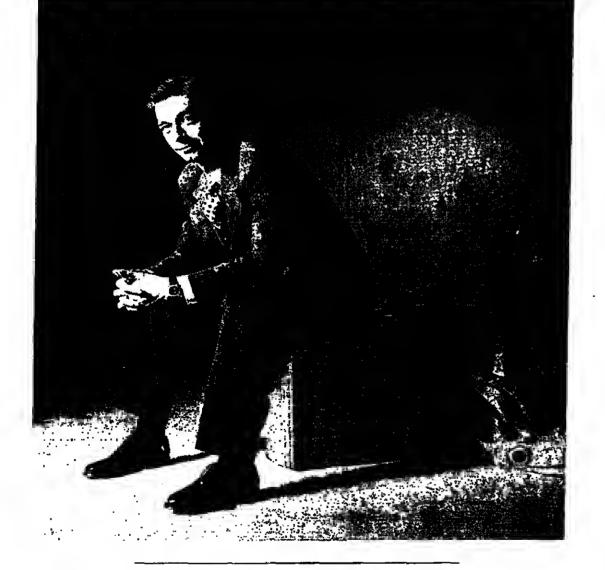

The new secretary-general of the OECD tells Gillian Tett and Guy de Jonquières about his plans for the organisation

The problem, I fear, is not that President Mandela and his advisers don't understand this

historic process, but that they instinctively feel that narrow political loyalties and a continuation of anti-apartheid rhetoric will bring them the greatest rewards in terms of power and privilege. Chris Jones, 20 Antonine Gate,

We may not have a global branch network. But we do have a rapid-response task force of fast-thinking staff. ready to roll whenever you need them.

L-Bank is the development agency of the German federal state of Baden-Württemberg. Not the biggest of banks perhaps, but certainly one of the most ambitious. As an international issuer, L-Bank has risen to join the world's top ten. And in global corporate finance, too, L-Bank maintains a bigh profile. Not through high-rise

pomp and splendor but through high personal commitment. A single call is all it takes to bring one of our corporate finance experts jetting to your side. With no branch office blocking the way, your wishes reach the cars of the people who count, at head office, directly. Short decision-

that we send our best people packing. L-Bank, Schlossplatz 10/12, D-76113 Karlsruhe, Germeoy. Telephone INT 721/150-0.

yours and ours. Small wooder, then.

臺L-BAN making paths save time and money - Landeskreditbank Baden-Worttemberg

Donald Johnston, wbo 0 takes over today as secretary-general of the Organisation for Economic Co-operation and Development, has lost to time taking executive deci-sions. One of his first has been quietly but firmly to spurn an OECD offer to pay to have his Paris residence redecorated. Such thrift is In character with the 60-year-old former Canadian bndget controller's unpretentious style. But it also recognises that the OECD, long known as the "ricb man's club" of industrialised nations

has fallen on hard times and

must find new ways to justify

its keep.

lined by events.

During his five-year term Mr Johnston faces a daunting task. While wrestling with a

tight budget squeeze, he needs also to define - and sell to the sequences of remorseless international competition. He says OECD's 27 members - a fresb he is increasingly alarmed by mission for an organisation rising protectionist pressures that is in danger of being sidein the west. But as a former politician - unlike his recent "The OECD is in a transipredecessors - he also undertional period, because the stands the difficulty of mainworld has changed dramatictaining support for free trade ally. But there has not been a among voters who feel threatconscious decision by the ened by it.

members aboot what that "Everyone says there is no implies." Mr Johnston says. question that thare is a net In part, the organisation is a in from free trade," he says. "Bot the question men and women on the street ask is: victim of its success since it was set up in the 1960s. Its role as an economic bulwark what will it do for me, for my against communism was made obsolete by the fall of the Berkids, for my busband who has lost his job?" Mr Johnston is equally wor-ried by the "real menace" of regional trade groups such as lin Wall, while the importance

of the sound fiscal management and micro-economic reform it has long preached is the North American Free now widely accepted. At the same time, the OECD Trada Agreement. He fears businesses will come to view risks losing influence as a these groupings as alternatives to the multilateral trade systhink-tank, talking shop and discreet negotiating forum for tem, leading to fragmentation

the most powerful economies. of the world economy. because the world's economic To avoid that risk, he says, centre of gravity is shifting government leaders need to dedicate themselves as enthuincreasingly towards Asla and other fast-growing regions. Yet almost all the OECD's sizstically to strengthening multilateral principles as to members are European and building regional gronpings. North American countries. In particular, World Trade Japan remains its only Asian Organisation members should member, although South Korea set a timetable and a deadline is negotiating to join. for achieving global free trade. Mr Johnston's big idea for The OECD, be argues, can resolving these dilemmas is to play an important role by help-

ing governments persuade turn the organisation into a vehicle for promoting global sceptical electorates that liberfree trade, while helping memalisation is good for them, and ber governments cope better by helping their economies to with the domestic political conrestructure.

Donald Johnston: wants to promote reform in rest of world

'In North America, for example, many communities are almost one-industry communities that will be adversely affected by free trade," Mr Johnston says. "The question is bow adjustment is going to occur and who will be the net winners." Mr Johnston has two cards

to play. One is the OECD's credentials as the only interna-tional forum in which governments regularly exchange views on almost every type of economic activity, from pensions to tourism.

The other is its capacity for thorough and often innovative policy analysis. Mr Johnston underlinas the importance of its extensive work on labour markets, which has found that deregulation and fiexible working practices are essential to

create new jobs. He says the OECD's exper-tise in this area will be particularly valuable in underpinning free trade, because unemployment is driving the protectionist backlash.

However, Mr Johnston's ambitions extend beyond helping tired old economies deal with painful change. He also wants the OECD to

take a lead in promoting liberalisation and reform in the rest of the world.

But bere the organisation's exclusivity poses a problem. Though trade with emerging markets is vital for western growth. Mexico is tha only eveloping country to belong

to the OECD. Hungary and the Czecb republic recently entered, and Poland is expected to do so soon. Last month. Russia startled OECD ministers by applying to join.

Mr Johnston is wary of enlarging membership too fast. Instead, be bopes the OECD can build closer ties with nonmembers and promote global free trade by putting its analytical resources at the service of the WTO.

The thinly-staffed WTO could certainly use more research capacity. But any suggestion that the OECD might becoma its think-tank would raise developing countries hackles.

Most view the Paris-based body as a vehicle for the narrow interests of the older industrialised countries. Nor are they likely to be reassured by the fact that Mr Johnston owes his new job to strong support from the US, tradition ally the OECD's biggest paymaster

Sensitivities have already been inflamed by US-led nego-tiations in the OECD to formulate international rules for direct investment. Developing countries fear that OECO members will attempt to impose their eventual agreement on the WTO without con-

sultation. Mr Johnston blames the illfeeling on mismanaged communications but appears still unclear about how to pateb up the argument or to persuade poor countries to accept his organisation as an ally.

His first priority, bowever, must be to rally OECD governmants around a coherent vision of the organisation's longer-term role.

.

. . .

That will be made no easier by the challenge of reaching decisions as membership grows larger and more diverse.

Mr Johnston hopes governments will modify the current consensus principle, which allows every member a veto. But he admits: "I am not sure that members bave a unified view or that anyone has any easy answers."

His success in finding answers and putting them into effect will be the toughest test of his leadership. It may also determine whether the OECD has a future after be steps down.

Power generating equipment: a market losing steam

FINANCIAL TIMES

Number One Southwark Bridge, London SE1 9HL Tel: +44 171-873 3000 Telex: 922186 Fax: +44 171-407 5700 Monday June 3 1996

Peace and Netanyahu

When Israeli voters first rejected Shimon Peres, in May 1977, and elected the late Menachem Begin, they were widely held to have voted against peace. Yet within two years Begin was to sign a peace treaty with Egypt. That precedent must temper

im trade

11]1-st theid

· · · ·

. :

·. •

reactions now to the victory of Benjamin Netanyahu. His election campaign mixed hawkisb rhetoric with signs of awareness that the Israeli public broadly supports the "peace process", and that Israel cannot completely ignore interna-tional opinion. He must know, in particular, that much of Israel's recent prosperity derives from the perception of foreign investors and trading partners that the Arab-Israel conflict is drawing to a close. If that perception falters so will foreign investment in Israel, and Israeli peoetration of some important emerging markets, notably in south-east Asia.

Mr Netanyahu'a parliamentary majority, and therefore his gov-ernment, will be full of hawkish figures. But, as Israel'a first directly elected prime minister, be should enjoy greater freedom from parliamentary control, and there-fore greater authority over his colleagues, than many of his prede-cessors. Also, he inherits treaties and commitments to Israel's neighbours which he says he will respect. The peace process should therefore go on, at least in form. That process was by no means assured of success even if Mr Peres had been re-elected. He had pledged to make no concessions on the status of Jerusalem, and indeed it is hard to imagine any Israeli government renouncing sovereignty over the thick belt of Jewish housing estates which now surround the city, in what is still egally Arab territory. Mr Peres

had also alienated many Palestinians, incloding crucially some Israeli Arab voters, by his tough response to the Hamas terrorist attacks in February and March. and by his savage and indiscriminate reprisals for attacks by the Hizbollah resistance movement in

southern Lebanon in April. By such methods Mr Pere sought to retain power, instead of telling the electorate, as he should have, that since Hamas and Hizbollah were out to destroy the peace process Israel'a best response was to press on with it unflinchingly. Governments seldom win elections by stealing the opposition's clothes. Many Israeli voters must have felt that, if a tough anti-Arab policy was called for, Mr Netanyahn rather than Mr Peres was the man to carry it out. Mr Peres's defeat is also a defeat for the US, which sought to help him by offering uncritical support. The Clinton administration now has to establish good relations with a new Israell leader who has good reason to distrust it, but also has to undo the damage dooe to its allies and proteges in the Arah world. Many of these, baving invested heavily in the peace pro-cess, are now hadly compromised m the eyes of their own public. With his own re-election in mind, Mr Clinton will no doubt give priority to the former of these tasks, at least until November. But he should at least hold Israel to its existing commitments, including the withdrawal of Israeli troops from Hebron by mid-June and the inclusion of Jerusalem in the agenda of the "final status" talks which began last month. If Mr Netanyahu's first act as prime minister is to renege on these, he will indeed be serving notice that his victory is a blow to peace.

Year at the Bank

James Wolfensohn has heen president of the World Bank for a year. He took on an institution crying out for leadership and a cause that needed advocacy. He has exploited his charm, energy, enthusiasm and contacts to provide both. Doubts remain. On bal-

ance, however, the report card on his first year is favourable. Mr Wolfensohn inherited a lemoralised institution under

has also won plaudits for his willingness to tackle the burden of debt owed to multilateral institutions by some of the poorest developing countries. Third, he is trying to change the culture of the bank, to orient it

towards results, towards individual performance and towards meeting the demands of clients. He has recognised that the bank ton inward.l oking and bureaucratic. He has also understood that many of its clients have a choice. They will come to the bank if it offers what they want, not what it thinks they need. Yet questions remain. This is partly because it will take years before the effects of his actions become clear. To an extent, they never will, since the hank provides just a few ingredients of development. It is also because there are doubts about his capacity to choose between alternatives, manage complex internal changes and to impose coherent strategic purposes upon the energies he has released. Yet Mr Wolfensohn deserves the benefit of the doubt. He understands the importance of economic development. He realises that the bank's credibility depends on its making a difference - and being acen to do so. What he has achieved thus far justifies at least the hope that he will achieve the revitalisation he seeks.

The manufacturers are reacting with cost reductions, including joh he 1990s have gone seri-ously wrong for the world's power engineer-ing companies. What was widely expected to be a decade of expansion has turned into a long war of attrition. The prospect of supplying power stations to China and other develop-ing countries, combined with anticipated business from new, independent power producers in the developed world, had leading electrical engineering companies work-ing overtime to expand capacity. But they moved much faster than

their prospective customers. The forecast flood of orders has come more slowly than most manufacturers expected, leaving the industry locked in a ferocious price war which shows little sign of ending. Last year, Westinghouse of the

US, one of the top six which dominate the market, posted a \$207m loss in its power systems division, including write-offs. The other five integrated manufacturers - the US's General Electric, ABB, the Swiss-Swedish group, Slemens of Germany, GEC Alsthom, the Anglo-French company, and Mitsubishi Heavy Industries of Japan saw their margins in power engl-

westinghouse shut a generator plant employing 650 at Pensacola, Florida, and moved production elsewhere. Siemens has cut capacity in At GEC Alsthom, Mr Pierre Bil-ger, chief executive officer, says: "We anticipate a period of cuts as a consequence of market cooditions." The key question is whether the pressures will be enough to force the industry to consolidate. The last hig mergers in the late 1980s saw the birth of ABB, from Asea of Sweden and Brown Boveri of Switzerland, and the formation of GEC Alsthom, from the energy and transport interests of the UK's GEC

and France's Alcatel Alsthom. Today, industry speculation focuses on Westinghouse, which last year dramstically changed direction with the acquisition of CBS, the broadcasting network. Westinghouse executives admit the company's traditional manufacturing businesses, including power and nuclear energy, sit uneasily alongside its glamorous new interests. Westinghouse denies It is plan-

ning more big disposals following

which bought low-cost productioo bases in Poland, the Czech Republic and elsewhere, GE, meanwhile, increased by 20 per ceot the capacity of its modern gas turbine factory in Greenville, South Carolina. According to GE, while steam-turbine manufacturing capacity stayed unchanged at about 70,000MW a year, gas turbine capacity rose 70 per cent in 1990-94 to 36.000MW.

Gas turbine sales also grew rapldly, but not fast enough: only sbout 30,000MW were sold last year. Companies leap-frogged each other with price cuts to secure orders.

in developed countries, manufacturers hoped that electricity liberalisation, notably in the huge US market, would produce orders from independent companies challenging the old utilities. But after a flurry, orders slowed as electricity companies realised the extent to which deregulation would force existing prodocers to become more efficient and cut power prices.

lant manufacturers expect little recovery in business before the

Industry finishes restructuring to cope with its new competitive environ-ment - perhaps not before the year the year 2010 - which means likely to consolidate further, princi-1,750,000MW of orders for equipment makers. Manufacturers can even today collect preliminary pro-posals for at least 1,000,000MWworth of schemes in China, india, Indonesia and other developing countries.

But the problem for manufactur-ers is deciding which plants will be built. As Mr Ron Pressman, vice-president of marketing at GE's power systems division, says: "The challenge is to screen the real projects from those based on s hope and a prayer."

Mr Pressman estimates that a private sector project in a developing country can take seven years to bring to fruitlon. As the charts show, GE expects the slow completion of developing world schemes to keep the power engineering market flat over the next few years.

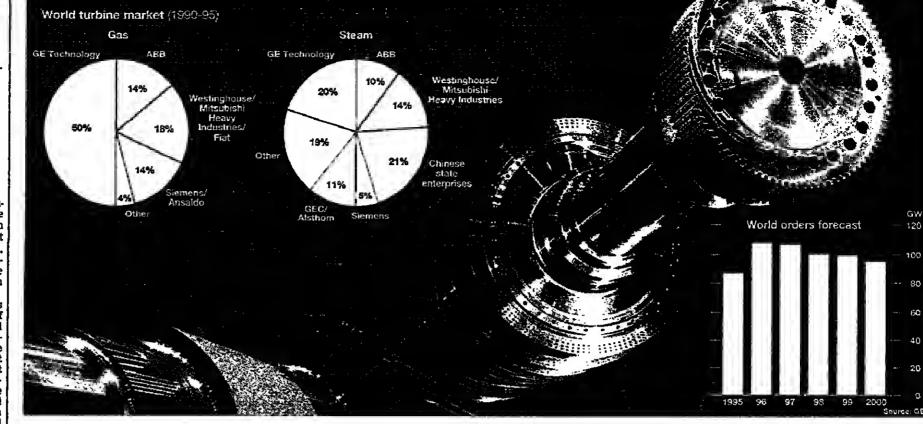

Delays in the \$2.5hn power plant under construction in India by a consortium led by Enron, the US energy company, highlight Mr Pressman's point. Altbough the scheme for Maharashtra state was earmarked by Delhi for rapld approval. It took two years before contracts were signed. Soon after, the Maharashtra state government changed and the project had to be

pally through alliances and acquisitions to share development costs and secure low-cost production cen-

17

tres in developing countries. For example, ABB's network in eastern Europe and the former Soviet Union, which employs over 30.000 of the group's 211,000 staff, is growing at the rate of an acquisi-tioo a mooth. The portfolio includes a switchgear factory in a Bulgarian village and a Ukrainian plant making missile control systems which ABB will convert to industrial use, GE is husy tightening its links with Italy's Nuovo Pignone, a diversified turhines and compressors group. where it bonght control in 1994. Westinghouse last year beat rivals to a joint venture with Shanghai Electric Corporation, China's hig-gest power plant maker. in which it is investing \$100m. Mr Zwirn of Westinghouse says: "The massive costs of new projects mean we need more co-operation." Meanwhlle, manufacturers are

forging closer financial ties with customers, notably investing in private power stations - in effect putting capital into their customers' projects. Slemens estimates it has invested in 30 per cent of the projects It has on

Under pressure to get together

Talk of further consolidation in the world power engineering industry is in the air after a disappointing start to the 1990s, says **Stefan Wagstyl**

attack from both the socially concerned left and the free-market right. As a publicly supported financial intermediary, its raison d'être had been undermined by the growth of private finance. Net lending was stagnant. The ability to provide concessional assistance for the poorest of its clients was under threat.

Against this background, Mr Wolfensohn has at least three big achievements to his credit.

First, he bas defended the bank's role as a public develop-ment institution. Just as governments play a central role in creating the conditions for progress, so an international agency has a valid role in supporting them.

Second, he has greatly improved the bank's image and external relations, winning at least the respectful attention of its critics. He has, as a result, secured renewed support for the international Development Association. the Bank's soft lending arm. He

The financial results are particularly galling because in other respects the manufacturers are performing better than ever. Companies which once did business in protected national markets in cosy agreements with state-owned utilities have in the past 10 years been forced to compete more aggressively with each other. The quality and reliability of their equipment has been transformed and manufacturing costs have fallen by up to 50 per cent in a decade. But still prof-

its are hard to come by. After a 30 per cent fall in prices since 1993, the makers bope the market will stabilise. But it is more a hope than an expectation. As Mr Randy Zwirn, chief operating officer of Westinghouse's power generation business, says: "The way we have to run this business is to assume prices will keep falling."

Picking up

the threads

on Wall Street may not think about

year. But as Mr Zwirn says: "We are not trying to sell our husiness but you can never say never."

Rivals believe disposal may not be so far away. A senior European industry executive says: "Westinghouse bas got to be the top candidate for a sale."

Ironically. Westinghouse has been a significant contributor to the industry's expansion. After years of neglect, the company invested heavily in power, renovating its range of traditional steam turbines for coal-fired plants and entering the fast-growing new market for gas-fired turbines. With the help of an overhaul of its factories and an alliance with the UK's Rolls Royce,

inroads into the market. Its move coincided with an expansion into eastern Europe hy ABB.

OBSERVER

2000. Mr Adolf Hüttl, a Slemens board member, says: "The biggest questioo mark in the industry is the future of US power plants."

As for nuclear energy, the prospects for new husiness are even hleaker. The last three plants to be huilt in western Europe and north America bave recently come on stream (including the UK's Sizewell B) and there are no more on the order books. Only east Asia offers possibilitles with Japan. South Korea, China and Taiwan planning more nuclear plants.

in the developing world, there is no shortage of demand but a great shortage of funds, even in countries such as China where economic growth is rapid. Projections of which provided gas turbine technology. Westinghouse made rapid developing countries' electricity requirements suggest the world's installed power plant capacity might need to grow 60 per cent by

renegotiated. Now that the central government is in turmoil following the recent general electioo there is still no final word on the renegotiated scheme.

In China, approvals come faster. But the scale of the market has encouraged every hig manufacturer to bid for business, driving prices down. Also, Chinese enterprises have imposed other tough conditions. Including some that oblige manufacturers to transfer technology and carry out an ever-increasing share of work in China. For example, GEC Alsthom must transfer know how for steam turhines under the terms of a \$2bn contract for expanding a ouclear plant it built at Dava Bay oear Hong Kong.

Uoder competitive pressure, the shape of the industry is changing. Whether or not Westinghouse sells its power business, the industry is

U.S. Loan to France Paris:- M. Leon Blum, French Ambassador Extra-ordinary, told a press conference here that "no pressure was exerted, or conditions of any kind - civil or military, political or economic were requested by the Americans" before the conclusion of the Franco-American loan agreement. M. Blum returned here from Washington after concluding an agreement for a £342,000,000 U.S. loan to France.

Sinn Féin's move There is always a risk that elections in Northern Ireland will that Sinn Féin is an organisation

polarise opinion, squeezing the moderates in nationalist and unionist communities alike. The strong showing of Sinn Féin and of Mr Ian Paisley's Democratic Unionists in the poll for the new Northern Ireland Forum reflect that danger. At first glance, the results appear to strengthen the relative position of Mr Gerry Adams, the Sinn Fein president, and to weaken that of Mr David Trimble; the leader of the mainstream Ulster Unionists.

But these elections were a means to an end rather than an end in themselves. The new Forum has no real powers. It is designed instead as a gateway into the all-party talks due to start on June 10. All those committed to peaceful efforts to build a new constitutional settlement in the province are assured of seats at the negotiating table.

For the moment, this must exclude Sinn Féin. Unless and until the IRA restores its ceasefire the London and Dublin governments are rightly determined to bar its political wing from the talks. In spite of Sinn Fein's 15 per cent share of the vote, the Republican movement cannot claim a mandate from the ballot box until it puts aside its Armalites.

Mr Adams will continue to argue otherwise. He has suggested

distinct from the IRA. The reality is that they are inextricably linked, with the military commanders firmly in charge. If not, Mr Adams would secure a seat st the table simply by denouncing all those who support violence.

blended with a spot of Deep South enterprise. It was in the 1840s that Henry, Emanuel and Mayer It is reassuring that on this central condition for entry to the talks Mr John Bruton, the Irish Lehman left Rimpar, near the Bavarian town of Winzburg, and fetched up, a shade improbably, in prime minister, is as robust as his British counterpart Mr John Major. Their two governments, however, have still to resolve some remaining differences if the negotiations are to start on time. Montgomery, Alabama, to found a dry goods store to serve the Part of this tortuous route into These concern the remit for a speinvestment banking - the move from dry goods to Wall Street was made in tha 1880s - is now being cial sub-committee which will deal with arms decommissioning and the role to be played in the talks retraced. A hunch of Lehmans, by Mr George Mitchell, the former who hava long since shed their

connection with the bank, are US senator who produced an independent report on the weapons descending on Rimpar later this month, at the invitation of the issue earlier this year. Dublin is anxious that, in the mayor. Headed by John Loeb. event of an elaventh-hour IRA former ambassador to Denmark and a great-grandson of one of the ceasefire, the talks must not be brothers, the delegation will be derailed at the outset by wrangling over arms. London is underthere for an exhibition about the standably sensitive to the family and the unvailing of a demands of unionists that some plaque on the original Lehman weapons must be destroyed during house. Sir William Goodhart, the the negotiations. Tha two governments must quickly bridge these differences. Then it will be for Sinn Fein/IRA to show whather it

British QC, who is Loeb's consin, will be showing up. to be right. Ah well, who said concentration camp. However, her first cousin, the late Henry banks could count? Lehman, governor of New York during the depression and the second world war, helped some 65 other family members flee the

Nazis. So why is Lehman Brothers not making something of this renaissance of interest in its founders' birthplace? Well, when there's a Robert Lehman wing in the Metropolitan Museum of Art donated by the man who led the Wall Street firm for 45 years until 1969 - a plaque somewhere in Bavaria probably doesn't do much for the image.

Sum problem

■ KHD testers on the edge of bankruptcy. And Deutsche Bank, Germany's biggest bank, and not very proud owner of 47.7 per cent of the company, comes over all shy once again.

The terminally unchatty bank was unable even to confirm that KHD's supervisory board was holding a meeting last week. Odd that - given the board is chaired by one Michael Endres, himself a board member of Deutsche. And where did the get-together take place? Yes, the bank's own neadquarters in Frankfurt. One of the few things Deutsche

is prepared to give away concerns the number of banks in the lending consortium - 60, it says. KHD gives a figure of about 45 - and appears

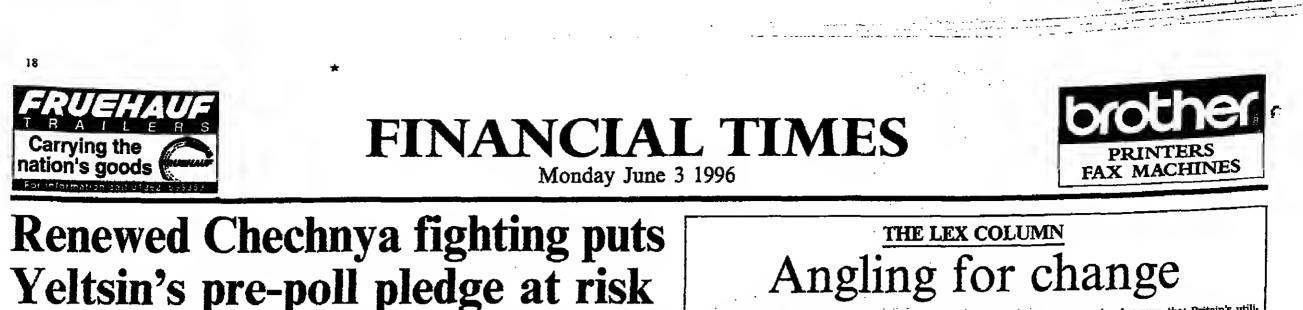

Turning turtle

Surely it was only last month that President Glafkos Clerides of Cyprus was sounding off about the evils of unrestrained tourist development? He was addressing : gathering of Greek Cypriot businessmen, and the thrust of the speech lay in the need to preserve

tourism accounts for one-fifth of the Greek Cypriots' income these days, and there are precious few is. Still, his words may have come as a bit of a surprise to executives from Thance Hotels, owned hy foreign minister Alecos Michaelides and his family. The Clerides cabinet granted Thanos a special dispensation to build a 300-bed luxury hotel on the Asprokremos beach in the Akamas peninsula - about the last undeveloped chunk of southern Cyprus. The project is opposed by environmental groups, who complain that bright lights and disco music will disturb the nesting marine turtles. Nor is it just the greens. ETEK, the Greek Cypriot technical chamber, has decided to take the Clerides government to court - for allowing Thanos's new hotel to

cover more of the site than it

the island's natural resources for future generations. Nothing surprising in that bits of unspoiled coastline left as it

By Chrystia Freeland, recently in Grozny

One of Russian president Boris Yeltsin's most daring pre-election promises threatened to go up in flames yesterday when fighting broke out in Chechnya despite a ceasefire which formally went into effect on Saturday.

Four Russian soldiers were killed and at least five others injured when their tank ran over a land-mine vesterday in the Che-chen capital Grozny.

On Saturday, Russian forces and Chechen separatists fought pitched battles in the contested south west corner of Chechnya. The fighting threatens to dis-

credit Mr Yeltsin's claim last week, on a lightning visit to Chechnya, that the war was won The ceasefire agreement,

signed in a high-profile ceremony in the Kretalin last week by Rus-

sian officials and rebel leaders. was seen as a brilliant piece of ampaigning by Mr Yeltsin, who faces a strong challenge from communist rivals before the June 16 presidential poli.

But now that it has been violated just hours after coming into effect, the pact could seriously tarnish Mr Yeltsin's political

Image. Over the weekend in the hills of Chechnya, separatist field commanders, believed to be cru-cial to any lasting peace, were sceptical about the ceasefire and warned that their commitment to independence had not wavered.

"If I speak the truth, I do not believe that Yeitsin will keep his word," Mr Doku Makhatev, the bearded commander of separatist forces in south-west Chechnya, said, cradiing a Kalashnikov in his lap as he sat in the courtyard of his village home in Gekhi.

the nearby forest, Mr Makhalev said he and his men would abide by the ceasefire unless they were attacked, but in a sentiment echoed hy many Chechens, he warned that the Kremlin meeting last week had not swayed the rebels from their commitment to full independence.

The battle for sovereignty, for independence, has been going on for one-and-a-half years," said the carpenter who sold off his horses to buy guns and join the Chechen resistance when Russian forces first entered the republic in 1994. "We have suffered too much to stop now," said Mr Makhaiev, who has lost three brothers in

the fighting. "Of course, we do not want to fight, but there can be no road back, we will fight to the last Chechen. In a sign that even if Mr Zelimkhan Yandarbiyev, the for-

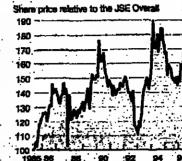

Anglo American is every corporate financier's dream. A gronp which mer poet who became leader of the separatist forces last month, straddles almost every facet of the South African economy, and much more, it is the perfect candidate for a break-up. Even after a strong share was willing to compromise he might encounter stiff resistance from his field commanders, Mr price performance, it trades at a 9 per Makhaiev aaid he had been against the Kremlin meeting cent discount to net asset value, of which over 90 per cent represents listed investments. And while its size ensures cheap borrowings, its lehyrinfrom the outset. "It is Yeltsin who began the war and I did not think we

ebould give him points shead of the elections," Mr Makhalev said. Russian soldiers were equally sceptical. "Yeitsin is cunning and he is collecting votes," said And-ret, a 19-year-old soldier, standing bare-chested on top of a tank at the Russian military'a heavily

fortified airport headquarters. "But the war will never end here, it will still be going on in 2000. The people are crazy, they are monkeys, they are mountain goats."

commendably harsh on inflation, leavcommendably harsh on inflation, leav-ing interest rates untouched for over a year, despite a series of rate cuts else-where in Europe. However, Mr Fazio has painted a glum picture of the economy, with economic growth due to halve to around 1.5 per cent this year. Against this backdrop inflation-ary pressures should ease. And while inflation is unlikely to dip below the 4 per .cent threshold, which he has named as a necessary ingger for cuts. it should start petting close. Sn long as it should start getting close. Sn long as his former boss, treasury and budget minister Mr Carlo Azeglio Clampl, can produce a sufficiently tough mini bud-get - and the Bank of Italy's message should help encourage parliamentary approvals - a 1 percentage point cut should swiftly follow. After all, given the national debt of around L120,000bm, rate cuts are the easiest way to reduce the budget deficit.

Valuing utilities

Here is a puzzle for efficient-market theorists: why, in the face of plenty of evidence, do so many investors cling to a ham-fisted method of valuing

Britain'a utilities - on yields? Theory, of course, says yields can be as good a guide to value as any other. By definition, a company is worth the sum of all the dividends it will ever pay, a yield valuation which gets a stock a vivident growth potential right, as well as the risks, will be spot right, as well as the flack, will be spot on. But in practice, largely as a result of undergenering, and high levels of dividend, covert valuations based on current pay-out levels have consis-tently underestimated utilities' poten-tial to shovel out cash - a point bid-der burg and bare slow to cont bidders have not been slow to spot.

In time, yield-based valuations will be easier to get right - when utilities have finally got their balance sheets in order and ran out of scope to ontsmart their regulators - and the shares will look more like bonds. The fact

remains, however, that Britain's utilities are mostly a long way from that. What should investors do? The best

answer is to pay more attention to balance sheets and cash flow. In practice, this means looking at cash flow interest cover, enterprise value to cash flow multiples and taking the trouble to run full-hlown discounted cash flow models.

This kind of analysis is no Holy Grail; it is tricky, for instance, to allow for the occasional enthusiasm of regulators and governments to get their own hands on investors' cash. And utilities may themselves waste it. But cash flow projections do give investors a basic yardstick against which to judge a utility's future divi-dend-paying potantial. So even if investors are too fond of yields to part with them, they would still have a better chance of getting them right.

12

Close/Hill Samuel

Close Brothers' acquisition of Hill Samuel's corporate finance depart-ment is a vivid illustration of the transitory nature of merchant hanking glory; Hill Samuel's star, one of the brightest in the sky 10 years ago, is all hut eclipsed, while Close Brothers' is undoubtedly in the ascendant. And though the price was undisclosed, that was probably to avoid embarrassing Hill Samuel's owner Lloyds TSB Group by revealing the paltriness of the sum

Takeovers of people businesses like merchant banking are notoriously dif-ficult to manage, but Close's record for example in the case of marketma-ker Winterflood Securities - is a good ona. By taking on the Hill Samuel team lock, stock and barrei, the chances of preventing the best staff and clients from walking are

So far. Close Brothers' success has been built on picking its markets carefully, and targeting a very specific position in those markets, in corporate finance, this niche has been edvising small and medium-sized companies. The Hill Samuel acquisition will allow it to set its sights slightly higher. This is fine, as far as it goes, but in the long term thare is a danger in moving towards the mainstream. It is comfortable to be a niche merchant bank, but medium-sized firms have found it hard to survive. For the moment, expansion of its fund management business still offers another fruitful route to growth. But Close should not forget that small is beautiful.

Czech reforms stall after poll setback for Klaus coalition

By Vincent Soland in Prague

The Czech Republic's rapid economic reforms have been suspended indefinitely after voters refused to give the outgoing coalition of Prime Minister Václav Klaus a fresh mandate in parliamentary elections at the week-

end. Preliminary official results of the election showed the threeparty centre-right government two seats short of an overall majority in the 200-member parliamant after a good showing by the main opposition Social Demo-

crats (CSSD). Mr Klaus's Civic Democratic party (ODS) won 29.6 per cent of the vote against 26.4 per cent for the CSSD. But projections showed the ODS and its two coalition allies, the Christian Democrats and the Civic Democratic Alliance, won only 99 seats even though their overall vote increased slightly compared with

the last election in 1992. The result is a hig setback for Mr Klaus, whose signature is on many of the country's achieve-

Václav Klaus: election result could cost him the prime minister's post in a new government 'if that were the price of stability'

munist party, which polled 10.3 per cent and won 22 seats, 13 fewer than in the outgoing parlia-The hig winner in the election was the CSSD, led by the econo-mist Mr Milos Zeman, which campaigned relantlessly on the theme of Mr Klaus's failure to tackle social problems, including The other winner, which ana-lysts said cut into ODS support

as much as the CSSD, was the far right Republican party. It polled 8 per cent of the vote and increased its seats by four to 18 on a virulently anti-gypsy and anti-German platform. President Václav Havel is

The CSSD has little prospect of forming a leftwing government, however, because Mr Zeman has expected to ask Mr Klaus, as the leader of the biggest party in the new parliament, to form a govrefused to contemplate a coalition with the unreformed Com-

ernment, While tha outgoing coalition is expected to regroup, it will be handicapped by its lack of a majority and will have to get

a governing programme through a newly hostile parliament. The deadlock has cast a spotlight on Mr Havel, the man most identified with the country's

transition to democracy. He is now expected to play i crucial mediating role in behind the-scenes negotiations in the next few weeks in a severe test of the country's constitutional order.

has fallen on deaf ears - apart from a minor gesture, spinning off Johnnic. Eventnally, Anglo may have so choice, but so far it has made it clear t will not voluntarily break itself up. does not even concede that the likely lifting of exchange controls - a necessary precursor to an efficient break-up - would make it a more attractive option. That said, Anglo's performance last year does not increase pressure for change. Its dollar-denominated husinesses such as gold, platinum and pulp and paper benefited a little from the weakening rand, but the full benefits will only emerge this year. Minorco had an excellent year, and

could be unlocked.

the prospects for De Beers are equally exciting, following its recent agree-ment on Russia's diamond exports. Nonatheless, Anglo's NAV discount has narrowed substantially beyond its traditional average of around 15 per cent. Given political risks, and a slow-ing economy, further upside looks lim-ited. exciting, following its recent agree-

thine structures hide attractive assets

and restrict both growth and competi-tion. Substantial shareholder value

However, chareholder value does not seem to feature prominently in the Anglo lexicon. And even the growing

political pressure for unbundling as a means of developing a more competi-tive and racially balanced economy

Bank of Italy

Tha Bank of Italy is taking a. refreshingly tough line on keeping the government's traditionally wayward spending habits under control. It has speaking names under contration at his thrown away the administration's fig-ures on the budget overshoot, empha-sising that the deficit will be around L18,000hn (\$11.54bn) or a third larger than previously admitted. Moreover, it has deflected pleas from Italian industrialists for lower interest rates and a softer lira, by pointing out that the corporate sector's profit margins are at record levels. Central bank gover-nor Mr Antonio Fazio claims that until the government is tough on spending cuts, he will not cut interest rates.

Nonetheless, rate cuts still look

FT WEATHER GUIDE

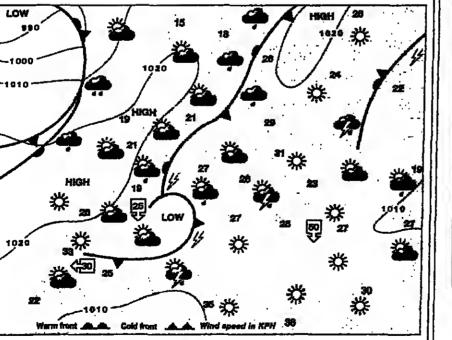

Europe today

High pressure over France and the Low Countries will bring sunny periods and lighter winds. A frontal system over the eastern Atlantic will bring rain to western parts of the British Isles. Spain will be sunny with temperatures up to 33C in the south. A frontal zone over the Alps will cause rain and o few thunder storms. Northern Italy will also have a few thunde storms during the day. Eastern parts of the Meddemanean will remain settled, but northern Greece will have thunder showers Showers are expected in eastern parts of Sweden and southern parts of Finland. Elsewhere it will be partly cloudy but will remain mostly dry.

Five-day forecast

High pressure will strengthen over wes Europe and the Baltic Sea. This will lead to het conditions over France and the Benefux. At the same time active low pressure will form over Italy causing rain and thunder storms. Eastern and northern Europe will remain settled.

KHD rescue depends on Saudi goodwill

By Michael Lir

A rescue package for Klockner-Humboldt-Deutz, the German engineering group which faces hankruptcy after uncovering hidden losses of DM650m (\$422m). depends largely nn the goodwill of Saudi Arahian hasinesses which ordered three cement plants from the group, accord ing to executives close to the talks.

Mr Aotoo Schneider, KHD chief executive, was yesterday still holding taiks in Saudi Arabia with the companies which ordered the plants from the group's EHD Humboldt Wedag subsidiary. The aim was to persuade them to waive penalty clauses, which start to blte if timetables are not kept to, and to make payments even if KHD has not met all its tarrets.

The penalties are understood to be so big that they could deter banks from agreeing the rescue package. Mr Schneider, who was

already in Saudi Arabia last weekend after the losses emerged, is accompanied by Mr Hans-Jorgen Wischnewski, a former Social Democrat minister who used to sit on KHD's non-executive supervisory board.

Sbould the Saudi Arabians agree to KHD's terms there is a chance, according to executives, that about 45 banks will agree to a rescue package -belleved to be worth DM750m that were forced on them by - for the company, "The San-dis have to play their part," a appreciation of the yen abroad KHD executive said. in the early 1990s.

The package is due to be discussed on Wednesday at the Frankfurt beadquarters of Deutsche Bank, which holds a 47.7 per cent stake in KHD. Mr Michael Endres. a Deutsche Bank board member, has been co-ordinating the efforts to find a way of rescuing KHD. the third time such an attempt has had to be made in the past By Mark Ashurst In Johannesburg Anglo American Corporation has scotched speculation that it will unhundle its non-core interests to focus on its natural resources business when exchange controls are abolished in South Africa.

Mr Julian Ogilvie Thompson, chairman, said results for the ness lobby group, that ecoyear to March "attest to the nomic reform was stalling because there was 'no sense of urgency among husiness leadgeographic and business diversity". Mr Dik Dusseldorp's campaign to create a new breed of property investment vehicles in the UK received a boost last week when the London Stock Exchange published draft rules enabling property unit trusts to seek a full listing. Page 24

Emerging Markets

Ills still lurk behind Japan's healthy-looking figures

ast week, Japan's corpo-rate sector completed a try's leading companies (those listed on the first section of the Tokyo stock exchange) I familiar rate of spring. The annual reporting season, a hectic three-week period durreported an aggregate increase in sales. The figure - a 25 per ing which 2.000 listed compacent rise in turnover reflected the gradual emer-gence of Japan from recession. nies publisb their results for the year to March, concluded While domestic demand was on Friday. The annual statistiweak, depressed further by the cal deluge is widely viewed as prevalence of price cutting, companies did enjoy the benea reliable barometer of the nation's economic health. fits of continuing growth in overseas markets, helped by a With all the results for 1995-96 In, preliminary judg-

ments can be made about the weaker yett. The figure that will give overall performance, with big implications for the stock marmost cheer to investors is the ket. Most companies claim the jump in aggregate net profits. results are the first clear proof of the strides made in their

Highly geared companies with the weakest balance sheets reported some of the biggest improvements

Overall, companies reported a Stripping away the accounting and other elements that improved the bottom line, the 42 per cent improvement, the higgest increase in post-tax actual operating gain was rather less significant. Operatearnings for more than a That net figure is, however, ing profits rose just 10.6 per cent on a year earlier. That followed a similar increase the an unreliable indicator of underlying husiness perforyear before, after several years Companies benefited from a of decline. Given the return to sales growth, it would seem that although Japanese compa-

level, the overall improvement was therefore less impressive -up by 23 per cent. And even here special, non-operating fac-tors helped.

Some companies signifi-cantly altered deprectation accounting methods. Many more gained from steep falls in interest rates, which cut the cost of their deht servicing. Indeed, it is something of an irony that it was the very highly geared companies with the weakest halance sheets that reported some of the biggest improvements in recur-ring profits.

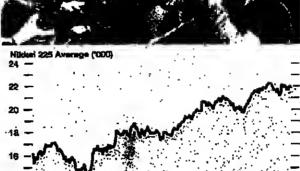

equity strategist with James Capel Pacific in Tokyo. This leaves them still well below levels achieved in the 1980s and early 1990s, a period when cost control was not considered a high priority.

"Operating margins are really nothing to write home about, even by Japan's stan-dards," says Mr James. Where does that leave prospects for future earnings

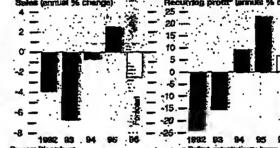

growth? If margins have grown only slightly during the post-recession rebuilding phase, the immediate outlook will depend rather more on continuing

sales growth. Sure enough, the companies' own projections for profits for the year to next March are much hleaker. They expect overall sales to turn down again by 2.5 per cent, and recurring profit to rise just 6.6 per cent, though net profit is again expected to produce a bigger jump, of 28.4 per cent. In short, the evidence from

1995-96 is that Japanese companies improved their underlying profitability only marginally. More important was the bene-fit they derived from a more favourable operating climate than they have had for half a decade - most notahly from a

NEWS DIGEST Gemina loss worse than expected

21

Gemina, the quoted Milan holding company, reported losses of L632bn (\$408m) for 1995, compared with a deficit of L262bo in 994. The result is much worse than the company forecast in November, when it said it expected a year-end loss of L468bn. The main source of the deficit continued to be the Rizzoli Corriere della Sera (RCS) publishing subsidiary, which lost L729bn against Gemina's forecast in November of L590bn. As well as its problems at RCS, Gemina bas had difficulties with Gemina Capital Markets, a fioancial sector subsidiary. for which it booked a loss of L155bn due to changes in valuation criteria. The company says that, owing to the onpossibility of obtaining the necessary information in sufficient time, it has had to exclude the area beaded by Gemina Capital Markets from consolidatioo. Last October, magistrates served warrants on 10 directors and managers of Gemina and RCS, warning that they were under investigation for alleged false accounting and improper distribution of profits. This led to the abandonment of the planned

Ferruzzi sells newspaper

The Ferruzzi group has sold the Rome daily newspaper ll Messaggero to Caltagirone, the Rome-based cement, constructioo and media group. The sale continues Ferruzzi's strategy of selling non-core activities and completes its subsidiary, which controlled the Telemontecarlo TV channel. to the Cecchi Gori group for L75bn (\$48.45m) last July,

Ferruzzi will raise L356bn through the disposal of its 100 per cent interest in Il Messaggero and receive L96bn on the transfer of its shares. The operation will be completed with the payment of two instalments, each of L130bo. on July 31 1997 and July 31 1998. Guarantees for these payments are being provided by a major bank, reported to be Banca di Roma.

Caltagirone, a family-controlled group, is best known for Vianini, its construction business, and Cementir, the coment company purchased from the IRI state bolding company in February 1992. The purchase of II Messaggero, which has daily sales of about 260,000 copies, is a significant additioo to its media interests. Last year, it acquired Il Tempo, a smaller Rome paper with sales of some 90,000 copies. David Darid Lan

Johnston to leave RJR Nabisco

The US tobacco industry is to lose one of its top executives with the announcement that Mr James Johnston, head of RJR Nebisco's tobacco business, will leave the company at the end of this month. He said he wanted to take a break and spend some time with his family while he was "still young enough to fully appreciate the experience". Mr Johnston, 50, has beaded RJR Nabisco's domestic

tobacco business since 1989 and added the international business in 1993. Two years ago he emerged as the industry's most articulate defender when seven top tobacco executives were summoned before a Congressional bearing and subjected to hostile questioning about the tobacco industry's activities. Richard Tomkins, New York

Spain's Banco Bilbao Vizcaya has agreed in principle to buy a 40 per cent stake in Banco Ganadero, Colombia's largest bank in terms of assets. The acquisition is due to be carried out principally through BBV subscribing for new common shares to be issued by Banco Ganadero. BBV estimates the deal will require an investment of some \$300m. It said the tentative agreement between majority shareholders of the two banks was "non-binding". Reuter, Bogota

Parc Asterix plans listing on French second market

By Andrew Jack in Paris

France's very Gallic answer to the EuroDisneyland theme park is to seek a stock market quotation this year.

Parc Asterix, a theme park north of Paris which is inspired by the Asterix cartoon book character, is sat to announce details next week of a planned listing on France's second market.

The move reflects its desire to speed up rapid growth and would further enhance its claim to be the second significant theme park in the country, after EuroDisneyland, which is controlled by the Euro Disney group and based to the east of the city. The

ing interest across Europe in Parc Asterix is older than EuroDisneyland. It opened in specialist leisure parks. Executives have indicated 1989 with a series of fun-fair that they intend to raise attractions and activities FFr50m to FFr60m (\$9.7m inspired by the village in ancient Gaul which formed the -\$11.6m) on the stock market. enough to provide a year's investment in advance. Argentaria raises Endesa stake ahead of sell-off Whirlpool signs

By Tom Burns in Madrid

Argentaria, the partially privatised banking group, has spent more than Pta39bn (\$302m) to raise its stake in Endesa, the profitable state-controlled electricity generator, from 1.2 per cent to 3 per cent. The move underlines the growing concentration of equity in Spain's blue-chip companies.

Argentaria's move brings its shareholding level with Banco Santander, the leading domestic banking group,

which paid Pta50bn for a 3 per cent stake in the utility in a surprise acquisition announced in April.

Both Argentaria and Santander will now have seats on Endesa's board. Endesa, which is 66 per cent stateowned, is likely to tap the markets in the near future and Argentaria now joins Santander as a candidate to manage the forthcoming disposal of state-owned equity in the utility.

Analysts expect the government to sell at least 15 per cent of Endesa - an

offering which would be worth about savings bank, has acquired a 5 per Pta250bn at current market prices before the end of the year. the past three months,

The changing equity structure at Endesa reflects the creation of a simion the international markets in lar hardcore shareholding base in March realised \$1.1bn and reduced the Repsol, the profitable oil, gas and state's holding in the banking group from 50 per cent to 25 per cent. The chemicals group which is 10 per cent state-owned, Banco Bilbao Vizcaya group could be fully privatised after the completion in September of the six-month lockout period that (BBV) is understood to have recently raised the 5 per cent stake it con-trolled in Repsol to 7 per cent, and La Caixa, the big Barcelona-based followed March's secondary share ISSUA.

Tisco surges as prices Casino to restructure debt with bond issue and output improve by RsI a share to Rs4.5, which By Andrew Jack in Paris claimed Rs1.57bn.

Casino, the French retail The Jamshedpur plant, group, is to launch a FFr3.4bn (\$556.8m) bond issue on June which reaped the "full benefits" of the third phase of mod-10 in an effort to restructure ernisation last year, raised its debt and retnforce its crude steel production 3 per cent to 3.02m tonnes and

capital base. The bonds, with a nominal value of FFr220 and a duration improved saleable steel production 11 per cent to 2.71m tonnes. The company aold 2.49m tonnes of steel, up 11 per cent on the previous year. of five years, will pay an annual coupon of 4.5 per cent, or FFr9.9. Bach will carry the right for a conversion into sbares at FFr220 each The Rs23bn fourth phase of

modernisation, now under way, will raise the capacity of over the coming three and a half years. It has also announced that saleable steel to 3.2m tonnes a Mr Antoine Guichard, 70, the year from 2.7m tonnes. The modernisation is also designed bead of the board and grandto change the product mix in favour of items offering higher son of the founder of the group, will step down. He is to be replaced by Mr Georges

Plassat, 47, the vice-chairman. In addition, the group confirmed at its annual meeting that its net income for 1995 was up 29 per cent to FFr633m on turnover ahead 3 per cent to FFr64.1bn.

Casino said it planned to reimburse a series of convert-ible bonds at FFr262.50 with effect from June 18 this year. Investors wishing to convert the bonds into equity will be able to do so until September 30.

The details come during a time of intense change in the French retail sector. The government is reinforcing measures designed to tilt the balance of power away from large bypermarkets and towards smaller shopkeepers.

CREDIT RATINGS in emerging markets

This directory lists for the first time in a single source over 3,000 credit ratings assigned by 30 rating agencies - 10 international and 20 local - to emerging market fixed-income securities in:

Argentina • Bahrain • Bangladesh • Brazil Bulgaria • Chile • China • Colombia • Cyprus Czech Republic • Ecuador • Egypt • Greece Hong Kong • Hungary • India • Indonesia Israel • Jordan • Korea • Kuwait • Lebanon Liberia • Macau • Malaysia • Mexico • Oman Pakistan • Panama • Peru • Philippines Poland • Portugal • Qatar • Romania • Russia Saudi Arabia • Singapore • Slovak Republic Slovenia • South Africa • Sri Lanka Taiwan • Thailand • Tunisia • Turkey United Arab Emirates . The 401(k) market nears maturity

Maggie Urry analyses one of the fastest growing segments of the pension fund investment sector

When the writers of the US tax code added section 401(k) in the early 1980s, they might not have guessed the number would enter the language of investment managers

Now the tag 401(k) has become shorthand for perhaps the fastest growing segment of the pension fund investment market. It is an area fund managers are fighting over. As Fidelity Investments, the

leading provider of 401(k) plans with over \$100bn in assets under management, wrote in its recent annual report, "the 401(k) refirement market became much more competitive from both a product and a pricing standpoint as mors firms went after this market".

Or as Mr William Chapman, president of the Retirement Plans group at Zurich Kemper Investments, puts it, when a market is growing at 15 to 18 per cent a year and showing no signs of elowing, it is not going to remain a secret.

In a 401(k) pension plan, an employee contributes to a per-sonal pension plan, with the employer matching those up to a certain level. The employee chooses bow the money will be invested, usually by picking from a range of options which might include a bond fund, an index fund, an equity growth fund, a money market fund, and perhaps the employer'a

The options are usually provided by mutual funds, and the plan may be managed by a fund group, or a bank, insurance company or investment consultant.

The attraction to the employer of defined contribution plans are that they are cheaper to run, and, perhaps more importantly, pass the investment performance risk to the employee. Under a defined benefit scheme the employer must top up the fund if it does not produce the returns needed to pay the promised pensions. With a defined contribution scheme, it is up to the employee to decide bow much to invest and where.

The advantage to employees is that they control the plan, We've been very satisfied. Now other vendors are moving into can choose investments which our market, we're crossing the street and moving up". Profits are hard to come by, as the costs involved in runsuit their needs, such as the nearness of retirement, and can take their pension with ning a 401(k) plan for a small

them if they change jobs. More than 10 years after 401(k)s became available, most company are proportionately higher than for a large one. Mr John Stoma, director of retirelarge companies have them. Estimates by Access Research ment plans at Oppenheimer, and Goldman Sachs suggest that 96 per cent of companies reckons it can take six years to make money in the small plan market. The market is "attracwith over 5,000 employees offer 401(k) plans.

tive but daunting" he says. In these cases, fund manag-Competition is fierce and "price is a hig factor," he says. "The critical element in winers can are only able to win new business by taking it from competitors. In 1995, Fidelity did that, ning and retaining 401(k) husi-ness, according to Mr Milton Berlinski, a vice-president at

The Oppenheimer small plans" and that means Fund group, in conjunction with its parent Mass Mutual, the life insurance company, offering a standardised prodnet

"Economies of acale are abother solution. "It is truly a last July launched a 401(k) "turn-key" product aimed at business where the larger you are the lower cost you can offer to the market," Mr Reyn-olds says. At Fidelity, the aim companies with under 800 employees. Meanwhile, Zurich Kemper's is to spread into related areas

Mr Chapman says its focus has such as managing employee health benefits. And it is makalways been on small companies but is shifting to larger ones. It manages 5,000 plans, totalling assets of over \$2bn, with an average of fewer than 100 people in each. "Many coming an assault on international markets. They may not be called 401(k) plans anywhere else, but the principle of employee directed portable panies have avolded them," says Mr Chapman, "because It pensions is being adopted is difficult to make profits. around the world.

Dusseldorp is commuting from Tahiti Dik Dusseldorp would probably prefer

Why Dik

a different epitfiet, but the 77-year-old Dutch-Australian can rightly claim to be the godfather of property securitisation, writes Simon London. His campaign to create a new breed of property investment vehicles in the UK received a boost last week when the London Stock Exchange published draft rules enabling property unit trusts to seek a full listing.

If the Securities and Investments Board gives him the regulatory nod, Dusseldorp plans to raise at least 2200m (\$300m) from institutions to create the first listed property unit trust.

Born in Utrecht, Dusseldorp ran away to sea in his early teens and trained as an engineer before moving to Australia.

In the 1950's he founded Lend Lease, the property and financial services group which now has market value of over A\$4bn (\$3.2bn).

In 1971, he floated General Property Trust, effectively spinning off Lend Lease's property portfolio into an investment trust-style vehicle. Lend Lease kept the more risky

business of property development, as well as managing GPT, which is now the cornerstons of its investment division.

Six years later Dusseldorp repeated the trick in the US by launching International Income Property, one of the first real estate investment trusts to invest in buildings rather than mortgages

Today the US equity REIT market is worth about \$45bn.

Dusseldorp's dream is to create similar tax-efficient property investment vehicles in the UK.

Despite the strain of commuting between London and Tahiti, his home since retiring as chairman of Lend Lease in 1988, his persistence appears to be paying off.

Hashimoto in a furore

Toru Hashimoto (no relation) of Fuji Bank as the head of the influential industry federation in April. He is Sakura's second president

since it was created in 1990 through a merger between Taiyo Kobe Bank and Mitsui Bank.

Mr Hashimoto, who is from the Taiyo Kobe camp, spent most of his career on the domestic side of the business and was installed as Sakura's president in 1994.

He faced mounting criticism last week from members of the cabinet over comments implying that . politicians should leave monetary policy up to the Bank of Japan. His words were designed to counter calls by Seiroku Kajiyama, chief cabinet secretary, for financial institutions to review their low

interest rates on behalf of depositors. Those who know Hashimoto well have been surprised by the furore, as he has a reputation for being reserved. and meticulous, rather than the aggressivs and arrogant banker the Japanese media and politicians have made him out to be. He showed his flexible side when he quickly retracted the remarked and apologised.

But with politicians expected to keep up the pressure on banks ahead of the general election that must be beld. within a year, it remains to be seen whether Hashimoto can defend the interests of the industry over deposit rates and the jusen housing lenders' liquidation.

TO:

interests was something Halliday became adept at, although he says when it came to the crunch his jobalways came first. In 1987, for example, he missed the World Cup because he could not afford to be away from the office for too long. Some might think Halliday's

handsome compensation as a City stockbroker would help ease the pain of having retired just as rugby was going professional, but he says he has no regrets at missing out on the sport's new era.

"I couldn't spend hours on the training pitch. I always loved playing rugby on Saturday on the basis that on the following Monday I was doing something completely different."

Martin Falkner's electric run

May has been a good month for Martin Falkner, director and head of utility advisory in the corporate finance department at BZW, the British investment bank, writes Simon Holberton.

Fresh from advising Avon, a joint venture between Cynergy and General Public Utilities, both of the US, about their agreed £1.7bn bid for Midlands Electricity, he is now in the thick of advising Southern Electric on its £1.6bn agreed bid for Southern Water the south-east of England water utility Falkner, 37, said BZW worked on the Midlands deal for nine months before bringing it off. He has worked on the Southern Water deal for a "rather shorter" period of time. "Ws called them and made the suggestion," he said. "But it was coincident with what they were already thinking about.

Their traditional advisers, Rothschilds, were conflicted as they were advisers to Sothern Water so we stepped in." He stresses, however, that the deals have been a group effort by BZW's

corporate finance team. Falkner has worked in the utilities area for much of his professional life. He joined BZW in New York in 1988 where he was a member of the energy and utilities group. The New York group advised on

Oryx Energy's \$1.3bn share buyback and capital reconstruction, Tenneco's \$500m spin-off of Albright and Wilson, the specialty chemicals company. , and Enron's move into India.

The Enron transaction was a landmark deal," he says.

"We designed the capital structure of the deal and its financing. Falkner returned to his native UK at the end of 1994, having in the meantime scquired an American wife and a liking for starched white shirts. He promises to give up the latter for "stripes on stripes" as soon as they all wear out.

NOTICE OF DISTRIBUTION MONTREAL TRUST COMPANY OF CANADA

ALL HOLDERS OF SERIES 1-6 1998 CONVERTIBLE DEBENTURES ISSUED BY

BRAMALEA INC. (the "Debentureholders" and the "Debentures" respectively

NOTICE is hereby given that Montreal Trust Company of Canada (hereinative referred to as the "Trustee") will be making a partial distribution to Debentureholders of proceeds realized upon enforcement of its floating charge (the "Security") under the trust indenture dated as of August 15. 1985 as emended (the "Trust Indenture").

tures were originally issued under the Trust Indenture as 11-1/8% Senior Debentures due August 15, 1992, 10-1/2% Senior Debentu the February 27, 1996, Floating Rate Senior Debentures due October 27, 1995, 10.20% Senior Debentures due June 30, 1999, 10.45% Senior Debentures due June 30, 2014 and 10-1/2% Senior Debentures Due November 30, 1999. Pursuant to the Tenth Supplemental Indenture dated March 22, 1993 the Debentures were redesignated as Series 1, Series 2, Series 3, Series 4, Series 5 and Series 6 1998 Convertible Debentures

The Trustee has available for distribution Cdn \$54,653,990.80 in the aggregate. The total principal amount outstanding on the Debentures is Cdn \$200,197,768.46 (after conversion of Series 1 and Series 3 to Canadian dollars as described below). Accordingly, the amount of the distribution represents approximately Cdn \$0.273 per Cdn \$1 of principal amount in the case of Series 2, 4, 5 and 6 Debentures and U.S. \$0.273 per Cdn \$1 of principal amount in the case of Series 2, 4, 5 and 6 Debentures and U.S. \$0.273 per U.S. \$1 of principal amount in the case of Series 1 and Series 3 Debents

Pursuant to the Trust Indenture, proceeds upon sale or realization of the Security are to be applied in payment of amounts owing on the res rateably and proportionately in the priority of principal first, then premium, if any, and then interest. Accordingly, all payments made as a part of this first distribution are on account of principal as at March 22, 1994.

For purposes of this distribution, U.S. dollars have been converted to Canadian dollars on May 28, 1996 using the exchange rate of United Sta \$1.00 = Canadian \$1.3767.

Series 1 1998 Convertible Debenfures ("Series 1 Debenfures"

The Trustee will pay to Series 1 Debenturcholders the sum of U.S. \$0.273 for each U.S. \$1 principal amount of the Series 1 Debentures held by them (the "Series 1 Payment"). The Series 1 Payment will be made on a date determined by the Trustee and will be no later than July 5, 1996 nor earlier than June 21; 1996.

A Series 1 Debentureholder, other than one whose Series 1 Debenture(s) is/are held by Cedel Bank or Morgan Guaranty Trust Company of New York, Brussels office, as operator of the Euroclear System ("Euroclear"), wishing to receive the Series 1 Payment in respect of his/her Series sture(a) must present his/her Series 1 Debenture(s) to a Paying Agent at any of the specified offices set out below

In the case of Series 1 Debentures held by Cedel Bank or Euroclear, the Series 1 Payment will be made to Series 1 Debentureholders of record at the close of business in London, England on June 10, 1998, through the account of each Series 1 Debentureholder at Cedel Bank or Europleer, an the case may be.

KLM's fourth-quarter net INational Grid: The UK

The debate mon goal of shareholder value, into three broad classes: public effort into courting the private over stake. The private reality sounds service pension funds, mutual pension funds. There have funds and other investment companies; and private sector pension funds. The public sector funds form the spearhead of the activist movement. They report ultimately to elected politicians from investing in them. and are mostly underfunded. This puts them under extra

pressure to perform, since the alternatives are cuts in public services or higher taxes. At the other extreme come the company pension funds. They report ultimately to cor-

porate managers, whose interests are opposed to investor power and whose instincts are to close ranks with fellow managers. Mutual funds and insurers come in the middle Tactics for adjusting the

shareholder register vary. The must be judged. Generally, managers are

been more devious approaches: Mr Useem suggests that in the days of apartheid, one or two may have deliberately retained subsidiaries in South Africa, thus barring most public funds

Despite the best efforts of managers, the onward march of investor power seems inevitable. One reason is the emile sive growth of the mutual fund industry. Granted, most mutuals are not particularly activ-ist, but they are plainly more powerful than the individual investors whose shares they are buying up.

It is in the light of this shift, and the corresponding weakening of managerial power, that the stakeholder movement

FINANCIAL TIMES MONDAY JUNE 3 1996

Last week was a challenging one for the US securities markets. By the end of it, the yield on the long bond was barely below 7 per cent, and had crossed thet line three times during the day. Stocks took their lead from

the bond market and on three days out of the four that the markets were open, the Dow Jones Industrial Average fell more than the 50 points needed. to trigger the "uptick" rule.

What has made the markets nervous is the increasing expectation of a tightening of interest rates, perhaps as soon as the early July meeting of the Federal Reserve policy makers. Stronger than expected housing statistics and a revision in first-quarter GDP, which indicated that second-quarter growth would also be faster than predicted,

raised the concern. But perhans more worrying was the flood of hawkish remarks from a number of Federal Reserve officials which led the market to think it was being prepared for an interest rate increase.

The next big event for the markets will be the release of employment data for May on Friday. In a survey by MMS International, the consensus of forecasts is that non-farm payrolls will have risen by 170,000, a jump from the 2,000 figure reported for April. However, there is a wide

in M4 of about 10 per cent is not consistent with inflation at 2.5 per cent in the long run." With little domestic news to interest either gilt or equity investors, eyes will turn to Friday's US non-farm payrolls data for May.

In recent months, these erratic figures have shown the capacity to move bond markets sharply and if the yield on the 30-year US Treasury bond shifts back decisively over 7 per cent, it will be hard to see gilts or equities making

The Bundesbank last week failed to provide a . much-needed impetus, leaving the securities repurchase rate unchanged at 3.3 per cent for at least another two weeks. It is clearly waiting for more economic data, including money supply figures, and perhaps an indication of the outcome of the public sector wage round, before deciding whether and when to cut the repo rate. Inflation seems to have bottomed out, edging up in western Germany from an annualised 1.2 per cent in Amril to 1.5 per cent in May, largely due to rising energy prices and the depreciation of the D-Mark against other currencies. The government is still sticking to its forecast of a rebound in the economy in the second half, a view that the Bundesbank is known to share. This expectation is partially reflected in the equity market, even though the DAX index appears stuck around the 2,500 mark

MARKETS: This Week

The make-up is not uniform, however. As investors have hunted for bargains. medium-sized DAX 100 stocks have outperformed blue chips. After heavy restructuring and stepping up foreign investment, many German blue chins have proved

Small and medium-sized companies, usually more reliant on Germany as a market and a source for labour, tend to be more sensitive to the domestic cycle And if the economy turns up this summer, as not only the government and the Bundesbank hope, that sector could benefit over-proportionally.

TON YO BY ETHON TH 42 P. Trading on Tokyo's financial markets are expected to remain relatively quiet as investors await the release of the Bank of Japan's tankan, or quarterly survey of business confidence, due on Friday. Most economists expect a small improvement in sentiment. "We expect a modest improvement in business sentiment among both manufacturers and non-manufacturers due to rising output and profits and an outlook for stable interest rates and exchange rates," says Mr Michael Hartnett at Merrill Lunch in Tokyo. Capital investment plans at

large companies are expected to be revised upwards as productivity continues to recover. Mr Hartnett sees capital investment plans at 3 per cent, up from the 0.6 per cent reported in February. The tankan figures could confirm the increasing unlikelihood of monetary tightening by the Bank of Japan. Fears that the central bank would allow short-term rates to rise have started to recede on the bond market, improving investor confidence. The maturing of Y5.750bn in 10-year government bonds this month and in July have also helped sentiment on the bond market. With the stock market

A possible default of yen bonds issued by a Bulgarian bank could hit confidence of retail investors. Some Y5bn in Mineralbank bonds mature on June 14, but the likelihood that investors will be reimbursed is

diminishing. Retail investors seeking higher yields have been active buyers of low-grade yen bonds from overseas issuers. The. small secondary market for . samurai bonds prevents panic selling, but future fund-raising by such issuers through year bonds might be affected.

time round".

Aluminium stoppages possible

the year at its lowest ever level

The aluminium market has been under pressure of late. With London Metal Exchange warehouse stocks of the metal rising and economic recovery disappointingly slow, the LME price for three months delivery has struggled to stay above \$1,600 a tonne.

Any investors with bullish inclinations could find encouragement this week, however, if labour contract negotiations at leading US production facilities look like resulting in stoppages.

Three-year contracts emired on Friday at a long list of companies, Alcoa and Reynolds being the most important to the market.

the way

recently in the core European, US and Japanese markets, hut investors appear anxious to pick up the extra yield available on paper from developing nation issuers.

This is shown hy the growing volume of issuance in the international bond markets by borrowers from Latin America. the Far East and eastern Europe so far this year. Fig-ures from Euromoney Bond-ware show that more than \$30bn has been raised in 1996 from 174 aeparate issues of eurobonds, samurais and yankees. That is already twothirds of the \$45.7bn raised during all of 1995.

Yields on emerging market issues traded in the secondary market have fallen by an average of one percentage point over the last 12 months, with Latin American corporate securities performing particularly strongly. Spreads on a dollar bond issue by Cemex, the Mexican cement company, have tightened by 140 basis points over the last three months, for example. Maturities of emerging market issues have lengthened, as

investor perceptions of credit risks have improved. Argentina recently issued 15-year bonds, for example, while Mexico swapped some \$1.75bn of Brady paper for 30-year dollar-denominated bonds, Brazil said last month that it is contemplating a similar programme

Against this background, bankers accompanying Roma-nian officials on a roadshow in Europe and the US expect to secure attractive terms on the country's first ever eurobond issua. Maturity and size are still to be decided.

Led by Merrill Lynch, tha bond will be listed in Luxemtranche aimed at qualified institutional buyers in the US under Rule 144a. Romania's recent record in international markets as well as the performance of similar if not exactly comparable credits gives some

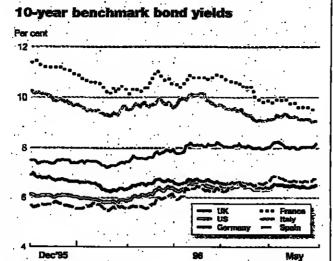

clue to likely pricing. The National Bank of Romania (NBR), the country's central bank, has still to decide the timing of the issue hut is expected to be looking to raise about \$150m over three years in its sixth capital raising evercise since it re-entered the capitals market in 1995 after an absence of more than a decade. NBR raised \$150m in a oneyear syndicated loan arranged by Citibank last March and a further \$110m in an 18-month deal on the syndicated market in October last year, also led by Citibank. It followed those deals with a 15-month \$90m syndicated loan, led by Sanwa in April this year. In between, in February 1996, NBR raised some \$50m through a five-year privately placed

bond issue in the US, led by Merrill Lynch. And last month the bank raised Y52bn with a three-year samural bond led by Nomura. Rates on these borrowings have steadily fallen. The bank paid 2.75 per cent over Libor on

the first loan. That rate fell to 2.25 per cent on the October loan and the February private placement, and 1.75 per cent on the April loan. The bank paid yen Libor plns 2.80 per cent (roughly equivalent to dollar Libor plus 3.10 per cent) on the samurai loan, swapping the proceeds into dollars to achieve a fund-

ing rate equivalent to 3.36 per cent over the interpolated Treasury bond yield. Turkey, which has a slightly lower credit rating from Standard & Poor's (B+ as opposed to BB- for Romania) and the same from Moody's at Ba3, issued a five-year bond in May, which is now trading at 230 basis points over Treasuries.

Bonds issued by three Latin. bourg and will include a American sovereign borrowers

British beef battles back

EU farm ministers are likely to reject the Commission's proposal for an early lifting of the ban on UK exports of beef by-products. The move will force the Commission to impose the measure unilaterally. Meanwhile, negotiations seem well underway on a framework agreement for the broader ban to be lifted. Both conditions laid down by John Major, the UK prime minister, as precursors to Britain ending its non-cooperation with the EU, would theo be fulfilled.

Arafat makes Oxford speech

Yasser Arafat, the Palestinian president. makes his first speech since the election of Benjamin Netanyahu as Israeli prime minister cast doubts on the future of the Middle East peace process. Mr Arafat will address the Oxford Union after meeting the UK prime minister, John Major (to June 4).

Nato conference in Berlin

Nato generals and politicians from the member states meet in Berlin to reform the internal structures of the military organisation (to June 4). The aim is to give Nato greater response flexibility. At the same time, there is expected to be a debate about how far to go in expanding Nato eastwards - which unsettles Russia.

UK blocks EU decisions

Britain's blocking of decisions requiring unanimity in the council of ministers will impact on meetings of EU finance and. separately, social affairs ministers. Policies likely to fall include measures to combat fraud in the EU and a proposal to make 1997 the "Year against Racism". Preparations for the heads of state summit in Florence will not be affected.

Greece holds shipping fair

shipbuilders and marine equipment suppliers. However, most business is done during a dizzying round of parties and aboard Greek tycoons' yachts I to June 6).

UN conference on cities

The United Nations Conference on Human Settlements opens in Istanbul to discuss the future of the world's overcrowded cities (to June 14). This is the last in the series of UN mega-conferences following those on women (Beijing), population (Cairo), buman rights (Vienna), the environment (Rio de Janeiro) and the "social summit" (Copenhagen).

Monica Seles of the US triumphs over Magdalena Maleeva of Bulgaria to move into the quarter-finels of the French tennis Open. The finals are at the weekt

culminate in a defeat for the minority conservative coalition government of Mesut Yilmaz. Mr Yilmaz's alliance partner, Tansu Ciller, and the Islamist Refah party have both said they will vote against him. If be loses, Mr Yilmaz or another party leader must try to form a new cabinet. If all else fails elections will be called - only seven months after polls gave no party a clear mandate.

TUESDAY

Irish president visits UK

Mary Robinson, the president of Ireland, arrives in London on the first official visit to the UK by an Irish bead of state since its independence (to June 7). Her trip elebrates the links between the countries at a time of increasing proximity between their governments. Ireland also represents Britain's sixth biggest export market. As well as seeing the prime minister, John Major, and the leaders of the Labour party and the Liberal Democrats, Mrs Robinson will breakfast with leading industrialists. She will have lunch at Buckingham Palace and, in deference to the Viking roots It shares with Dublin, visit York.

designed to tackle problems such as terrorism and the drugs trade. A compromise aimed at meeting the UK's objections to a ruling on Europol disputes could become a victim of the UK's policy. Other subjects include the battle against illegal employment of immigrants from third countries.

WTO In US maritime talks

Senior negotiators meet at the World Trade Organisation in Geneva to see what can be salvaged from the wreckage of talks on liberalising maritime services following Washington's apparent decision to withdraw (to June 30). The EU has been negotiating to present a package of market-opening offers in the hope that the US can be persuaded to change its mind, However, an about turn is unlikely, given the strength of the US maritime lobby and the impending US presidential election.

Athletics

World chess championship Anatoly Karpov, the International Chess Federation -(Fide) world lonship bolder, begins a much-postponed match with Gata

Kamsky (to July 14). The 20 games will he in the Caucasian republic of Kalmykia, whose 34-year-old president, Kirzhan Dyumzhinov, is putting up \$2m (£1.3m). Dyumzhinov is also the Fide president. The winner should meet Garry Kasparov, the real number one and champion of a breakaway group.

China/US discuss piracy

Chinese and American negotiators resume talks on China's implementation of a February 1995 agreement on curbing intellectual property rights abuses (to June 7). The US has threatened to impose sanctions on Chinese imports unless Beijing fulfils undertakings to stop rampant piracy of US entertainment and information products. The deadline is Jone 17. China has said it will retaliate.

FRIDAY

Japanese confidence tested Fresh light will be thrown on Japan's economic recovery following its worst downturn since the 1930s, when the Bank of Japan releases its quarterly Tankan survey of corporate confidence. The index is expected to register a slight improvement on the last Tankan, which showed Japanese companies were at their least gloomy for four years. However, the balance between husinesses reporting better and worse conditions is likely to remain slightly negative. This would confirm the BOJ's belief that now is not the time to raise interest rates.

FDP congress in Germany

The liberal Free Democrats, the junior coalition partner of Germany's chancellor. Helmut Kohl, hold their annual congress in Karlsruhe, Baden Württemburg (to June 9). Although there may be attempts by the party's traditional wing to revive the civil liberties profile of the FDP, the message from Wolfgang Gerbardt, its leader, is that the liberals are Germany's only real proponents of low taxation.

French PM goes to Canada

Alain Juppé arrives in Ottawa for the first visit by a French prime minister to Canada since 1987. Mr Juppe's talks with Jean Chretien, his Canadian counterpart, are expected to focus on the upcoming meeting of the G7 group of leading economic powers in Lyons. However, interest will centre on Mr Juppé in Quebec. The French speaking province's separatist government would like a hint of an endorsement for Quebec independence.

Peru offers big equity issue

In promoting what may be Latin America's largest equity offering this year, the roadshow of Telefonica del Peru starts in Miami. The team seeks foreign investors to buy up to \$1.4bn in shares and will visit 23 cities in the US, Asia and Europe.

Football

Euro 96 - the European football championship finals - kicks off at Wembley stadium. London, with England playing Switzerland. The qualifying started in September 1994, with 47 national teams. Now, 230 games later, 16 finalists compete in a tournament that is expected to attract around 250,000 foreign fans to British stadiums. The favourites are Germany, Italy and Holland. The tournament is the world's third largest sports event - after the Olympic Games and the soccer World Cup.

forse racing

The English Derby, for three-year-old colts 1% miles, Epsom racecourse - is likely to be an unusually wide-open race.

A bridge too far?

Voters decide whether to spend up to SFr700m (£363m) on a road suspension bridge or tunnel across Lake Geneva in 15 Switzerland, The idea - to relieve Geneva's traffic

congestion - was approved in a 1988 referendum. However, it may not be needed and a Yes vote would mean higher vehicle licence duties - painful for a city with one car for every two inhabitants.

50th anniversary of Thai king

Thailand celebrates the 50th anniversary of the compation of King Bhumibol Adulyadej, the world's longest-reigning monarch, Although a constitutional monarch, the king, through his many social work programmes and discreet but intense interest in his country, has gained so much respect that be has built up a "reserve power" - which be bas exercised in moments of crisis.

Compiled by Simon Strong. Far: (+44) (0)171 873 3194.

Some of the 12 states are calling for a cut in quotas to prevent a drop in oll prices.

Other economic news

Monday: The UK's purchasing managers' index should underline current manufacturing weakness although demand for consumer goods is expected to have strengthened. Growth in UK M0, the narrow money supply measure, is expected to have risen again last month, pointing to strength on the high street. Tuesday: Economists think

US factory goods orders fell in April. Japan is expected to record a further contraction in its trade account surplus in April.

Wednesday: German gross domestic product is forecast to have fallen again in the first quarter of this year. However, German manufacturing orders data for April due this week are expected to show that demand has begun to recover. No change in interest rates is likely at the latest UK monetary meeting between the chancellor and the governor of the Bank of England.

Thursday: The latest snap-shot of UK retail sales will be provided by the Confederation of British Industry's distributive trades survey for May. Friday: The US employment

report is expected to show a further steady increase in non-farm payroll jobs last month.

in the haze of summer.

A slim chance to stop the drift

'Hard realities have again closed in on September last year, when Mrs Çiller called early aiections. The elections, held on December 24, produced a hung parliabreakdown of the ment, giving no party a clear mandate to rule although the Motherland-True Islamist Refah party won most Path coalition. This votes, taking 158 seats in the 550-member parliament. survey was written

between Mr Yilmaz and Mrs Ciller for control of the divided y tradition, Turkey's iong, hot summers centre-right is disrupting the entire country. Decision-makare a time when ing in the capital, Ankara, is Turks can turn their paralysed because the cabinet has ceased to function norbacks on their country's problema. Difficulties which mally. Business decisions are appeared so overwhelming also on hold wherever possible: only a few months ago, seem to planning more than 60 days diminish. if not vanish comahead is considered too risky. pletely. Worries over inflation. The struggle for supremacy

between the Motherland party monerative government; even the interminable war against of Mr Yilmaz and Mrs Ciller's **Kurdish** separatists in the True Path party is not new: the south-east, all seem to get lost centre-right split 13 years ago as Turkey returned to civilian rule. This conflict has virtually But not this year. Summer has intensified the political halted reform since early 1990s, battle between the country's allowing Turkey's array of social, economic, political and two rival conservative leaders foreign policy problems to escalate to their present critical state.

An ungainly ailiance between the True Path and the centre-left People's Republican party (CHP) ruled Turkey from

Turkey has been adrift since 1991-96 first under Mr Süleyman Demirel, now the president, then under Mrs Ciller, while Motherland remained in opposition. But the left-right coalition's ideological division prevented important economic reform and political reforms.

Neither Mr Yilmaz nor Mrs Çiller has successfully The fight to the finish addressed issues such as Turkey's unsustainable government budget deficits; its collapsing infrastructure; rising social discontent; the 12-year Kurdish rebellion in the southeast; remedying Turkey's human rights record. Although there is a national consensus on how to solve many of these issues - an opinion poll recently found that 57 per cent of Tarks support privatisation - action requires determined government

Turkey's troubles are becoming so acute that delay in confronting them is making the inevitable reforms infinitely more painful.

The most obvious and dangerous hazard is the risk of an impending financial market crisis or even hyperinflation caused by rapidly mounting government budget deficits (up by one-third in dollar terms over tast year, to a forecast

be financed locally, but could soon grow too big for domestic markets to handle. The treasury's debt rose by nearly a quarter in dollar terms between January and

April alone, to almost \$30bn. Real yields now stand at about 50 per cent e year and maturitiss are no greater than 180 days, reflecting deep misgiv-ings over the credibility of government policies.

The huge transfer of wealth from the treasury to its lenders - roughly \$8bn in 1995, maybe twice that this year - is further dividing society between an increasingly wealthy and ostentatious minority and the majority struggling to survive inflation and low wages.

Social discontent is rising as opportunities for advancement among the dispossessed recede. Adequate education, housing and jobs appear beyond the reach of more and more people. A bloody May Day rally in Istanbul in which three people were killed revived fears, particularly in the business community and the middle classes, of more unrest to come.

Yet it would be wrong to write Turkey off as a basket case. Most of its problems can be resolved by a period of deci-\$12bn). Nearly all of this must sive government. Whichever

Aggressive tax reform is ening the tax base, lowering rates and stamping out avasion. Tax dodging is so widespread that closing down the underground economy (reckoned to be as large as the official one) would easily eliminate the budget deficit.

Lowering inflation would make the treasury's debts more manageable and bring down interest rates, so that companies would invest more. Deregulation and privatisation would further cut government deficits, boosting productivity and growth as well. Privatising the utilities would also avert

impending electricity cuts. Turkey's economy is a chronic underperformer, but growth could accelerate to 8 per cent a year in a stable envirooment, fostering social stability by creating more jobs, raising living standards and reducing the widening gap between rich and poor.

A strong, stable Turkey could even feel confident enough to find a political solution to the 12-year Kurdish uprising. The military justifies

political deadlock is so tight. Mr Cem Duma, a top diplomat turned business consultant, says "there is no rational dialogue" between the bureaucrats and politicians who defend the corporatist system 1993-96 coalition government of big state companies, strong by stoking anti-PKK national-

minimum of social justice, even some captains of industry believe a coalition with Refah's participation could bring a period of stable governmant. Big business trusts Motherland's formidoble economic team, led by Mr Rüsdü Saracoğlu and reckons it can live with the Islamists.

Mr Erol Sabanci, scion of one of Turkey's most powerful industriel families seys a "Motherland-Refah [coalition] would be better-performing than this government. Personally, 1 am not worried about [Refah] in government. i am not saying they will be successful or not, but [the threat of Refah] has been exeggereted outside Turkey."

Yet Refah's populism could speil aconomic disaster if allowed fuli rein. its radical core, which wants to establish an Islamic republic, could lead to trouble with the army.

Doomsday scenarios are twoe-penny in Turkey these days. Some pundits predict Algerianstyla civil war, others e Brazillike byperinflationary collapse into disorder, or a return to the street fighting that led to the 1980 military coup.

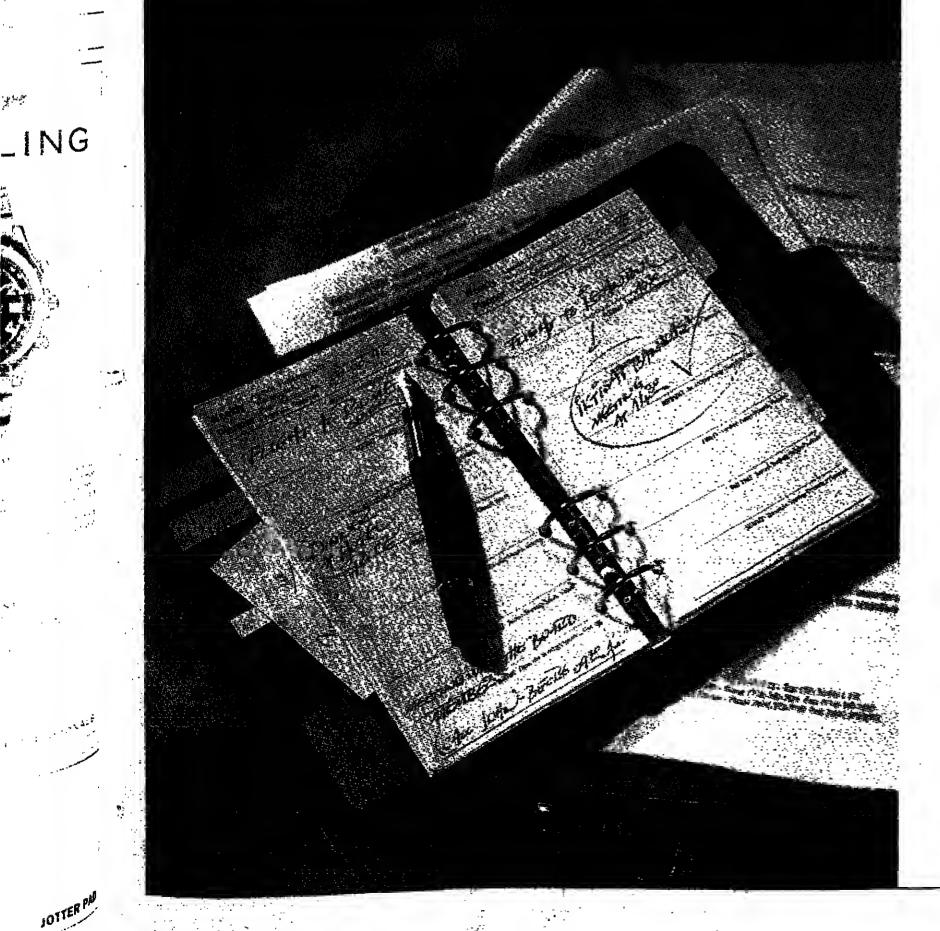

They are all likely to be proved wrong. Turkey's strength is an extraordinary ability to muddle through. This ia also its great weakness because it has allowed the ruling elite to prolong irresponsible policies that do great damage to the people and the country's future. Turkey's frienda must hope that the next prime minister will have the vision to steer the country

Π

The economy The tightrope walker's next trick

Domestic debt is the most urgent problem. Already, inflation is running at 81% a year

Turks take a perverse pride in their mastery of economic tightrope walking. The country almost toppled over in 1994, when government overspending led to a balance of pay-ments crisis and Turkey's worst recession in recent history. But the economy bounced back within six months, post-ing 8 per cent growth in 1995. Although the government

promised tough policies in 1994 to avoid another hrush with doom, it pushed through few meaningful reforms. Two years on, it is again defying the laws of ecocomics hy pursuing unsustainable policie

Some analysts fear that without corrective measures which depend on increasingly uncertain political factors - it is only a matter of time before Turkey must choose between hyperinflation or a government default on its hulging domestic currency debts. A senior US banker in Istanbul says: "Turkey is reaching the hrink. It needs to decide whether to be a

basket case or move on." The domestic deht is the government's most urgent problem. Although the debts are relatively small - the portion held by the public was equivalent to \$23.53bn, or 14 per cent of GDP at the end of 1995 - but they are becoming increasingly unmanageable.

Maturities bave sborteoed to little more than 190 days and real interest rates fluctuate between 20-50 per cent a year as financial markets demand higher and higher risk premiums. As the government's budget deficit grows, so do the risk emiums, further inflating the deficit and the debt.

The deht grew by nearly a quarter in dollar terms in the first four months of the year. This year's deficit could easily exceed \$12bn. about 7 per cent of (officially recorded) GDP, against \$8.6bn in 1995.

Few ecocomists expect Tur-

ing its \$73.78bn foreign debt Indeed, international lenders take a sanguine view of Turkey, charging a relatively low premium of 2 percentage points over international benchmarks for its latest \$500m three-year Eurodollar loan.

However, there may be limits to the international market's appetite for financing ths treasury. Although Turkey borrowed over \$1bn overseas in the first balf of this year, this was still less than its debt service bill for the period. Stan-dard & Poor's, the Wall Street rating agency, says Turkey is the second weakest of the 58 countries it covers, losing only to Venezuela, S&P rates Turkey's long term at a below

investment grade B+. The government's deficit could soon be so large, and interest rates so high, that it cannot be financed locally or overseas. Servicing the domestic debt already absorbs two thirds of tax revenues and half the budget. With political chaos in Ankara, the public sector borrowing requirement's growth shows no sign of abat-

Ministers will soon have to choose betweeo default or accelerating monetisation of the debt, risking hyperinflation. Inflatioo is already running at 81 per cent a year. The market senses this, charging premlums reserved for the very highest risks.

Mr Volkan Sari, market strategist at Global Securities, an istanbul brokerage, says "the markets are very, very oervous. [Annualised] yields on treasury bills bave gone to 135 per ceot from 115 per cent one week ago, There is going to be a crisis in the autumn, possibly with byperinflation and a loss of control over the

curreocy." However, some foreign bankers believe the treasury could impose a unilateral debt tion, but experience in Latin

year's exports were probably far higher than the officially recorded \$21.98ho, Anecdotal evidence suggests investment is also understated.

Yet the burden of public sector inefficieocy, with its high taxes, regulations and decaying infrastructure, is considerable, Companies pay more for electricity than their international competitors, political instability discourages investment, few companies plan more than 60 days in advance. The large underground economy, far from being a source of pride - Turks say it demonstrates their adaptability and dynamism - merely shows that businesses cannot function normally in the highly regulated formal system. The underground economy also adds to the government's budget deficit by evading taxes and not paying for public services such as electricity.

but it is inactive because of Turkey's political crisis." He also criticises European investors who "underestimate Turkey. They are oblivious to the fact that the economy of

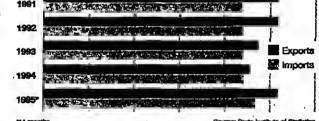

Many Turks complain that the customs union between Turkey and the European Union. which came into force on January 1 has had no effect. Imported European goods from cheese to cars are as expensive as ever.

European Commission officials tell another story. Although it is too early to assess trade and investment flows, they say increased European competition, or at least the threat of it, is already baving some positive effect. For instance, the price of consumer durables fell sharply in real terms in the first quarter. Foreign investment, mainly by Europe-based companies, rose to \$340m in January alone after a record inflow in 1995. Teetbing problems bave nearly all disappeared and trade is flowing smoothly between the two sides.

Turkey still needs to finisb harmonising its laws with the EU's body of law and set up the customs unioo began. enforcement some mechanisms

For instance. Turkey has passed EU-compatible anti-trust laws but bas not yet set up an independent competition board to enforce the law. The government bas not choseo the board's 11 members, appointed for a

six-year term, because of "There is total disagreement disputes between the two bere. The way the Commission sees it and the way the Turks see it are completely different." For months Turkey delayed signing a steel agreement However, none of these which required Brussels to problems is likely to scrap a 4-8 per cent duty it destabilise the customs union. levied on Turkisb exports to With time, and assuming a the EU, simply because Ankara minimum of political stability could not decide who to send and economic reform in Turkey, investment flows should increase substantially. to the signing ceremony. framework."

Istanbul produces more than Hungary.

Still, Turkey has attracted Japanese and South Korean car investments. Toyota already has a factory near Istanbul that is cutting away at the quasi-dnopoly of Fiat and Renault which bave long-established plants in Turkey.

Honda, Mazda and Hyundai are in the process of setting up assembly lines too. They are producing mainly for the domestic market but once their local content meets EU norms. their cars can be exported to the EU duty-free.

Turkey'a low wage economy is also starting to attract investment as companies relocate capacity in middle-to-low technology products such as textiles and clothing or consumer goods and cars. Yet with EU inward investment at less than \$1bn a year, there is plenty of room for improvement.

However, this does not

Fight to the finish on the right

Both want a

pro-western, free market and secular Turkey. But they hate each other

Exactly three months ago today, Mr Mesut Yilmaz, the prime minister, and his bitter political rival and predecessor, Mrs Tansu Ciller, signed a protocol detailing a complex power-sharing formula. The two agreed to form a minority coalition government and to rotate the premiership between them, with Mr Yilmaz starting first. The eeremony was treated as an state occasion and broadcast live on national television as the two leaders passed leather-bound volumes containing the agreement to each other.

Tha elaborate eeromony rekindlad hopes that the dlvided centre-right would soon be united, ready to push through long-delayed reforms and above all hold the line against the Islamist Refab party now the largest in parliament.

It was not to be. The ink on the protocol had barely dried before the two leaders had resumed their bitter fight to the finish to control the centreright heartland of Turkish politics. Although few analysts expected the coalition to last the year, very few predicted that it might not reach the 100day mark.

Today, parliament begins a no-confidence debate that is likely to bring down the government before the week is out. The breakdown between the two leaders appears irreversible. Last week Mrs Çiller said Mr Yilmaz should resign or "I will support the vote of no-confidence". He retorted

elections should bring this to parliament and we will support What happens next? Mr Meb-

met Ali Birand, a respected political columnist in the newspaper Sabah, commented: "It looks like the government will end [this week] and bargaining to form a coalition will start. If nothing comes out of it, tha president will form a government to take the country to

elections. This could happen quickly but could also continua until the autumn. We will have a summer full of unrest and runnours." It is easy to become distracted hy the messy Yilmaz-Ciller divorce. The real issues have not changed. The first concerns the centre: will the Motherland party of Mr Yilmaz and Mrs Ciller's True Path party ever unite and if so how and under whose leadership? Motherland and Refah's corruption allegations against Mrs **Ciller** have further tarnished

> her reputation. Mr Yilmaz'e claim that she misappropriated \$6.5m from a prime ministerial discretionary fund before leaving office in March was probably the most damning. Her grip on the party

remains strong but mutterings from the normally subservient rank and file can be heard. Mr Yilmaz has probably emerged from the battle stronger. Although his reputation for dithering has grown, he at least is considered to be hon-

est. Polls indicate that few Turks care whether Mrs Ciller or Mr Yilmaz wins the battle for the centre. Yesterday'a local byelections held in 40 districts and towns, may not represent national opinion but they could decisively affect the

Chronology of a divorce

December 25 1995; Election results announced. Refah emerges as largest party, but fails to form a coalition. Motherland comes close to an alliance with Refah, but army forces it to share power with True Path, March 3 1996: Mr Yilmaz and Mrs Ciller sign coalition protocol detailing their power-sharing formula under which they will rotate the premiership. March 12: Government wins parliamentary vote of

to continua in this government." April 24: Motherland MPs vote with Refah to set up a parliamentary committee to investigate comuption allegations against Mrs Ciller April 25: Trua Path ministers boycott cabinet. May & Hurriyet, an anti-Çiller newspaper, claims she misappropriated \$8.5m from a discretionary fund. . May 9: Motherland MPs side with Refah to form a second perliamentary committee to

that "anyone wanting early struggle between Mrs Ciller and Mr Yilmaz. Uniting the two antagonistic parties will not be easy. Mr

Korkut Ozal, a leading Motherland MP who openly favours an alliance with Refah, says "I doubt it would work. One side would deprive the other of posts." The main purpose of Turkish parties is to further the personal, business and political ambitions of their members and backers. Policy issnes comes second, which explains why Motherland and True Path are so bitterly divided, even though they share the same pro-western, pro-business, secular values.

The army, those stern guardians of Atatürk's heritage, remains as politically powerful as ever. The generals drove True Path and Motherland together to block Refah's advance. They could redouble their efforts to forge a united conservative party. Mr Sedat Alogiu, a senior True Path MP, says unity is possible: "There is no other formula in parlia-ment. We will not be the party that gives up."

The second issne regards Refah. Its sapport grows as backing for mainstream parties recedes. It is the only party offering an alternative to the confusion in Ankara, with its anti-corruption message, its claim to be the voice of the dispossessed and its "Just Order" platform of populist slogans.

Pollsters say only one quarter of those voting for Refah share its vision of replacing the 73-year secular state with an Islamic republic. Most are turning to Refah out of protest at the corruption and incompetence of established parties. Yet Refah's disciplined party workers, its gradual infiltration of government bureaucracy and growing control over the education system all indicate that the party is planning strategically, focusing beyond the immediate political crisis. Mr Neemettin Erbakan, Refah's leader, did promise to respect the secular order and Turkey's alliances with the west during long but ultimately fruitless coalition talks with Mr Yilmaz in January and February. Yet doubts over

his sincerity - and the strength of Refah's pragmatists over its hardliners - immediately grew after a series of meetings at the Iranian embassy, where he praised the Ayatollahs' revolution.

The war in the south-east

Human rights violations

Tansu Ciller, leader of the True Path perty

Foreign policy **Reverses on all sides**

There has been a shift on the Middle East, but the main problem lies in Europe

In May, President Süleyman Demirel escaped assassina-tion by a deranged fundamentalist protesting at Turkey's growing retationship with Israel. If nothing else, the incident drew attention to a ravid change in Turkish attitudes to the Middle East.

The Ottoman Turks ruled the region for four centuries, hut their republican succes-sors all but ignored it, concentrating on developing ties with Europe. Turkey's Middle East policy consisted mainly of deflecting Arah protests over its exploitation of the Tieris and Euphrates or berating Syria for supporting the Kurdistan Workers' party (PKK). Ankara was only a hit player in the Middle East peace process.

In February, to the surprise of many, Turkey and Israel signed a military co-operation agreement. Until the 1993

Oslo peace accords between Israel and the PLO, Turkey had observed Mostem solidarity by keeping the Jewish state at arm's length. Mr Alan Makovksy of the Washington Institute for

Near East Policy, commented thet closer ties with Israel "reflects Turkey's disappointment with Arab world attitudes toward Cyprus, the PKK end Tigris-Euphrates water." Turkey and Israel have much in common. They Israel will dominate the region and accordingly has thrown in its lot with them. Bowever, there are limits to the relationsbip. Turkey

Bnt Israel has shown little entbusiasm for linking the PKK to negotlations with Syria. Yet Mr Sbimon Peres,

Israel's prime minister, bas sald Turkey could supply water to Syria to replace Golan water resources that Israel wants to control after withdrawal. Turkey immediately rejected this and Israet quietly dropped the matter for the time being. And as Mr Demirel has

anged fundamentalist

found. Turkish domestie opinlon has proved bostile to Israel, and oot just among Islamists. Mr Cengiz Candar, a columnist in the mainstream newspaper Sahah. described the relationship as a "shameful collaboration". He said: "If Turkey is a regional power It is only natural for it to have good relations with Israel. What is not natural is that Turkey has been reduced to serving as a spare tyre for Israel." Prominence in the Middle

Bast compensates for reverses in Central Asia, which Turkey once imagined as its own preserve because it shares the same language, culture and Sunni Moslem religion with these former Soviet republics. Turkey cannot provide the aid or political support Central Asian republics expect. Political squabbling and a succession of foreign ministers in Ankara - seven in two years - prevented formulation of a coherent policy, which has also diminished Turkey's value as a western proxy in the region.

Instead, its rival Iran has focused on trade and infrastructure instead of exporting revolution. In May It opened a railway connecting the Persian Gnlf port of Bander Abbas to Central Asia. Russia, another adversary, is reestablishing Soviet-era oil plpeline networks. Turkey fears for its pet project, a \$2.3hn pipeline to export Azerbaijan's oil to Ceyhan on the Mediterranean. All three countries believe controlling Infrastructure will bring political influence, as well as

TURKEY 3

111

Incrative contracts . Still, Turkey's higgest problem remains its relationship with Europe. Most Turks consider themsetves Europeans hut most Europeens view Turkey as a backward, unstahie country notorious for human rights violations. Althongh the European Union and Turkey established a customs union on January to bolster Turkisb political stability and to icerease trade, relations have deteriorated instead of improving. A squabble in January with

Greece, Turkey's traditional foe, over two rocky outcrops in the Aegean nearly esca-lated into war. Greece continues to block EU aid to Turkey, rejecting an offer by Mr Mesut Yilmaz, prime minister, of unconditional tolks. Atheos demands international arbitration to settle their disputes.

Brussels has rejected Turkisb requests for EU membership. Now Turkey must watch in bumiliation as Malta and Cyprus then eastern European countries begin accession talks.

Turkey is looking increasingly to the US. However, Washington's attitude differs little from Europe's. Polltical confusion in Ankara is undermining Turkey's international credibllity. Turkey needs political and economic reform. The US and Europe are ready to help diplomatically and financially, fearing an unstable Turkey, perhaps controlled by an Islamist government, wpuld destabilise the Middle East, the Balkans, **Eastern** Mediterranean and Central Asia.

wishes Israel and the US would force Syria to abandon the PKK, which receives considerable hacking from Damascus as a pawn in its water dispute with Turkey.

are US allies; they are democracies with relatively large, market-oriented economies; they fear resurgent fundamentalist Islam; they are isolated in the Middle East. Western diplomats say Tur-key has concluded the US and

агу.

recovered from the short but severe recession of 1994 when the country teetered on the edge of a slump after financial markets collapsed.

Last year companies exported beavily. with 1995 exports rising to a record \$21.98bn from \$18.39bn the year before. They embarked on an investment boom, which is still continuing. Textiles and clothing. Turkey's largest and probably most competitive industries, have alone invested about \$8bn since the beginning of 1995. Foreign investment has also picked up, with a 50 per cent increase last year to \$1.25bn, a record.

Companies invested to prepare for an expected competitive onslaught with the Turkey-European Union customs union. The government also helped boost domestic demand by loosening fiscal and monetary policy in the last quarter of the year as elections approached.

The outlook for business this year is probably for continued recovery, albeit at a slower pace than last year, partly because of a downturn in Germany, Turkey's biggest market in Europe. Economists are forecasting 80 per cent inflation, a drop in interest rates during the summer and economic growth of 4-4.5 per cent, which is low by Turkish standards.

So executives may be forgiven for saying they can prosper in spite of the state. Turkish companies are internationally renowned for

of local capital markets, so they go overseas for loans, where real interest rates are one-sixth of Turkish rates. Mr Adil Konukoğlu, finance director of Sanko, a big family-

owned textile company, says: "If interest rates in Turkey are so high, how can you take a risk of borrowing and then go a 50 per cent and open new factories?" He finances expansion from increase last retained earnings wherever possible and borrows overseas However, business confia record

dence may be overplayed. There are few companies that are totally independent of the lethargic government bureau-cracy. Mr Berker says: "Our construction company depends bring down the government on government decisions which unfortunately do not

deposit guarantee scheme, introduced in 1994 to prevent a run on banks, arguing that it distorts the financial system. They say this lets weaker

knowing that the government's guarantee scheme will bail them out of trouble.

However, political pressure to retain the scheme is very strong. In any case, the big banks protest too much. Most depositors suspect government guarantee payments probably take a long time, possibly witbout full adjustment for inflation, and play it safe by keeping their money at top tier banks. Moreover, minor banks such as Derbank or Finanshank must pay about onesixth more for sbort-term funds than the majors.

The huge state banks are the real culprits when it comes to distorting the industry. They control over half the financial system's assets, led by Zirant Bankasi, the biggest bank in Turkey, and pay below market rates for funds. Yet they no longer act as banks in the conventional sense. They have become part of the treasury, their portfolios stuffed with government paper and nonperforming loans to private

Invasion of the cities

Rural migration is the country's main problem, since its big cities cannot cope

People born in Istanbul before 1960 can remember a small, somewhat shahhy and rundown city where one could find the monuments and palaces of the Byzantines and the Ottomans. These are still there, but completely overshadowed hy office blocks and flyovers choking with traffic.

Today, these people anort, the city is succumbing to new barbarian invaders who arrive at all hours of the day and night in buses from the forbidding Anatolian heartland to start a new life in Istanbul.

Peasant migrants who can harely read and may never have set foot outside their villages arrive in Istanbul, Turkey's higgest city and industrial capital, at a rate of about 400,000 a year. Nobody is sure what the city's real population is - estimates range from 8m to 12m - because the last census took place in 1990.

Even if Turkey's population rate is tapering off, rural migration remains a big problem. Migration is the basic prohlem facing Turkey's big cities. Istanbul is not alone -Ankara the capital, and Izmir, Turkey's third city - are all suffering the same phenome-

Mr Burhan Ozfatura, Izmir'a mayor, says: "Izmir's population is growing at about 5 per cent a year and is about 3m now. All our problems, such as bousing and infrastructure, are related to population growth." He has lobbied the central government to allow local administrations the right to issue residence documents to atem migration. His colleagues in Istanbul would also like to see

similar measures to limit migration. Controls would be unconstitutional, and probably would not work either. Mr Sunday Onur, a demographer at Ankara university, says that how-

of the straits.

The resumption of daily power cuts appears to be another sign of national malaise

Power cuts are once again becoming part of daily life in Turkey. In the 1970s, power failures would last for hours and black out large parts of the big cities. Nowadays, the cuts which happen frequently in Istanbul and Ankara - rarely last more than an hour. But the fact that they have started again illustrates the collapse of the country's infrastructure. Earlier this year Mr Mesut Yilmaz, the prime minis-

objections to reopening obsolete, highly-polluting power stations would have to take second place to Turkey's growing demands for energy. Otherwise, he said, "we will have to introduce power cuts from the end of the year". Though Mr Yilmaz later backpedalled on this idea, it is

are needed. For years, ministers have said that Turkey needs to invest \$2bn a year to meet electricity demand that is rising by about 9 per cent a year, but have failed to act. Instead, they have continued to impose political appointees on state utilities and interfere

in investment and procureing consumers by two to one ment decisions to favour their supporters. Neglect, under-in-Reveoues are also much lower than they could be if the vestment and corruption are system was operating norwrecking Turkey's roads. mally. So electricity prices in ports, rallways, airports, power, water and sewage Turkey are high, in spite of its ahundance of hydroelectric power, placing an additional burdeo on industry which pays

to evade their responsibility to invest in infrastructure Electricity generation in Gigawatt bours Year 1991 1992 1993 1994 1995 - Estimate more for its electricity than control. They say the government is ignoring the far more basic issue of maintenance. Waste, theft and loss of output due to insufficient maintenance mean that Turkey's electricity generators operate at

per cent below capacity. Theft and losses in the transport and distribution systems are so widespread that in some places, such as Divarbakir, the regional capital of the southeast, those booked up to illegal power connections are estlmated to ontnumber bill-pay-

mundane decisions have to be approved by Ankara's bureaucracy, But civil servants are afraid of taking decisions, fearing that an incoming government, in trying to make political capital, will accuse bureaucrats who served the former government of corruption or incompetence.

Mr Anders Ericsson, ABB's Turkey country manager, says officials "do not dare to take a decision for fear of prosecu tion. The best decision is no decision and every serious investor in Turkey takes this into account, so in the end the taxpayer loses." According to the State Planning Office, public infrastructure projects are on average 2.4 times over budget due to delays. Energy projects planned to be completed within 68 months are finished

Mr Yilmaz and his predecessors have attempted to privatise utilities or introduce private financing for infrastructure projects though Build-Operate-Transfer.

So far, courts have approved only seven BOT projects, including the 672mW Birecik hydroelectric dam on the Euphrates, However, none of the seven projects are likely to come on stream in time to prevent black-outs.

One thing to remember in Ist-anbul is that the passenger is responsibla for the TL100,000 toll over the bridges across the nor huffat charge an extra commission for cash. In fact, if Bosporus, even if crossing in the opposite direction of the you want dollars from sterling. side where the toll is collected it's probably cheaper to do it in (Europe to Asia on one bridge Istanbul via Turkish lira than and Asia to Europe on the on a London high street. Much mora confusing is keeping other).

Travellers' cheques tend to be a hit of a dead weight. although it is not that risky to carry cash. Istanhul is safer than most metropolitan cities. Anywhere that caters to a husiness clientele will accept credit cards (as do the numerous antomated teller machines). Still, it pays to watch for the occasional hag snatcher or gang of children who will stage a fight as you walk past as a ruse to get at your wallet. These tend to congregate around Taksim Square and Beyoglu area.

Until recently, the main risk of roving around Istanbul used to be not from petty thieves but sudden gaps in the pavement. But this may change. Residents of Istanbul were shaking their heads in amazement as the UN Habitat Summit prepares to kick off. Every bit of payement in the city centre has been torn up, to be replaced with mile after mile of symmetrically-laid brick.

The last time something similar happened was after the 1980 coup when, it was popularly assumed, somebody's brother-in-law got the contract to cover the pavements with pink tiles. These were so positioned as to absorb a reservoir of water underneath. Days after a rainstorm you would step on one and be squirted in the eye. This time, however, it looks as if the paving might just work. Pedestrians can negotiate the Istanbul section of the global village in safety once again.

Every is not a couple.

I izmir and the Aegean region City of hustle and bustle

A reactivated city -Turkey's third largest - needs to improve the quality of its citizens' lives

Only e few years ago, Izmir was a sleepy backwater, its past as the Ottoman empire's greatest trading post well behind it. Today, however, Izmir is bustling with activity. Factories and industrial parks eppear in the least expected places, heavy trucks thunder along its narrow roads spewing black diesel fumes and rural migrants arrive, looking for work. As a result, the city'a population has swelled to 3m. Development and industrialisation destroy as they create. There is little left of the gracious, old world Smyrna, as the city was known before its name was changed to the modern Turkish Izmir. The wealthy families of Greek, Italian, Jewish, or Armenian descent that once domineted izmir's commercial life have nearly all left. In the hinterland and along the beautiful Aegean coast, studded with magnificent Greek and Roman ruins, scarcely regulated development is studding the coast with high rise hotels and unsightly holiday villages. Like city fathers the world over, limir's conservetive mayor, Mr Burhan Ozfatura, 53, is attempting to meet the demands of a rapidly rising population at the same tima as improving the quality of life in the city,

Some of his projects are popular. The Bay of Izmir, once among the loveliest in the Mediterranean, has become a stinking pool of raw sewage and industrial waste. The city is spending \$345m to process effluents and pump them fursoft loans to members. ther ont to sea. Two-thirds of the project has already been completed. "God willing, by 1998 the problem will be over." Mr Ozfatura says.

He wants to finish a ring road next year and inaugurate a \$650m metro system in 1996. Housing is a critical issue in a city overwhelmed by heavy migration, so he plans to build homes for 12,000 families by 1999, the year he leaves office. this will happen, it is a ques-tion of making it happen But his plan to drive industry from the city so as to reduce air pollution is less pop-

tamin's trade fair; the city is no longer a beclowater

ular with employers and work ers. His proposal to transform the Kordon, once e bayside promenade and now a main roed, into an expressway is greeted with horror by Izmir's small environmental move-

For all Izmir's hustle and bustle, it retains something of strongly its old character. The pace of life is more sedate than in Turkey'e other big cities. Izmir is proud of its burgher values of hard work, thrift and honesty. yet it still has an atmosphere of relaxed informality.

Most people in Izmir know the way to the Opel factory. Located about 40 minutes from the city centre, the six-year-old factory is the region's premier foreign mrket. However, perhaps **Opel is its innovative** approach, by Turkish

standards, to manufacturing Mr Kevin Jackson, Opel's "The people have been highly trained and the process they

market. When you take the decision to keep the family together they are constantly trying to improve quality." Three hundred people work at Opel, nearly all of them factory workers. In 1994. when a financial crisis drove the economy heavily into recession, Opel had to cut production. Instead of laying off staff, it found jobs for workers either in Turkey, or overseas, Fifty Izmir employees went to train workers at new GM plants in Egypt and Indonesia.

larger and more sophisticated willingly participate to permanent cost-cutting ~ and operations in Europe. job-threatening - exercises. Other companies in the region are trying to adout Even though there are no similar methods to motivate mions, Opei has an unwritten policy of not laying employees. One nearby factory has divided its off workers. Mr Jackson says that to "keep a motivated workers into team workforce, you can't lay competing with each other to ople off and rehire them at reduce defects. Signs hanging above the factory floor unge employees to wear pallovers instead of complaining about the cold or proclaiming that "every defect is a loss for the nation" but at this factory. pechaps unsurprisingly, workers seem sullen and resentful There are several

additional factors that explain Opel's success in Industrial management. To begin with, It pays well above the local average wage so It attracts better qualified workers - a few even have university degrees - and high unemployment makes ployees value their job Perhaps most important, since Opel's factory is relatively new, bad working and management habits have not yet put down deep roots. In comparison, managers at an Opel competitor established in Turkey for 30 years, where relations between management and workers are ossified, are paradoxically trying to force employees to accept empowerment

Ulobal banking made in Germany.

The world is shrinking. Whereas your scope is growing. Theoremcally. And practically?

Whenever you wish to make more than just a small move, include the WestLB in your plans. We appreciate global thinking end, as one of Europe's leading banks, we have both the axpenence and the potential to achieve even exceptional goals - with you. Established as a German wholesale bank, we

offer you all services from one source, made to measure, reliable and, if you like, worldwide, After ell, what could be closer to your wishes than a bank with e perspective as broad as your OWN?

Are you looking for a partner near you? Simply call our automatic fax service in Germany on (+49) 211 9 44 83 70 to request a list of our worldwide network straight away.

Monday to Friday); Government offices: 8.30am. 12.30pm and 1.30-5.30pm (Monday to Friday): Business offices: 9am-12.30pm and 1.30-5pm (Monday to Friday); Shops: 9am-1pm and 2-7pm (Monday to Saturday).

UK (not generally needed by

other EU nationals). Visas are

available at port of entry for

£5. They are valid for three

months, but do not allow the

visitor to take up employment.

Banks: 8.30-noon and 1.30-5pm

Business hours

Food shops may keep longer hours and there is likely to be one food shop open in each neighbourhood on a Sunday.

Public holidays

Banks and offices are closed on January 1; April 28 (National Sovereignty and Children's Dey). May 19 (Youth and Sports Day), August 30 (Victory Dey), October 28 (halfday). October 29 (Republic Day).

There are other public and religious holidays, but on these banks and offices open.

Health

Avoid drinking the tap water. It's best to bring anti-diarrhoea tablets (locally-produced vari-eties are available). You should consider malariepreventative tablets if visiting

the south-east in late spring or early summer. Hepetitis A, polio and typhoid vaccination are recommended. Rables is a potential danger: keep away from the

giant Sivas-Kangai sheepdogs, which are not aggressive unless one gets too close to their flocks. During the summer, when nussels are best avoided, food

poisoning is a risk, especially in eastern Turkey.

Climate

Coastal regions have a Mediter-ranean climate, with mild, moist winters and hot, dry summers. November, Decem ber and January are the rainiest months, June, July and August the driest months. July (27°C in lamir) and August are the hottest months, January (8 "C in Izmir) and February the coldest months.

What to bring

The following could be useful; mosquito repellent (especially May-September), sunblock cream (expensive in Turkey) and a sink plug.

Invitation for Bids (IFB)	Date of Issuance of IFB: Loan No: IFB No;	06 June 1996 Under negotiations TGM-01/96

- The Republic of TURKEY has applied for a loan from the International Bask for Reconstruction and Development (IBRD) in various currencies towards the cost of the (Communications Liberalisation Project). It is intended that part of the proceeds of this loan will be applied to eligible payments under the contract for National Monitoring Systems.
- The General Directorate of Radiocommunication (TGM) now invites scaled bids from eligible Bidders for the design, supply, delivery, installation and integration including Project Management of NMS, which is composed of National Monitoring System (NMS) and National Frequency Management System (NFMS).
- Interested eligible Bidders may obtain further information from and impact the Bidding Documents free of charge at the office of:
 - Head of Monitoring Depa Telstz Genel Mudurlugu Telex No: 44371 TGM-TR 90 (312) 221 32 26 Fax No: Ulasurma Bakanligi Sitesi L Blok Phone No: 90 (312) 212 21 35 06510-Emek Ankara/TURKEY
- A complete set of Bidding Documents may be purchased by any inscreted eligible Bidder on submission of a written application to the above and upon payment of a non-refundable fee of US\$400 or equivalent at the exchange rate applied by the Tunkish Central Bank on the date of purchase. Those bidders who have purchased previous bidding documents may not need to pay. Only those bidders or their representatives who have purchased the Bidding Documents may participate in the Bid.
- A Two Stage Bidding Procedure will be adopted and will proceed as follows:
 - A Two Stage Bidding Procedure will be adopted and will proceed as comove: a) The First Stage Bid will consist of a technical bid only, without any reference to prices, and list of any deviations to the technical and continervial conditions set forth in the Bidding Documents or alternative technical solutions a Bidder wishes to offer and a justification therefore, provided always that such deviations of alternative solutions do not change the basic objectives of the project. Following evaluation by the Employer of the First Stage Bids, the Employer will invite each Bidder who meets the minimum acceptable qualification criteria and who has submitted technically responsive First Stage Bid to a Clarification Meeting during which the Bidder's Bid will be reviewed and all required smendments, additions, deletions and other sdjastments will be noted and recorded in a Memorandum. Only those Bidders submitting a technically responsive and acceptable First Stage Bid will be invited to submit a Second Stage Bid.
 - The Second Stage will consist of (a) an updated Technical Bid incorporating all change required by the Employer as recorded in the Memorandum to the Clarification Meeting or as necessary to reflect any smendment to the Bidding Documents issued subsequent to submission of the First Stage bid, and (b) the Continercial Bid.
 - First Stage bid will be opened in the presence of the Bidder's representative who choose to attand at the above address, 3rd floor, room no: 313, on 5 September 1996 4t 14.00 hours (local), as also indicated in BDS. Second Stage Bid will be opened in the presence of the Bidder's representative who choose to attend at the time and date at the address given in the letter of invitation to submit second stage bids.
 - All second stage bids must be accompanied by a Bid Security in an amount of not less than 3% of the bid price in local currency or the equivalent in a freely convertible currency in one of the following forms:
 - a bank guarantee or irrevocable Letter of Credit issued directly by a bank located in the Employer'a country or abroad acceptable to the Employer, in the form provided in the Bidding Documents; or b) cash.
 - In the comparison of evaluated bids, the Employer will grant a margin of preference to plant and equipm nufactured in the Employer's country in accordance with the procedure outlined in the Bidding Documents. The Bidders must have the following minimum qualifications and experience:
 - Design, supply, delivery, installation and commissioning of at least one radio spectrum monitoring system of
 - national or regional coverage and one frequency spectrum management contract within the last five years; Project management and system integration of similar contracts with national or regional coverage by which the system's integrator must have fully implemented at least one, or participated substantially
 - million and, in case of a consortium the leader of the consortium, this shall have at least an annual turnuver of 40% of that amount and shall have executed similar contracts worth USS50 million or more over the last five years.

Bidders shall respond to every Clause of the technical specification. If a requirement of the specification is not met, full details of deviation shall be given and consequences on the system's performance shall be explained. incomplete responses could lead to a disqualification.

(In responding, reference to the clause numbers abould be the same as of the Bidding Documents.)
